**The Troika of Adult Learners, Lifelong Learning, and Mathematics** Katherine Safford-Ramus, Pradeep Kumar Misra, Terry Maguire, 2016-05-02 This book presents a synopsis of six emerging themes in adult mathematics numeracy and a critical discussion of recent developments in terms of policies, provisions, and the emerging challenges, paradoxes, and tensions. It also offers an extensive review of the literature on adult mathematics education. Why do adults want to learn mathematics? Did they enjoy mathematics at school so much that they want to continue? NO. Most of these adults have to learn mathematics because it is part of a formal qualification they need because their job demands the ability to apply mathematics or because they need basic numeracy in their daily lives. Lastly, the authors discuss five potential strategies to promote lifelong learning of mathematics among adult learners.

**The Ends Game** Marco Bertini, Oded Koenigsberg, 2022-01-11 How companies like Dollar Shave Club and Rent the Runway rewrite the rules of commerce by pursuing outcomes rather than products and services. The seventh book in the Management on the Cutting Edge series for business professionals looking to do deliver excellent customer service while maximizing value and revenue. Would you rather pay for healthcare or for better health? For school or education? For groceries or nutrition? A car or transportation? A theater performance or entertainment? In *The Ends Game*, Marco Bertini and Oded Koenigsberg describe how some firms are rewriting the rules of commerce instead of selling the means, their products and services; they adopt innovative revenue models to pursue ends, actual outcomes. They examine companies such as Dollar Shave Club, Rent the Runway, Netflix, Spotify, Michelin, Adobe, Pearson, and many more. They show that paying by the pill, semester food item, vehicle, or show does not necessarily reflect the value that customers actually derive from their purchases. Revenue models anchored on the ownership of products they argue are patently inferior.
