The Routledge Companion to Postcolonial African Historiography Thula Simpson, Immanuel R. Harisch, 2025-05-09
The Routledge Companion to Postcolonial African Historiography explores history's fortunes in Modern Africa south of the Sahara from the discipline's Golden Age as a handmaiden in struggles against colonialism to difficult decades when its survival has been threatened by capricious political and economic conditions and the uncertain present where the continent's historians struggle to justify their value to frequently sceptical publics In exploring the discipline's practical role in past

struggles for African emancipation the volume speaks directly to these challenging but changing circumstances The chapters feature contributions from leading experts on historiographical traditions of different regions of the continent They collectively demonstrate how the process of instrumentalizing the past to advance lay struggles has influenced the choices historians have made regarding sources methodology interpretation audiences and platforms This practical application has strongly shaped the diverse forms that African historiography has assumed as reflected in this book The themes discussed offer a platform for inserting Africa into comparative studies of global historiographical traditions whilst also contributing to contemporary debates on decolonization In offering accessible insights from leading historians this is an essential handbook for students and scholars of African history and historiography as well as all those interested in postcolonial studies

National Child-focused Policy Research Agenda 2016-2020 ,2016 **By all means necessary: Protecting civilians and preventing mass atrocities in Africa** Dan Kuwali,Frans Viljoen,2017-05-16 *Universities and the Occult Rituals of the Corporate World* Felicity Wood,2018-04-17 Universities and the Occult Rituals of the Corporate World explores the metaphorical parallels between corporatised market oriented universities and aspects of the occult In the process the book shows that the forms of mystery mythmaking and ritual now common in restructured institutions of higher education stem from their new power structures and procedures and the economic and sociopolitical factors that have generated them Wood argues that universities have acquired occult aspects as the beliefs and practices underpinning present day market driven academic discourse and practice weave spells of corporate potency invoking the bewildering magic of the market and the arcane mysteries of capitalism thriving on equivocation and evasion Making particular reference to South African universities the book demonstrates the ways in which apparently rational features of contemporary Western and westernised societies have acquired occult aspects It also includes discussion of higher education institutions in other countries where neoliberal economic agendas are influential such as the UK the USA the Eurozone states and Australia Providing a unique and thought provoking look at the impact of the marketisation of Higher Education this book will be essential reading for academics researchers and postgraduate students engaged in the study of higher education educational policy and neoliberalism It should also be of great interest to academics in the fields of anthropology folklore and cultural studies as well as business economics and management India-Africa Economic Relations in the New Global Economy Rick Rowden,2025-03-18 While there have been many books about China s growing economic role in Africa this book explores the much less well known story of India s growing economic role in Africa And like the big debates about China s role in Africa this book similarly asks if India is acting as a helpful development partner in Africa an exploitative new colonizer or if the answer ultimately has to do with the degree of agency exercised by African governments While the book documents the significant increase in Indian aid trade and FDI in Africa in the new millennium it also offers much more It comprehensively looks at theories of economic development the debates about the role of trade and industrial policies in economic

development strategies colonial and post colonial literature and controversial features of today's global political economy as the background to study Africa and frames Africa India economic relations in these broad contexts The book reviews the history of India's diplomacy trade and investment in African countries since decolonization with a focus on the increased economic ties of the past two decades The main question examined is about the longterm impact that India's economic relations are having in African economies and if India is helping Africa to successfully develop over time or not The author examines India's economic and strategic interests in the African region and offers a comparative analysis of Africa's trade with India China the European Union and other African nations The book also explores a number of outstanding issues in India Africa relations today such as Africa's role as a source of oil gas and critical minerals needed by India the lifesaving role of Indian generic medicines across the continent the nature of the agricultural development model that India is introducing in Africa and key areas where Indian and African governments are cooperating in the international arena The book offers a critical and in depth look into the partnerships India has developed with African countries and contributes to the debate on economic relations between a more developed emerging market like India and less developed countries A major contribution to the emerging area of South South economics this book part of the Critical Political Economy of South Asia series will be useful for scholars and researchers of economics development economics development studies public policy diplomacy African studies political economy South Asian economics and international politics and trade

Institutionalist

Perspectives on Development Spyros Vliamos, Michel S. Zouboulakis, 2018-10-31 This book depicts the role of both formal and informal institutions in achieving long term economic efficiency and development It is organized into three sections the first section deals with the historical and political roots that make institutions favorable to development the second section offers theoretical perceptions of immaterial institutions the last section explores how the various official institutions such as international organizations interrelate with the process of development As both the recent global financial crisis and the subsequent sovereign debt crisis within the Eurozone have shown sustainable development is a combination of human social and institutional factors that interact with each other and go beyond the strictly economic conditions of each country With contributions from several countries in Europe as well as Iran this volume offers readers an international and
