

# HOW TO WRITE A SPEECH

Writing a speech is very similar to writing an essay, a report, a letter or any type of writing. You want to **share information or ideas or thoughts**. But the one difference is that your **words are being HEARD not READ**, the audience is a **listener not a reader** so you only have one chance to get your message across.

This means you need to make sure the audience is listening. So you need to grab their attention, engage them and keep them interested in what you have to say.

There are ways to deliver or present your speech to help keep the audience interested. These are described later in the section *Presenting your speech*. But as you write your draft speech you need to remember that you are **talking** so your sentences need to be shorter and have more casual, informal, ordinary words. This will also be described later in the section *Writing your draft speech*.

You also need to know what sort of speech you are writing because this will **help you prepare notes as you research** for the speech and decide on the points.

There are different types of speeches, although some can be both.

1. an **INFORMATIVE** speech, where you want to inform or tell your audience about a topic, an event, an area of knowledge.  
For example: Climate Change is happening; the school bake sale; Coral reefs are rainforests of the ocean.
2. an **INSTRUCTIONAL** speech, where you are explaining how to do something.  
For example: how to play soccer, how to give first aid.
3. a **PERSUASIVE** speech, where you want to convince your audience.  
For example: a candidate for SRC, racism-no way, homework should be banned.
4. a **SPECIAL OCCASION** speech, where you are entertaining or informing the audience for a specific purpose.  
For example: a farewell speech to a teacher retiring, a 21st birthday speech, a graduation speech.

The **time** you have to give your speech needs to be noted. This is important so you know how many words your speech should be.

Here are some general guidelines (although it depends on how fast you are speaking and how long your pauses are):

2 minute speech	230 words
4 minute speech	650 words
5 minute speech	770 words
10 minute speech	1500 words

Congress Subject Headings Library of Congress, 2007      Readings in Classical Rhetoric Thomas W. Benson, Michael H. Prosser, 2013-01-11 Rhetoric the theory of oral discourse affected and indeed pervaded all aspects of classical thought Bearing the stamp of its impact were the Homeric hymns the Iliad and the Odyssey Aeschylus Eumenides the great dramatic tragedies the elegiac and lyric poetry and the literature of the Romans often formed in the Greek image The rhetorical notion of probability had direct implications for the classical philosopher and mathematician as it does today Departments of speech English philosophy and classics provide the key centers of interest in the new and the classical rhetorics Despite the considerable enthusiasm for the study of rhetoric no single work provides large selections of primary materials written by the classical rhetoricians themselves Until now only secondary sources containing tiny excerpts or entire and expensive translations of the ancient rhetorical writings were available This large anthology of primary readings of the classical rhetoricians in translation fills this large gap The continuity and coherence of ancient rhetorical traditions is emphasized by organizing large excerpts into the topical divisions that later classical writers agreed upon The first unit of this anthology sets forth major issues in the definition and scope of rhetoric and its appropriate place among other modes of thought and discourse Parts 2 through 5 are organized according to the traditional canons of oratory invention disposition style memory and delivery In organizing the readings this way the editors represent both the philosophical and theoretical issues in rhetoric and its pragmatic functions as a craft for making effective discourse Selecting excerpts that illustrate the major conflicts within the unfolding tradition enables a sampling of not only the major points of view but also the arguments supporting them This volume includes selections not only from writings of the standard classical rhetoricians but also from less typical works which have special value The editors have utilized the best accessible translations while remaining absolutely faithful to their texts      Complete Works Plato, 1997-01-01 Gathers translations of Plato's works and includes guidance on approaching their reading and study      *The Law Times*, 1878      Science Information News, 1961      **Essay on the Origin of Languages and Writings Related to Music** Jean-Jacques Rousseau, 2009-07-01 J J was born for music Jean Jacques Rousseau wrote of himself not to be consumed in its execution but to speed its progress and make discoveries about it His ideas on the art and about the art are fertile inexhaustible Rousseau was a practicing musician and theorist for years before publication of his first Discourse but until now scholars have neglected these ideas This graceful translation remedies both those failings by bringing together the Essay which John T Scott says most clearly displays the juncture between Rousseau's musical theory and his major philosophical works with a comprehensive selection of the musical writings Many of the latter are responses to authors like Rameau Grimm and Raynal and a unique feature of this edition is the inclusion of writings by these authors to help establish the historical and ideological contexts of Rousseau's writings and the intellectual exchanges of which they are a part With an introduction that provides historical background traces the development of Rousseau's musical theory and shows that these writings are not an isolated part of his oeuvre but instead

are animated by the same system this volume fashions a much needed portal through which literary scholars musicologists historians and political theorists can enter into an important but hitherto overlooked chamber of Rousseau s vast intellectual palace

**Plato's Reasons** Christopher W. Tindale,2023-12-01 This book explores Plato s implicit understanding of argumentation by reviewing his standing as a logician rhetorician and dialectician The question of his standing on these matters is approached on his terms gleaned from the dialogues rather than simply from the judgments of commentators Traditionally arguments are distinguished as logical rhetorical or dialectical and the source of these distinctions is taken to be Aristotle This book proceeds on the assumption that Aristotle s tripartite theory of argumentation did not arise in a vacuum and explores the different degrees to which substantive antecedents of parts of that model can be traced to Plato
