China's Naval Power Yves-Heng Lim, 2016-05-23 The rapid modernization of the Chinese Navy is a well documented reality of the post Cold War world In two decades the People's Liberation Army Navy has evolved from a backward force composed of obsolete platforms into a reasonably modern fleet whose growth is significantly shaking the naval balance in East Asia The rationale behind China's contemporary rise at sea remains however difficult to grasp and few people have tried to see how the current structure of the international system has shaped Chinese choices This book makes sense of Chinese priorities in its naval modernization in a robust offensive realist framework Drawing on Barry Posen's works on sources of military doctrine it argues that the orientation of Beijing's choices concerning its naval forces can essentially be explained by China's position as a potential regional hegemon Yves Heng Lim highlights how a rising state develops naval power to fulfil its security objectives a theoretical perspective that goes farther than the sole Chinese case

Terroir and Other Myths of Winegrowing Mark A. Matthews, 2016-03-15 Matthews brings a scientist's skepticism and scrutiny to widely held ideas and beliefs about viticulture often promulgated by people who have not tried to grow grapes for a living and subjects them to critical examination Is terroir primarily a marketing ploy that obscures our understanding of which environments really produce the best wine Can grapevines that yield a high berry crop generate wines of high quality What does it mean to have vines that are balanced or grapes that are fully mature Do biodynamic practices violate biological principles These and other questions will be addressed in a book that could alternatively be titled in homage to a PUP bestseller On Wine Bullshit Provided by publisher

Armed Conflict and Forcible Displacement Elena Katselli Proukaki, 2018-03-05 This book addresses the involuntary and arbitrary displacement of individuals resulting from armed conflict and gross human rights violations It shows that forcible displacement constitutes a serious violation of international law and of fundamental community interests Armed Conflict and Forcible Displacement provides a critical legal analysis of the contemporary international framework permeating forcible displacement in these circumstances and explores the rights that individuals possess with specific focus on the right not to be displaced and where this fails the right to return home and to receive property restitution In doing so this volume marries together different fields of international law and builds on the case studies of Cyprus Colombia Cambodia and Syria While the case studies considered here are far from exhaustive they are either little explored or present significant challenges due to the magnitude of displacement or contested international jurisprudence Through this analysis the volume exposes some of the legal challenges that individuals encounter in being protected from forcible displacement as well as the legal obstacles that persist in ensuring the return of and the recovery of property by the displaced It will be of interest to those interested in the fields of international law human rights law as well as conflict and war studies

The German Prosecution Service Shawn Marie Boyne, 2013-11-19 Acclaimed as the the most objective prosecutors in the world the German prosecution service has long attracted the attention in the past of comparative law scholars At first glance the institutional position and statutory mandate of German prosecutors indicate that that reputation is well deserved Unfortunately the introduction of charge bargaining has opened the door to criticism that German prosecutors have abandoned their role of objective decision makers Using interview data collected from interviews with German prosecutors themselves as well as quantitative data the book uses the actual voices of German prosecutors to show how real world constraints rather than changes in the law undermine the ability of German prosecutors to objectively seek the truth The book will take readers behind closed doors where prosecutors discuss case decisions and unveil the realities of practice As a result it will critically revise previous studies of German prosecution practices and offer readers a well researched ethnographic analysis of actual German decision making practices and the culture of the prosecution service Unlike prosecutors in America s adversarial system whom critics claim are driven by a conviction mentality and gamesmanship German prosecutors are institutionally positioned to function as at least semi judicial officials dedicated to finding a case s objective truth The book argues that organizational incentives and norms rather than the boundaries of the law determinately shapes how prosecutors investigate and prosecute crime in
