Perils of Plenty Jonathan N. Markowitz, 2020 Among scholars who focus on the politics of natural resources conventional wisdom asserts that resource scarce states have the strongest interest in securing control over resources Counterintuitively however in *Perils of Plenty* Jonathan N Markowitz finds that the opposite is true In actuality what states make influences what they want to take Specifically Markowitz argues that the more economically dependent states are on resource extraction rents for income the stronger their preferences will be to secure control over resources He tests the theory with a set of case studies that analyze how states reacted to the 2007 exogenous climate shock that exposed energy resources in the Arctic Given the dangerous potential for conflict escalation in the Middle East and the South China Sea and the continued shrinkage of the polar ice cap this book speaks to a genuinely important development in world politics that will have implications for understanding the political effects of climate change for many years to come

Soil Hydrology for a Sustainable Land Management Simone Di Prima, Mirko Castellini, Artemi Cerdà, Jesús Rodrigo-Comino, 2020-12-10 Soil hydrology determines the water soil plant interactions in the Earth's system because porous medium acts as an interface within the atmosphere and lithosphere regulates main processes such as runoff discharge aquifer recharge movement of water and solutes into the soil and ultimately the amount of water retained and available for plants growth Soil hydrology can be strongly affected by land management Therefore investigations aimed at assessing the impact of land management changes on soil hydrology are necessary especially to optimize water resources This Special Issue collects 12 original contributions addressing the state of the art advances in soil hydrology for sustainable land management These contributions cover a wide range of topics including i the effects of land use change ii water use efficiency iii erosion risk iv solute transport and v new methods and devices for improved characterization of soil physical and hydraulic properties They include both field and laboratory experiments as well as modelling studies Different spatial scales i.e. from field to regional scales and a wide range of geographic regions are also covered The collection of these manuscripts presented in this Special Issue provides a relevant knowledge contribution for effective saving water resources and sustainable land management

Pathways for Peace United Nations, World Bank, 2018-04-13 Violent conflicts today are complex and increasingly protracted involving more nonstate groups and regional and international actors It is estimated that by 2030 the horizon set by the international community for achieving the Sustainable Development Goals more than half of the world's poor will be living in countries affected by high levels of violence Information and communication technology population movements and climate change are also creating shared risks that must be managed at both national and international levels Pathways for Peace is a joint United Nations World Bank Group study that originates from the conviction that the international community's attention must urgently be refocused on prevention A scaled up system for preventive action would save between US 5 billion and US 70

billion per year which could be reinvested in reducing poverty and improving the well being of populations. The study aims to improve the way in which domestic development processes interact with security diplomacy mediation and other efforts to prevent conflicts from becoming violent. It stresses the importance of grievances related to exclusion from access to power natural resources security and justice for example that are at the root of many violent conflicts today. Based on a review of cases in which prevention has been successful the study makes recommendations for countries facing emerging risks of violent conflict as well as for the international community. Development policies and programs must be a core part of preventive efforts when risks are high or building up inclusive solutions through dialogue adapted macroeconomic policies institutional reform and redistributive policies are required. Inclusion is key and preventive action needs to adopt a more people centered approach that includes mainstreaming citizen engagement. Enhancing the participation of women and youth in decision making is fundamental to sustaining peace as well as long term policies to address the aspirations of women and young people.

Enlightenment Now Steven Pinker, 2018-02-13 INSTANT NEW YORK TIMES BESTSELLER A NEW YORK TIMES NOTABLE BOOK OF 2018 ONE OF THE ECONOMIST'S BOOKS OF THE YEAR My new favorite book of all time Bill Gates If you think the world is coming to an end think again people are living longer healthier freer and happier lives and while our problems are formidable the solutions lie in the Enlightenment ideal of using reason and science. By the author of the new book *Rationality* Is the world really falling apart? Is the ideal of progress obsolete? In this elegant assessment of the human condition in the third millennium cognitive scientist and public intellectual Steven Pinker urges us to step back from the gory headlines and prophecies of doom which play to our psychological biases. Instead follow the data. In seventy five jaw dropping graphs Pinker shows that life health prosperity safety peace knowledge and happiness

are on the rise not just in the West but worldwide This progress is not the result of some cosmic force It is a gift of the Enlightenment the conviction that reason and science can enhance human flourishing Far from being a naive hope the Enlightenment we now know has worked But more than ever it needs a vigorous defense The Enlightenment project swims against currents of human nature tribalism authoritarianism demonization magical thinking which demagogues are all too willing to exploit Many commentators committed to political religious or romantic ideologies fight a rearguard action against it The result is a corrosive fatalism and a willingness to wreck the precious institutions of liberal democracy and global cooperation With intellectual depth and literary flair Enlightenment Now makes the case for reason science and humanism the ideals we need to confront our problems and continue our progress
