

1-1-7. Level V - Component Maintenance Training

TARGET POPULATION

Airline engineers, technicians, inspectors, and select maintenance personnel supporting maintenance and/or repair shop operations

COURSE OBJECTIVES

LEVEL 1 THEORY TRAINING: Upon completion of Level 1 Component Maintenance Theory Training, the student will be able to:

1. Briefly explain the component's installation on the aircraft, its integration with other airplane systems or components, how the component affects aircraft operation, use of RTTU or other maintenance tools on the airplane, component power, inputs, and outputs, and all safety, special handling, or unique component requirements.
2. Read and interpret ACFA, and Level 1 - 4 airplane maintenance and training information applicable to the component.
3. Understand and explain component construction and theory of operation to the applicable component maintenance level.
4. Read and interpret applicable Component Maintenance Manual, General Equipment Manual, supporting the shop test stand, and/or other approved component maintenance data, to the applicable component maintenance level.

NOTE: While the Objectives 1 and 2 above are not mandatory for shop technicians, such skills and knowledge are frequently helpful in understanding flight crew write-ups and knowing the failure possibilities, and therefore recommended for the shop technicians, at least in abbreviated form. The student is encouraged to reinforce this training with appropriate Operational/Low Maintenance CRT or the Mock-up based practical training where available.

Where there is considerable airline interest in the on-aircraft operational/maintenance entry for a component, for which the training is extensive, the supplier is encouraged to offer this training as a separate operational/maintenance theory course.

Shop Technicians and Inspectors

LEVEL 5 CRT (ON-THE-JOB) TRAINING: Upon completion of Level 5 Component Maintenance CRT Training, the student will be able to, at the applicable shop maintenance level:

1. Understand component physical construction, special handling requirements, safety, disassembly and assembly procedures, and shipping requirements.
2. Read and interpret applicable Component Maintenance Manual, General Equipment Manual, and/or other approved component maintenance data used in component servicing.
3. Perform component inspection, test, fault isolation, repair, overhaul, and return to service procedures using sufficient
