Financial Accounting for Decision Makers, 10th Edition Peter Atrill,Eddie McLaney,2022 This text provides a comprehensive introduction to financial accounting It is aimed at students who are not majoring in accounting as well as those who are Those studying introductory level financial accounting as part of their course in business economics hospitality management tourism engineering or some other area should find that the text provides complete coverage of the material at the level required Students who are majoring in accounting should find the text a useful introduction to the main principles which can serve as a foundation for further study The main focus of the text is on the ways in which financial statements and financial information can improve the quality of decision making To ensure that readers understand the practical implications of the subject there are throughout the text numerous illustrative extracts using commentary from company reports survey data and other sources Although some technical issues are dealt with in the text the main emphasis throughout is on basic principles and underlying concepts In this tenth edition we have taken the opportunity to make improvements including those suggested by students and lecturers who used the previous edition We

have rewritten some material to make it more understandable to readers and have also increased the number of diagrams. The number of examples from real life have been expanded as have the number of activities. We have also incorporated developments to International Financial Reporting Standards. Recent developments in auditing are discussed and explained. The text is written in an open learning style. This means that there are numerous integrated activities, worked examples and questions throughout the text to help you to understand the subject fully. In framing these questions and tasks we have tried to encourage critical thinking by requiring analysis and evaluation of various concepts and techniques. You are encouraged to interact with the material and to check your progress continually. Irrespective of whether you are using the text as part of a taught course or for personal study we have found that this approach is more user friendly and makes it easier for you to learn. We recognise that most of you will not have studied financial accounting before and therefore we have tried to write in a concise and accessible style minimising the use of technical jargon. We have also tried to introduce topics gradually explaining everything as we go. Where technical terminology is unavoidable we try to provide clear explanations. You will find all of the key terms highlighted in the text and then listed at the end of each chapter with a page reference. All of these key terms are also listed alphabetically with a concise definition in the glossary given in Appendix B. This should provide a convenient point of reference from which to revise. A further important consideration in helping you to understand and absorb the topics covered is the design of the text itself. The page layout and colour scheme have been carefully considered to allow for the easy navigation and digestion of material. The layout features a large page format, an open design and clear signposting of the various features and assessment material. We hope that you will find the text both readable and helpful.
