

WEATHER INSTRUMENTS

LESSON & PROJECT

DESIGN A WEATHER INSTRUMENT

Goal: Design a weather instrument that measures at least two different types of weather phenomena such as wind speed, air pressure, temperature, wind direction, wind speed, humidity, or air pressure.

You will need to design, build, test, refine, and present your creation.

As you work, you will need to document your work and the process. You will draw plans and diagrams and, where possible, take pictures of your progress.

Once your instrument is built, you will display it for at least a week in a public place.

You will need to present about the work and how you made it to the class.

Finally, you will share how you did with the class.

INDIVIDUAL PLANNING SHEET PRESENTATION

Now you will prepare your presentation.

You need to make a presentation that shows you building your device. You will also need a picture that shows the finished product. Be sure to include your name and the name of your instrument.

You will need to write about the process you took in planning, designing, building, testing, and evaluating your instrument.
