Life Cycle Assessment (LCA) of Environmental and Energy Systems Fabrizio Passarini, Luca Ciacci, 2021-04-01 The transition towards renewable energy sources and green technologies for energy generation and storage is expected to mitigate the climate emergency in the coming years However in many cases this progress has been hampered by our dependency on critical materials or other resources that are often processed at high environmental burdens Yet many studies have shown that environmental and energy issues are strictly interconnected and require a comprehensive understanding of resource management strategies and their implications Life cycle assessment LCA is among the most inclusive analytical techniques to analyze sustainability benefits and trade offs within complex systems and in this Special Issue it is applied to assess the mutual influences of environmental and energy dimensions The selection of original articles

reviews and case studies addressed covers some of the main driving applications for energy requirements and greenhouse gas emissions including power generation bioenergy biorefinery building and transportation An insightful perspective on the current topics and technologies and emerging research needs is provided Alone or in combination with integrative methodologies LCA can be of pivotal importance and constitute the scientific foundation on which a full system understanding can be reached

Container Nursery Production and Business Management Manual JULIE P. NEWMAN, 2014-06-10 This colorful manual includes research based information on all aspects of production of landscape plants in commercial nurseries Written primarily for wholesale nursery growers and propagators a wide range of those involved in the nursery industry will find this a valuable reference Twenty chapters in five broad sections cover topics from nursery site selection to crop production water management to business and labor management along with pest weed and disease management This easy to use manual contains the photos tables and clearly written text that make UC ANR s publications the go to references industry professionals rely upon Chapters include Nursery Site Selection and Development Plant Growing Structures Mechanization and Automation Soils and Container Media Nutrition and Fertilization Irrigation Management Practices Controlling Runoff and Recycling Water Nutrients and Waste Plant Propagation Controlling Plant Growth Diagnosing Plant Problems Integrated Pest Management Plant Diseases Insects Mites and Other Invertebrate Pests Integrated Weed Management Vertebrate Pest Management Invasive Pests Business Management Marketing Considerations Increasing Labor Productivity

Climate Change, Energy, Sustainability and Pavements Kasthurirangan Gopalakrishnan, Wynand JvdM Steyn, John Harvey, 2014-09-25 Climate change energy production and consumption and the need to improve the sustainability of all aspects of human activity are key inter related issues for which solutions must be found and implemented quickly and efficiently To be successfully implemented solutions must recognize the rapidly changing socio techno political environment and multi dimensional constraints presented by today s interconnected world As part of this global effort considerations of climate change impacts energy demands and incorporation of sustainability concepts have increasing importance in the design construction and maintenance of highway and airport pavement systems To prepare the human capacity to develop and implement these solutions many educators policy makers and practitioners have stressed the paramount importance of formally incorporating sustainability concepts in the civil engineering curriculum to educate and train future civil engineers well equipped to address our current and future sustainability challenges This book will prove a valuable resource in the hands of researchers educators and future engineering leaders most of whom will be working in multidisciplinary environments to address a host of next generation sustainable transportation infrastructure challenges This book proposes a broad detailed overview of the actual scientific knowledge about pavements linked to climate change energy and sustainability at the international level in an original multidimensional multi effects way By the end the reader will be aware of the whole global issues to care about for various pavement technical features around the world among which the

implications of modelling including data collection challenging resources saving and infrastructures services optimisation
