Sketch the graph of f , for $-1 \leq x \leq 5$.

1b. [1 mark]

This function can also be written as $f(x) = (x - p)^2 - 3$.

Write down the value of p .

1c. [4 marks]

The graph of g is obtained by reflecting the graph of f in the x -axis, followed by a translation of $\begin{pmatrix} 0 \\ 6 \end{pmatrix}$.
Show that $g(x) = -x^2 + 4x + 5$.

1d. [3 marks]

The graph of g is obtained by reflecting the graph of f in the x -axis, followed by a translation of $\begin{pmatrix} 0 \\ 6 \end{pmatrix}$.
The graphs of f and g intersect at two points.
Write down the x -coordinates of these two points.

Cancer Evo-Dev, a novel hypothesis derived from studies on hepatitis B virus-induced carcinogenesis Guang-Wen Cao, 2017-10-27 Non resolving inflammation which may be maintained by infection pollution and metabolic stimulants and their interactions with immunogenetic predisposition provides a fertile field for cancer development This is strongly evident in hepatocellular carcinoma Here the framework of a hypothesis called Cancer Evo Dev is presented based on the advances in hepatitis B virus induced hepatocarcinogenesis Several aspects central to this theory are as follows 1 immune imbalance caused by the interaction of immunogenetic

predispositions and hepatitis B virus infection maintains non resolving inflammation 2 active inflammation executants promote mutations in viral and host genomes via disbalancing mutagenic forces including cytidine deaminases and mutation repairing forces including uracil DNA glycosylases thus promoting cancer related somatic mutations and viral mutations 3 a small percentage of the cells whose somatic mutations alter the survival signalling adapt to the inflammatory microenvironment de differentiate via demethylating role of cytidine deaminases and reversely develop into tumor initiating cells TICs 4 under the cultivation of some factors like POSTN from tumor infiltrating fibroblasts and M2 macrophages TICs acquire the stemness cancer stem cells obtain distinct metastatic and drug resistant potentials under the selection pressure from distinct microenvironments 5 glycolysis persistence in the presence of oxygen provides essential energy for cell survival and the raw material for DNA synthesis Thus cancer development is characterized by an evolutionary process of mutation selection adaptation The framework of Cancer Evo Dev can be verified in other cancers Cancer Evo Dev lays theoretical foundation for understanding the mechanisms by which inflammation promotes cancer development and it also plays a role in specific prophylaxis prediction and targeted treatment of cancers

Cardio-Renal Clinical Challenges David Goldsmith, Adrian Covic, Jonas Spaak, 2014-11-12 In modern medicine the aging population is prone to many simultaneous cardiovascular CV risk factors which often produce co incident pathology Nowhere is this more obvious than in the interaction between Chronic Kidney Disease CKD Diabetes and diverse CV diseases CVD This is a complex and challenging area as the presence of CKD diabetes promotes CVD while also complicating its treatment The emergence of CKD as a public health priority is one of the most challenging problems of modern medicine It is now solidly established that renal dysfunction portends a high risk for cardiovascular disease Cardiovascular diseases remains the main cause of death in western societies and the amplification of the death risk conveyed by coexisting CKD even though still poorly understood appears considerable The bidirectional link that associates renal and cardiovascular diseases the high risk of the death signalled by their coexistence and the considerable epidemiological burden imposed by this link is at the basis of the emergence of a new discipline aiming at making the borders between nephrology and cardiovascular medicine even more permeable than before The term Cardio Renal Syndrome was coined around 5 years ago to try to formalize this link and act as a stimulus to interaction between clinical teams researchers and others to achieve better management and outcomes for all This book takes clinical presentations and clinical problems as its base and then discuss the evidence for best management of common clinical problems as well as the reasons for the complex interplay between the cardiac and renal systems Moreover it addresses the issue of organizing healthcare to maximize the opportunities for prevention and best

Commonwealth Universities Yearbook Association of Commonwealth Universities, London, 1985, 1985 **Fuzzy Differential Equations and Applications for Engineers and Scientists** S. Chakraverty, Smita Tapaswini, Diptiranjan Behera, 2016-11-25 Differential equations play a vital role in the modeling of physical and engineering problems such as those in solid and fluid mechanics viscoelasticity biology physics and many other areas In general the parameters variables and initial conditions within a model are considered as being defined exactly In reality there may be only vague imprecise or incomplete information about the variables and parameters available This can result from errors in measurement observation or experimental data application of different operating conditions or maintenance induced errors To overcome uncertainties or lack of precision one can use a fuzzy environment in parameters variables and initial conditions in place of exact fixed ones by turning general differential equations into Fuzzy Differential Equations FDEs In real applications it can be complicated to obtain exact solution of fuzzy differential equations due to complexities in fuzzy arithmetic creating the need for use of reliable and efficient numerical techniques in the solution of fuzzy differential equations These include fuzzy ordinary and partial fuzzy linear and nonlinear and fuzzy arbitrary order differential equations This unique work provides a new direction for the reader in the use of basic concepts of fuzzy differential equations solutions and its applications It can serve as an essential reference work for students scholars practitioners researchers and academicians in engineering and

science who need to model uncertain physical problems *The Chemistry of Hypervalent Halogen Compounds, 2 Volume Set* Berit Olofsson, Ilan Marek, Zvi Rappoport, 2019-04-29 Für das Verständnis der organischen Chemie muss man wissen, worum es sich bei funktionalen Gruppen handelt. Dieses Fachbuch steht ganz in der Tradition der Reihe Patai's Chemistry of Functional Groups. Jeder Band deckt sämtliche Aspekte funktionaler Gruppen ab und behandelt dabei theoretische, analytische, synthetische, biologische Aspekte sowie Belange der Industrie. Hypervalente Halogenverbindungen, insbesondere Jodverbindungen, sind herausragende und selektive Oxidantien für eine Vielzahl funktionaler Gruppen. Die elektrophilen Eigenschaften dieser Reagenzien können auch für die Einführung anderer Funktionalisierungen verwendet werden. Dieser Band ist der erste in der Reihe, der die Eigenschaften und das chemische Verhalten von hypervalentem Jod und Brom, deren Einsatz in der organischen Synthese sowie deren industrielle Anwendung untersucht. Wie bei allen neuen Bänden werden die Kapitel zunächst online in Patai's Chemistry of Functional Groups veröffentlicht. Wenn ein Band online vervollständigt ist, erfolgt die Herausgabe als Printversion. Die Printfassung entspricht der Qualität, die man von der Patai-Reihe kennt, und bietet auch einen umfassenden Index.
