played by Japanese popular culture in European contexts Marco Pellitteri shows that the contact between Japanese pop culture and European youth publics occurred during two phases By use of metaphor the author calls them the Dragon and the Dazzle The first took place between 1975 and 1995 the second from 1996 to today They can be distinguished by the modalities of circulation and consumption re elaboration of Japanese themes and products in the most receptive countries Italy France Spain Germany and across the ocean the United States During these two phases several themes have been perceived in Europe as rising from Japan s social and mediatic systems Among them this book examines the most apparent from a European point of view the author names them machine infant and mutation visible mostly through manga anime videogames and toys Together with France Italy is the European country that in this respect has had the most central role There Japanese imagination has been acknowledged not only by young people but also by politicians television programmers the general public educators comics and cartoons authors The growing influence of Japanese pop culture connected to the appreciation of its manga anime toys and videogames also urges political and mediologic questions linked to the identities of Japan as they are understood wrongly or rightly in Europe and the West and to the increasingly important role of Japan in international relations Back cover
