History and Development of Airline Cabin Safety

Fons Schaefers, 2025-03-19 History and Development of Airline Cabin Safety offers an understanding of how cabin safety evolved over time. It covers six key areas: impact protection, fire protection, egress potential, life support equipment, information and instructions, and cabin professionals. Exploring the organic choreography of accidents, research, technological progress, rulemaking, and industry response, the book clarifies that cabin safety enhancements were not well planned but came incidentally and step by step. Each step was triggered by accidents with survivability issues, except in one area where a proactive approach proved to be first time right: oxygen for passengers. The step improvements, which mainly occurred in the U.S., concentrated in three waves centered around 1950, 1970, and 1985 respectively. The book will interest aviation regulators, aircraft manufacturers, and operators, cabin safety professionals, including cabin crew, and accident investigation professionals.

On-board Intellectual Aircraft Crew

Support Systems Mikhail Krasilshchikov, 2020-01-28 The human factor remains one of the most important problems affecting

flight safety On the other hand however the complexity of onboard control and navigational systems grows constantly As such a great deal of research has gone into creating onboard systems which would interact with pilots and assist them in order to avoid flight accidents This book provides unique insights into the building of such a system using the so called confidential approach for the analysis and synthesis of the dynamical systems operating under the influence of various uncontrollable factors As a result the book details an intellectual expert system able to support the crew during standard flight modes This system is able to detect a hazard in real time mode identify its source and provide recommendations for the pilots The book also investigates the confidence model offering formulas and examples of expert systems functioning
