Lexicalization and Language Change Laurel J. Brinton, Elizabeth Closs Traugott, 2005-10-27 Lexicalization a process of language change has been conceptualized in a variety of ways Broadly defined as the adoption of concepts into the lexicon it has been viewed by syntacticians as the reverse process of grammaticalization by morphologists as a routine process of word formation and by semanticists as the development of concrete meanings In this up to date survey Laurel Brinton and Elizabeth Traugott examine the various conceptualizations of lexicalization that have been presented in the literature In light of contemporary work on grammaticalization they then propose a new unified model of lexicalization and grammaticalization Their approach is illustrated with a variety of case studies from the history of English including present participles multi word verbs adverbs and discourse markers as well as some examples from other Indo European languages The first review of the various approaches to lexicalization this book will be invaluable to students and scholars of historical linguistics and language change **Metonymy and Metaphor in Grammar** Klaus-Uwe Panther, Linda L. Thornburg, Antonio

Barcelona, 2009 with the advent of Cognitive Linguistics metonymy and metaphor are now recognized as being not only ornamental rhetorical tropes but fundamental figures of thought that shape to a considerable extent the conceptual structure of languages The present volume goes even beyond this insight to propose that grammar itself is metonymical in nature Langacker and that conceptual metonymy and metaphor leave their imprints on lexicogrammatical structure **A Grammar of Dazaga** Josiah Walters, 2016-08-29 In A Grammar of Dazaga Josiah Walters provides the first detailed description and analysis of Dazaga a Saharan language in the past half century Based on a review of previous work on

Encyclopaedia of German diatheses Michael Cysouw, 2023-03-14 Diathesis valency alternation is a sentence structure that reshapes the roles of a verb The prototypical example of such a diathesis is the well known passive However there are very many other such role remappings like antipassives applicatives causatives etc This book presents an encyclopaedic survey of diathesis in German The objective is to catalogue all diatheses that exist in this language Currently almost 250 different German diatheses are described in this book some highly productive some only attested for a handful of verbs The main goal of this book is to present this wealth of grammatical possibility in a unified manner while at the same time attempting to classify and organise this diversity A summary of the about 80 most prominent diatheses is also provided including many newly minted German names because most these diatheses did not have a German name yet It might come as a surprise that there are so many different diatheses in German but my impression is that in this respect German is no exception among the world s languages I expect that all languages have a similar abundance of different ways in which to construe a sentence around a lexical predicate In a sense a diathesis allows for the expression of a distinct perspective on the event described something that is arguably a common desire of any language user Except for diathesis this book also aims to completely catalogue its counterpart epithesis An epithesis is a derived sentence structure in which the marking of the verb roles remains constant Basically these are the grammaticalised constructions expressing tense aspect mood evidentiality in German The list of major epitheses is also quite long about 40 constructions but it is quite a bit smaller than the list of major diatheses about 80 constructions This indicates that from a purely grammatical perspective diathesis grammatical voice is about a two times more elaborate topic than epithesis tense aspect mood marking in German
