**The Future of Post-human Space-time** Peter Baofu,2006 Contrary to the conventional wisdom held by many in much of human history in this book Peter Baofu here proposes what he calls the perspectival theory of space time According to this theory there are multiple perspectives of space and time in society culture the mind and nature all of which are subject to the regression progression principle in existential dialectics These perspectives exist in society culture the mind and nature with good reasons being subject to the symmetry asymmetry principle in existential dialectics and with some being more successful and hegemonic dominant than others Furthermore and more importantly in the long haul space and time as humans have known them will end and will eventually be altered by post humans in different forms be they here in this universe or in multiverses subject to the change constancy principle in existential dialectics *The Physics and Metaphysics of Transubstantiation* Mark P. Fusco,2023-08-18 In this book Mark P Fusco offers a historical philosophical and theological review and appraisal of current research into quantum post modern atheistic mathematical and philosophical theories that engage our interpretation of Hans Urs von Balthasar and Ferdinand Ulrich s accounts of Ur Kenosis This cross disciplinary approach inspires a new speculative metaphysical theory based on the representation of being as a holo somatic ontology Holocryptic metaphysics gives us a novel interpretation of transubstantiation as it is founded on the findings of quantum mechanical theory The quantum object and black hole s properties present a new way to explain physical matter based on its holographic identity This scientific theory for representing physical matter s identity is recognized for example in the symmetry existing between a subatomic particle and its orbital shell a single particle s identity in relationship to its thermodynamic system Hawking radiation and black hole entropy Further the properties of quantum non locality and teleportation signpost a new way to understand the Eternal Logos relationship to Jesus Christ and the Eucharist

**The Elusive Synthesis: Aesthetics and Science** A.I. Tauber, 2012-12-06 The tension between art and science may be traced back to the Greeks What became natural philosophy and later science has traditionally been posed as a fundamental alternative to poetry and art It is a theme that has commanded central attention in Western thought as it captures the ancient conflict of Apollo and Dionysus over what deserves to order our thought and serve as the aspiration of our cultural efforts The modern schism between art and science was again clearly articulated in the Romantic period and seemingly grew to a crescendo fifty years ago as a result of the debate concerning atomic power The discussion has not abated in the physical sciences and in fact has dramatically expanded most prominently into the domains of ecology and medicine Issues concerning the role of science in modern society although heavily political must be regarded at heart as deeply embedded in our cultural values Although each generation addresses them anew the philosophical problems which lay at the foundation of these fundamental concerns always appear fresh and difficult This anthology of original essays considers how science might have a greater commonality with art than was perhaps realized in a more positivist era The contributors are concerned with how the aesthetic participates in science both as a factor in constructing theory and influencing practice The collection is thus no less than a spectrum of how Beauty and Science might be regarded through the same prism
