The Skeptical Professional's Guide to Psychiatry Charles E. Dean, 2020-11-22 This text critically examines the shortcomings of psychiatry the flawed development of the diagnostic system including the DSM 5 and the failure to advance the effectiveness of antipsychotics and antidepressants Starting with an overview of the evolution of psychiatry Dean explores the creation use and misuse of medications a process largely driven by drug companies Other chapters describe the benefits and risks of medications the problems associated with rational prescribing and the embrace of so called novel therapies including hallucinogenic drugs and opioids Chapters end with a set of clinical notes that provide specific recommendations to clinicians families patients and other providers emphasizing the risks and benefits of treatment with medications but also stressing alternative approaches This book will challenge clinicians to think critically about the DSM 5 and the current systems of diagnosis and treatment of mental illnesses in the hopes of ultimately improving the lives of people with mental illnesses

Electro-technology, 1961 **QST.**, 1961 Protein NMR Techniques A. Kristina Downing, 2008-02-03 When I was asked to edit the second edition of Protein NMR Techniques my first thought was that the time was ripe for a new edition The past several years have seen a surge in the development of novel methods that are truly revolutionizing our ability to characterize biological macromolecules in terms of speed accuracy and size limitations I was particularly excited at the prospect of making these techniques accessible to all NMR labs and for the opportunity to ask the experts to divulge their hints and tips and to write practically about the methods I commissioned 19 chapters with wide scope for Protein NMR Techniques and the volume has been organized with numerous themes in mind Chapters 1 and 2 deal with recombinant protein expression using two organisms E coli and P pastoris that can produce high yields of isotopically labeled protein at a reasonable cost Staying with the idea of isotopic labeling Chapter 3 describes methods for perdeuteration and site specific protonation and is the first of several chapters in the book that is relevant to studies of higher molecular weight systems A different but equally powerful method that uses molecular biology to edit the spectrum of a large molecule using segmental labeling is presented in Chapter 4 Having successfully produced a high molecular weight target for study the next logical step is data acquisition Hence the final chapter on this theme Chapter 5 describes TROSY methods for structural studies
