The Structural Foundations of International Finance Padoan, P.C. Brenton, P.A. Boyd, G.,2003 The principal message of this book is that international financial enterprises must be reoriented towards funding productive activities rather than potentially destabilizing speculation The effects of financial sector operations are addressed with serious warnings that the dangers of speculative destabilization are increasing as regulatory and market discipline gradually weakens The Structural Foundations of International Finance examines the ways in which national economies especially those of industrialized countries are affected by the operations of international financial markets Although these markets provide productive funding there is also much speculative trading in stocks and currencies which can cause booms slumps and hinder recovery The authors advocate entrepreneurial coordination by productive enterprises for balanced and stable growth with reduced risks of financial crises and recessions
