Art Forgery The History Of A Modern Obsession:

Art Forgery Thierry Lenain, 2012-01-15 With the recent advent of technologies that make detecting art forgeries easier the art world has become increasingly obsessed with verifying and ensuring artistic authenticity In this unique history Thierry Lenain examines the genealogy of faking and interrogates the anxious often neurotic reactions triggered in the modern art world by these clever frauds Lenain begins his history in the Middle Ages when the issue of false relics and miracles often arose But during this time if a relic gave rise to a cult it would be considered as genuine even if it obviously had been forged In the Renaissance forgery was initially hailed as a true artistic feat Even Michelangelo the most revered artist of the time copied drawings by other masters many of which were lent to him by unsuspecting collectors Michelangelo would keep the originals himself and return the copies in their place As Lenain shows authenticity as we think of it is a purely modern concept And the recent innovations in scientific attribution archaeology graphology medical science and criminology have all contributed to making forgery more detectable and thus more compelling and essential to detect He also analyzes the work of master forgers like Eric Hebborn Thomas Keating and Han van Meegeren in order to describe how pieces baffled the art world Ultimately Lenain argues that the science of accurately deciphering an individual artist's unique characteristics has reached a level of forensic sophistication matched only by the forger's skill and the art world's paranoia

Italian Forgers Carol Helstosky, 2024-05-15 Italian Forgers takes an unorthodox approach to the fascinating topic of art forgery focusing not on art forgery per se but on the major forgery scandals that shifted the Italian art market in response to constant and often intense demand for Italian objects By focusing on power dynamics that both precipitated forgery scandals and forged Italian cultural identities this book connects the debates and discussions about three well known Italian forgers Giovanni Bastianini Icilio Joni and Alceo Dossena to anchor and investigate the mechanics of the Italian art market from unification through the fascist era Carol Helstosky examines foreign accounts of transactions and Italian writings about the art market The actions and words of Italian dealers illustrate how the Italian art and antiquities market was an undeniably modern industry on par with tourism in terms of its contribution to the Italian economy and to understandings of Italian identity These accounts also reveal how dealers artists go between guides and restorers worked to not only meet the intense demand for Italian products but also to develop highly sophisticated business practices to maintain

financial stability and respond to shifts in demand consciously but not always conscientiously Italian Forgers weaves a compelling narrative about the history of Italian identity forgery and the value of the past As a result Helstosky brings historical perspective to the study of art forgery and art fraud She reveals how historical circumstances and structural imbalances of cultural power shaped the market for art and antiquities and amplified incidents of art deception and forgery scandals

Forgery and Memory at the End of the First Millennium Levi Roach, 2022-08-09 An in depth exploration of documentary forgery at the turn of the first millennium Forgery and Memory at the End of the First Millennium takes a fresh look at documentary forgery and historical memory in the Middle Ages In the tenth and eleventh centuries religious houses across Europe began falsifying texts to improve local documentary records on an unprecedented scale As Levi Roach illustrates the

resulting wave of forgery signaled major shifts in society and political culture shifts which would lay the foundations for the European ancien régime. Spanning documentary traditions across France, England, Germany, and northern Italy, Roach examines five sets of falsified texts to demonstrate how forged records produced in this period gave voice to new collective identities within and beyond the Church. Above all, he indicates how this fad for falsification points to new attitudes toward past and present, a developing fascination with the signs of antiquity. These conclusions revise traditional master narratives about the development of antiquarianism in the modern era, showing that medieval forgers were every bit as sophisticated as their Renaissance successors. Medieval forgers were simply interested in different subjects: the history of the Church and their local realms rather than the literary world of classical antiquity. A comparative history of falsified records at a crucial turning point in the Middle Ages, *Forgery and Memory at the End of the First Millennium* offers valuable insights into how institutions and individuals rewrote and reimagined the past.

Art Markets and Digital Histories

Claartje Rasterhoff, Sandra van Ginhoven, 2020-03-16. This Special Issue of *Arts* investigates the use of digital methods in the study of art markets and their histories. As historical and contemporary data is rapidly becoming more available and digital technologies are becoming integral to research in the humanities and social sciences, we sought to bring together contributions that reflect on the different strategies that art market scholars employ to navigate and negotiate digital techniques and resources. The essays in this issue cover a wide range of topics and research questions. Taken together, the essays offer a reflection on what takes to research art markets, which includes addressing difficult topics such as the nature of the research questions and the data available to us, and the conceptual aspects of art markets in order to define and operationalize variables and to interpret visual and statistical patterns for scholarship. In our view, this discussion is enriched when also taking into account how to use shared or interoperable ontologies and vocabularies to define concepts and relationships that facilitate the use and exchange of linked open data for cultural heritage and historical research.

Forged

Jonathon Keats, 2013. According to Vasari, the young Michelangelo often borrowed drawings of past masters, which he copied, returning his imitations to the owners and keeping originals. Half a millennium later, Andy Warhol made a game of forging the Mona Lisa, questioning the entire concept of originality. *Forged* explores art forgery from ancient times to the present. In chapters combining lively biography with insightful art criticism, Jonathon Keats profiles individual art forgers and connects their stories to broader themes about the role of forgeries in society. From the Renaissance master Andrea del Sarto, who faked a Raphael masterpiece at the request of his Medici patrons, to the Vermeer counterfeiter Han van Meegeren, who duped the avaricious Hermann Göring, to the frustrated British artist Eric Hebborn, who began forging to expose the ignorance of experts, art forgers have challenged legitimate art in their own time, breaching accepted practices and upsetting the status quo. They have also provocatively confronted many of the present-day cultural anxieties that are major themes in the arts. Keats uncovers what forgeries and our reactions to them reveal about changing conceptions of creativity, identity, and authorship.

integrity authenticity success and how we assign value to works of art The book concludes by looking at how artists today have appropriated many aspects of forgery through such practices as street art stenciling and share and share alike licensing and how these open source copyleft strategies have the potential to make legitimate art meaningful again Forgery has been much discussed and decried as a crime Forged is the first book to assess great forgeries as high art in their own right

[Images Became Art](#) Oleg Tarasov, 2024-02-09 *How Divine Images Became Art* tells the story of the parallel discovery of Russian medieval art and of the Italian primitives at the beginning of the twentieth century While these two developments are well known they are usually studied in isolation Tarasov's study has the great merit of showing the connection between the art world in Russia and the West and its impact in the cultural history of the continent in the pre war period Drawing on a profound familiarity with Russian sources some of which are little known to Western scholars and on equally expert knowledge of Western material and scholarship Oleg Tarasov presents a fresh perspective on early twentieth century Russian and Western art The author demonstrates that during the Belle poque the interest in medieval Russian icons and Italian primitives lead to the recognition of both as distinctive art forms conveying a powerful spiritual message Formalist art theory and its influence on art collecting played a major role in this recognition of aesthetic and moral value of primitive paintings and was instrumental in reshaping the perception of divine images as artworks Ultimately this monograph represents a significant contribution to our understanding of early twentieth century art it will be of interest to art scholars students and anyone interested in the spiritual and aesthetic revival of religious paintings in the Belle poque **The Routledge**
