**Annual Report to the National Assembly for the Financial Year Ended ...** South Africa. Independent Electoral Commission, 2016      *Annual Report Mpumalanga* (South Africa). Department of Education, 2017      **Low-Income Students, Human Development and Higher Education in South Africa** Melanie Walker, Monica McLean, 2022-07-15

This book explores learning outcomes for low income rural and township youth at five South African universities. The book is framed as a contribution to southern and Africa centred scholarship adapting Amartya Sen's capability approach and a framework of key concepts: capabilities, functionings, context, conversion factors, poverty and agency to investigate opportunities and obstacles to achieved student outcomes. This approach allows a reimagining of inclusive learning outcomes to encompass the multi-dimensional value of a university education and a plurality of valued cognitive and non-cognitive outcomes for students from low income backgrounds whose experiences are strongly shaped by hardship. Based on capability theorising and student voices, the book proposes for policy and practice a set of contextual higher education capability domains and corresponding functionings orientated to more justice and more equality for each person to have the opportunities to be and to do what they have reason to value. The book concludes that sufficient material resources are necessary to get into university and flourish while there the benefits of a university education should be rich and multi-dimensional so that they can result in functionings in all areas of life as well as work and future study. The inequalities and exclusion of the labour market and pathways to further study must be addressed by wider economic and social policies for inclusive learning outcomes to be meaningful and that universities ought to be doing more to enable black working class students to participate and succeed. *Low Income Students Human Development and Higher Education in South Africa* makes an original contribution to capability scholarship conceptually in theorising a South based multi-dimensional student well-being higher education matrix and a rich reconceptualisation of learning outcomes as well as empirically by conducting rigorous longitudinal in-depth mixed methods research on students' lives and experiences in higher education in South Africa. The audience for the book includes higher education researchers, international capability scholars, practitioners and policy makers.

**South African Schooling: The Enigma of Inequality** Nic Spaull, Jonathan D. Jansen, 2019-11-05. This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in-depth discussions of literacy, numeracy, teacher development and curriculum change. The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with: Are there different and preferential equilibria we have not yet thought of or explored and if so what are they? In practical terms, how does one get to a more equitable distribution of teachers' resources and learning outcomes? While decidedly local, these questions resonate throughout the developing world. South Africa today is the most unequal country in the world. The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth. This is the

largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

*Discipline in Education* Johan Botha, 2021 This book addresses a perennial challenge to the success of the South African education system namely discipline This volume steers the interrogation of discipline in a new direction reflecting on ways in which recent research can benefit South African schools This includes the need for alternative discipline that will enhance education The scholarly contribution lies in its in depth exploration of the relevance of research findings to South African schools and to the twenty first century socio political environment For the first time scholarly interrogation of the issue of learner discipline in South African schools draws on indigenous knowledge systems Its post colonial and decolonial perspectives offer an ethical and moral compass for behaviour that could contribute to the well being of South African society and other societies similarly afflicted by anti social behaviour The book offers a range of perspectives on the debates on discipline and associated issues and should stimulate future discussions on discipline and indiscipline at a time when South Africa and many other societies engage with the effects of social and political transformation This scholarly book is aimed at academics and researchers The contributors include philosophers moralists corporativists education law specialists curriculum specialists specialists in education and culture advocates of ubuntu and people using meta syntheses of approaches and practices and religious practices such as a Christian ethical moral approach to parental and school discipline They draw on their insights into postcolonialism the impact of indigenous knowledge theories of agency dysfunctionality and school underperformance The book offers an intriguing depiction of opposing views on discipline

**Annual Report** South Africa. Department of Social Development, 2016      **Annual Report** South Africa. Department of Mineral Resources, 2016      **Responsible Research Practice** Norma RA Romm, 2018-04-21 This book

explores ways in which creative research practice can be explicitly and mindfully geared to make a difference to the quality of social and ecological existence It offers a range of examples of how different research methods can be employed and re-tuned with this intention The book suggests that what Romm names active research involves using the research space responsibly to open up new avenues for thinking and acting on the part of those involved in the inquiry and wider stakeholders The book includes a discussion of a range of epistemological ontological methodological and axiological positions or paradigms that can be embraced by inquirers implicitly or explicitly It details the contours of an epistemology where knowing is recognized to be grounded in social relations as a matter of ethics While focusing on discussing the transformative paradigm and attendant view of research ethics it considers to what extent the borders between paradigms can be treated as being permeable in creative and active inquiries Apart from considering options for enhancing responsible research practice during the process of inquiry and reconsidering mixed research designs the book also considers options for responsible theorizing that is inspirational for pursuing goals of social and ecological justice     *Annual Report* South Africa.
