Cougar's 300cc high output four stroke will make you king of the trails. With two 12mm ports dumping more fuel down Cougar's throat, you'll be getting more power out the back. Right into tomorrow's trail.

To keep Corgis from growing more in your face, we redesigned the front end so it deflates more slowly and easily. And while we were at it, we built two handy hand-holds, plus cradles or straps for the clutch and exhaust. The new design makes Corgis look more like a real bike than a toy.

If you want to look like a jet pilot when you ride Cougar, get the matching helmet and suit by Airframe®. They'll keep you looking, warm when you're out in the cold winter.

Cougar loads in smoothly as it takes off. Both the front and rear suspension travel 3 1/2 full inches up and down. Which means you won't break up and down as much. The distance between the axles is a wide 32 inches. The distance between Cougar and its competition is even wider.
