Around the Roman Table Patrick Faas, 2013-03-28 A quirky and unusual historical cookery book already a bestseller in Europe Packed with fascinating anecdotes and richly illustrated with witty quotes from classical authors *Around the Roman Table* is a mouth watering ride through the food of the ancient world and as a recipe book a step back in time But it is not just the absence of gas fired hobs and microwaves which make this such a unique experience America had yet to be discovered hence ingredients such as potatoes tomatoes red peppers and peanuts could not grace the Roman table This lack of the staples of the European diet was more than made up for by Roman appetite for foodstuffs we would scarcely feed our dogs Fish eyes pigs ears wombs intestines and brains were all served usually dressed in fiery pepper based sauces Not all the recipes resort to such unusual fare and over 150 are reproduced here especially adapted to allow modern cooks to revive ancient dishes in their own kitchens

Food Provisions for Ancient Rome Paul James, 2020-11-29 This book defines the processes used for delivering a range of food items to the city of Rome and its hinterland from the first century AD using modern supply chain modelling techniques

The subject matter delves into the wider supply of goods such as wood and building products to add further perspective to the breadth of the system managed by the Roman administration to ensure supply and political stability. It assesses the impact of strategic changes such as the introduction of water powered milling technology and restructuring of the *annona* in this period as well as administrative reforms. Evidence from ancient sources both literary and epigraphic along with relevant archaeological comparative evidence is used to develop a detailed supply model including the mapping of warehouse management systems, port and river traffic, coordination, quality control mechanisms and administrative structures. Unlike other contemporary studies, this model takes into consideration supply chain losses to correct the erroneous assumption that supply is equal to consumption. A product flow map from the source of supply to the consumer details the labour, equipment and infrastructure required at each stage, painting a graphic picture of just what an achievement it was for the administration to have maintained such a complex system over this long time period. *Food Provisions for Ancient Rome* provides an in depth exploration of this topic that will be of interest to anyone working on the city of Rome under the empire as well as those interested in imperial administration and logistics.

On Love and Virtue: Theological Essays Michael S. Sherwin, 2018-12-01. What does it mean to love? What are the traits of character that support love's activity? How does the economy of grace, the mission of Christ and the action of the Holy Spirit elevate and transform human love, virtue and the desire for happiness? In *On Love and Virtue: Theological Essays*, the eminent Dominican theologian Michael Sherwin considers how the Catholic tradition has addressed these questions. Fr. Sherwin places this tradition in dialogue with contemporary questions. Taking St. Thomas Aquinas as his primary guide, Fr. Sherwin reads St. Thomas in light of his biblical and patristic sources, especially St. Augustine, and engages contemporary developments in philosophy in order to deepen our understanding of how grace both heals and elevates human nature. Along the way, Fr. Sherwin considers the vocation of the theologian and the biblical and patristic understanding of the Christian call to moral apprenticeship and friendship with God.

Tome 3: Remedies. Pharmacy, Drugs, Archaeology, Tradition Steven M. Oberhelman, 2025-07-21. This three volume set of essays is dedicated to Alain Touwaide, known for his far reaching investigations in fields such as ancient medicine, botany, pharmacy, texts and manuscripts, the classical tradition, translation, the history of science, ethnopharmacology and plant therapies. The essays, penned by 80 international scholars and researchers and written in six languages, are grouped into three broad categories: Manuscripts, Plants and Remedies, to reflect Alain's main areas of research. Each category is broken into subgroups such as manuscripts, texts and science, botany, gardens, materia medica, pharmacy, drugs, archaeology, medical traditions and continuity of scientific knowledge in the East and West. The papers reach across many fields of scholarship, science and medicine and are necessarily and fundamentally trans disciplinary, trans chronological and trans geographic. These volumes are not so much a *Festschrift* as an approach to Alain's work through many disciplines and methods, a discussion of the current status of each field and an opening into new perspectives.
