Regulating Marriage Migration into the UK Helena Wray, 2016-04-08 Marriage migration is a controversial and problematic issue in the UK as elsewhere in Europe This timely analysis is a comprehensive examination of the regulation of marriage migration into the UK With international relevance the book uses the analysis to examine the relationship between government priorities and the dynamics of transnational family life The book is one of the first to scrutinise the control of UK marriage migration after 1997 and explores the dilemmas faced by the post 1997 government in managing this form of migration in a changed domestic and international environment Using high quality sources from across the political spectrum it analyses regulatory decisions made by government the judiciary and the visa service and suggests that there is an unofficial and unarticulated hierarchy predicated on assumptions and beliefs about acceptable marriages Finally the book establishes a principled basis for the future regulation of marriage migration **Routledge**

Exercising Professional Judgement Fiona Westwood, 2016-09-16 This is the fourth in my series of books about professionals and their practice It investigates the importance of learning from work based experiences in a supportive community of practice that encourages reflection It concentrates on the exercise of professional judgement in the context of

mastering the craft of lawyering I feel that this is especially important at this point in time when current changes in the way legal services are delivered may put at risk the traditional method the legal profession has used to develop this in its new entrants Everyone involved in the UK legal profession is well aware of recent changes to its structure and methods of working The opening up of the legal services market to alternative business structures following the Legal Services Act 2007 has created a variety of delivery mechanisms ranging from acquisitions of indigenous law firms by other jurisdictions to new corporate entrants adding legal advice to their existing products Adjustments to fee levels and work practices mean that some are concentrating on specialist advice while others are employing para legals to complete work on commoditised client files Whether these responses will achieve the government commissioned Clementi Report s Clementi 2004 aim of improving the quality of the provision of legal services remains to be seen Some incomers have already found it more difficult than they anticipated to operate profitably and have withdrawn from the market However the overall effect has been to fragment what up until 2007 had been a fairly cohesive profession Regardless of all of this clients continue to expect their legal advisors to provide them with solutions to their problems and where needed access to justice To achieve this given the complexities of what is involved in the application of the relevant law to the particular situations clients find themselves in lawyers have to exercise their professional judgement so as to determine what options are available and most importantly achievable Traditionally they have developed the ability to do this through induction to and subsequent experience in a community of practice where more senior practitioners allocate tasks to and supervise novices as well as share with them the way they arrive at and implement the most appropriate choice available in the specific set of circumstances However recent alterations in work practices brought about in particular by information technology have reduced the availability of the type of low risk routine work usually completed by trainees to allow them to gain experience and proficiency So this book is about identifying how lawyers up to this point in time have developed their judgement and through recognising the changes affecting their profession offering a model that will continue to allow new entrants to achieve this regardless of the type of legal services providers they work in In addition given that external influences including IT and pressures on profits are being felt by many professions I hope that the Model will also be relevant to other disciplines where the training of novices has to be embedded in organisations that need to match their people and resources with the management of risk client satisfaction and quality of services

Violence against Women and Regimes of Exception Catherine

Briddick, 2025-07-30 Violence against Women and Regimes of Exception provides a wide ranging examination of how migration law discriminates against women heightening their risk of being subjected to violence and intensifying their experiences of it Catherine Briddick identifies patterns of disadvantage scrutinizes justifications for differential treatment and delineates legal obligations relating to violence against women Structured around the legal challenges that migrant women have brought to the regimes determining their status this book reveals the devastating impact of flawed rules that

increase vulnerability to violence deny effective protection and render victims at risk of destitution detention and deportation Integrating doctrinal empirical and theoretical material it explores the difference that migration status makes to an experience of violence investigates where existing regimes fall short and establishes how the resulting compounded disadvantage should be remedied The analysis begins in the UK and with the European Convention on Human Rights broadening to connect with European Union law and the Council of Europe s Trafficking and Istanbul Conventions This approach provides valuable insights into the role and ability of national courts the European Court of Human Rights and the Court of Justice of the European Union to scrutinize different forms of discriminatory treatment By bringing together distinct responses to violence experienced in the context of migration control the book outlines a new framework for their evaluation and determines how rights and protection could better be secured A groundbreaking work that centres the experiences of those marginalized by migration law this is essential reading for anyone interested in the intersection of violence gender and migration
