Berube, 2023-05-05 The aim of the book was to produce the most comprehensive examination of a pandemic that has ever been attempted By cataloging the full extent of the Zika pandemic this book will be the most complete history and epistemic contextualization ever attempted to date The work should function as the primary source for students researchers and scholars who need information about the Zika pandemic This book examines the technical literature digital and popular literature and online materials to fully contextualize this event and provide a bona fide record of this event and its implications for the future It is somewhat serendipitous that while this work was underway we are going through another pandemic One of the primary lessons we did not learn by Zika was pandemic events will return repeatedly and we need to learn from each one of them to prepare the planet for the next one Just because Zika seemed to have died out does not make it less important We were lucky that the virus evolved into what seemed to be a less virulent version of itself and the vector mosquitoes were concentrated elsewhere Finally this book represents a tour de force in scholarship involving nearly 4 000 sources of information and does not shy from a detailed examination of the controversies conspiracies and long term consequences when we avoid learning from outbreaks such as Zika *Journal of the American Mosquito Control Association*, 1992 **A Directory of Information Resources in the United States: Biological Sciences** National Referral Center (U.S.), 1972 2230 organizations government agencies research institutes libraries and museums Also covers education recreation and business activities Alphabetical arrangement by names Numbered entries
