Ferguson,Valerie G. Zartarian,1997

Create a Personalized Letters and Activities Kit Mail Business , Easy Art Activities That Spark Super Writing Dea Paoletta Auray,Barbara Mariconda,2000-10 Foster wonderful writing with quick and easy art activities First invite students to create a collage winter mural decorated crown or other simple art project Then use inspiring prompts to guide kids to use their art as a springboard to writing The great writing activities teach elaboration summarization plot character and more **20 Hands-On Activities for Learning Idioms** Michael Gravois,2002-08 We ve let the cat out of the bag Learning to identify and understand idioms is easy and fun with creative activities your students will love Complete with step by step directions and reproducible templates these projects are effective ways to help students understand metaphors explore the origins of common sayings and discover the fun of wordplay Don t save these for a rainy day Book jacket

Montessori-based Activities for Persons with Dementia Cameron J. Camp,1999 Improve your care by improving the

functioning of your clients or residents with Alzheimer's disease Discover how the principles of Montessori education can help people with dementia maintain or improve skills needed in their daily lives With these 41 step by step activities you can enhance the skills used to perform basic tasks such as self feeding preparing simple meals dressing participating in recreational activities and more The secret to success of these activities is that they are open ended so individuals gain a sense of accomplishment at any level of participation intellectually stimulating and meaningful adaptable with suggestions for increasing or lowering the level of difficulty as needed and springboards to many new variations of activities Without doubt Montessori Based Activities for Persons with Dementia was designed with the busy activity professional in mind From brightly colored tabs to spiral binding to clear outlines and attention grabbing callouts this manual is ready to use right out of the package

Recognition of Humans and Their Activities Using Video Rama Chellappa,Amit K. Roy-Chowdhury,S. Kevin Zhou,2022-05-31 The recognition of humans and their activities from video sequences is currently a very active area of research because of its applications in video surveillance design of realistic entertainment systems multimedia communications and medical diagnosis In this lecture we discuss the use of face and gait signatures for human identification and recognition of human activities from video sequences We survey existing work and describe some of the more well known methods in these areas We also describe our own research and outline future possibilities In the area of face recognition we start with the traditional methods for image based analysis and then describe some of the more recent developments related to the use of video sequences 3D models and techniques for representing variations of illumination We note that the main challenge facing researchers in this area is the development of recognition strategies that are robust to changes due to pose illumination disguise and aging Gait recognition is a more recent area of research in video understanding although it has been studied for a long time in psychophysics and kinesiology The goal for video scientists working in this area is to automatically extract the parameters for representation of human gait We describe some of the techniques that have been developed for this purpose most of which are appearance based We also highlight the challenges involved in dealing with changes in viewpoint and propose methods based on image synthesis visual hull and 3D models In the domain of human activity recognition we present an extensive survey of various methods that have been developed in different disciplines like artificial intelligence image processing pattern recognition and computer vision We then outline our method for modeling complex activities using 2D and 3D deformable shape theory The wide application of automatic human identification and activity recognition methods will require the fusion of different modalities like face and gait dealing with the problems of pose and illumination variations and accurate computation of 3D models The last chapter of this lecture deals with these areas of future research
