The Art of Cloth in Mughal India Sylvia Houghteling,2022-03-29 When a rich man in seventeenth century South Asia enjoyed a peaceful night s sleep he imagined himself enveloped in a velvet sleep In the poetic imagination of the time the fine dew of early evening was like a thin cotton cloth from Bengal and woolen shawls of downy pashmina sent by the Mughal emperors to their trusted noblemen approximated the soft hand of the ruler on the vassal s shoulder Textiles in seventeenth century South Asia represented more than cloth to their makers and users They simulated sensory experience from natural environmental conditions to intimate personal touch The Art of Cloth in Mughal India is the first art historical account of South Asian textiles from the early modern era Author Sylvia Houghteling resurrects a truth that seventeenth century world citizens knew but which has been forgotten in the modern era South Asian cloth ranked among the highest forms of art in the global hierarchy of luxury goods and had a major impact on culture and communication While studies abound in economic history about the global trade in Indian textiles that flourished from the seventeenth to the nineteenth centuries they rarely engage with the material itself and are less concerned with the artistic and much less the literary and social significance of the taste for cloth This book is richly illustrated with images of textiles garments and paintings that are held in little known collections and have rarely if ever been published Rather than rely solely on records of European trading companies Houghteling draws upon poetry in local languages and integrates archival research from unpublished royal Indian inventories to tell a new history of this material culture one with a far more balanced view of its manufacture and use as well as its purchase and trade

Queens and Power in Medieval and Early Modern

England Carole Levin,R. O. Bucholz,2009-03-01 In Queens and Power in Medieval and Early Modern England Carole Levin and Robert Bucholz provide a forum for the underexamined anomalous reigns of queens in history These regimes primarily regarded as interruptions to the normal male monarchy have been examined largely as isolated cases This interdisciplinary study of queens throughout history examines their connections to one another their constituents perceptions of them and the fallacies of their historical reputations The contributors consider historical queens as well as fictional mythic and biblical queens and how they were represented in medieval and early modern England They also give modern readers a glimpse into the early modern worldview particularly regarding order hierarchy rulership property biology and the relationship between the sexes Considering topics as diverse as how Queen Elizabeth s unmarried status affected the perception of her as a just and merciful queen to a reevaluation of good Queen Anne as more than just an obese conventional monarch this volume encourages readers to reexamine previously held assumptions about the role of female monarchs in early modern history

Stitching the World: Embroidered Maps and Women's Geographical Education Judith A. Tyner,2016-12-05 From the late eighteenth century until about 1840 schoolgirls in the British Isles and the United States created embroidered map samplers and even silk globes Hundreds of British maps were made and although American examples are more rare they form a significant collection of artefacts Descriptions of these samplers stated that they were designed to teach needlework and

geography The focus of this book is not on stitches and techniques used in drafting the maps but rather why they were developed how they diffused from the British Isles to the United States and why they were made for such a brief time The events of the late eighteenth and early nineteenth centuries stimulated an explosion of interest in geography The American and French Revolutions the wars between France and England the War of 1812 Captain Cook's voyages and the explorations of Lewis and Clark made the study of places exciting and important Geography was the first science taught to girls in school This period also coincided with major changes in educational theories and practices especially for girls and this book uses needlework maps and globes to chart a broader discussion of women's geographic education In this light map samplers and embroidered globes represent a transition in women's education from accomplishments in the eighteenth century to challenging geographic education and conventional map drawing in schools and academies of the second half of the nineteenth century There has been little serious study of these maps by cartographers and moreover historians of cartography have largely neglected the role of women in mapping Children's maps have not been studied although they might have much to offer about geographical teaching and perceptions of a period and map samplers have been dismissed because they are the work of schoolgirls Needlework historians likewise have not done in depth studies of map samplers until recently *Stitching the World* is an interdisciplinary work drawing on cartography needlework and material culture This book for the first time provides a critical analysis of these artefacts showing that they offer significant insights into both eighteenth and nineteenth century geographic thought and cartography in the USA and the UK and into the development of female education

Catherine of Aragon Theresa Earenfight, 2021-12-15 Catherine of Aragon is an elusive subject Despite her status as a Spanish infanta Princess of Wales and Queen of England few of her personal letters have survived and she is obscured in the contemporary royal histories In this evocative biography Theresa Earenfight presents an intimate and engaging portrait of Catherine told through the objects that she left behind A pair of shoes a painting a rosary a fur trimmed baby blanket each of these things took meaning from the ways Catherine experienced and perceived them Through an examination of the inventories listing the few possessions Catherine owned at her death Earenfight follows the arc of Catherine's life first as a coddled child in Castile then as a young adult alone in England after the death of her first husband a devoted wife and doting mother a patron of the arts and of universities and finally a dear friend to the women and men who stood by her after Henry VIII set her aside in favor of another woman Based on traces and fragments these portraits of Catherine are interpretations of a life lived five centuries ago Earenfight creates a compelling picture of a multifaceted intelligent woman and a queen of England Engagingly written this cultural and emotional biography of Catherine brings us closer to understanding her life from her own perspective
