**Art & Design**, 1996      **Public--art--space** Mel Gooding, 1998 Surveys 20 works of art in public spaces including finished works works in progress and unseen alternative designs      *Mastering Architecture* Leon van Schaik, 2005-03-11 It is easy for even the most accomplished of designers to lose sight of their higher creative goals once they are ensconced in practice and burdened by the everyday concerns of running an office and overseeing complex projects However it is essential for any architect aspiring to achieve a mastery of their profession to retain an ongoing awareness and understanding of their creative development This book is a touchstone for architects who want to get back to a creative form of practice in order to continue progressing and evolving their work *Mastering Architecture* draws on the research of approximately fifty architects who have taken a close look at the nature of their own mastery This research into mastery reveals things that every practitioner should know about their creative practice things which most architects are only aware of at an intuitive level The book flags up personal attributes such as stamina creative energy and intellectual capital which are intrinsic to dynamic practice It also suggests ways in which practitioners can self curate their positions within the triangle of their creativity evolving not only the cultural structure of their profession but the wider world in which they operate      *Tokyo Urbanism: From Hinterland To Kawaii* Masami Kobayashi, 2024-03-20 Arguably one of the most iconic mega cities in Asia Tokyo the capital of Japan plays an important economic and cultural role It has been featured in various media as a liveable city with a well developed public transport system Yet what international media coverage often misses out are its unique neighbourhoods and districts Known as kawaii they are scattered in a mosaic from downtown Tokyo to its suburbs exemplifying a type of urbanism wholly unique to Asia and foreshadowing a future vision which suggests regional autonomy in a post COVID 19 world In this book the authors thoroughly investigate the city's multi layered spatial and sociocultural aspects introducing a side of Tokyo little known to the world at large Readers who are only familiar with Tokyo's depiction as an ultra modern city will appreciate the book's insights into the kawaii phenomenon the pre modern urban structure of Edo city and contemporary Tokyo's Asian urbanism including traditional community activities such as local festivals the formation of new communities by old and new residents and intimate community life using a network of alleys Combining urban planning sociological anthropological and architectural perspectives the book's interdisciplinary approach looks at Tokyo from the peripheral to the kawaii level      **The Urbanism of Frank Lloyd Wright** Neil Levine, 2016 This is the first book devoted to Frank Lloyd Wright's designs for remaking the modern city Stunningly comprehensive *The Urbanism of Frank Lloyd Wright* presents a radically new interpretation of the architect's work and offers new and important perspectives on the history of modernism Neil Levine places Wright's projects produced over more than fifty years within their historical cultural and physical contexts while relating them to the theory and practice of urbanism as it evolved over the twentieth century Levine overturns the conventional view of Wright as an architect who deplored the city and whose urban vision was

limited to a utopian plan for a network of agrarian communities he called Broadacre City Rather Levine reveals Wright's larger more varied interesting and complex urbanism demonstrated across the span of his lengthy career Beginning with Wright's plans from the late 1890s through the early 1910s for reforming residential urban neighborhoods mainly in Chicago and continuing through projects from the 1920s through the 1950s for commercial mixed use civic and cultural centers for Chicago Madison Washington Pittsburgh and Baghdad Levine demonstrates Wright's place among the leading contributors to the creation of the modern city Wright's often spectacular designs are shown to be those of an innovative precursor and creative participant in the world of ideas that shaped the modern metropolis Lavishly illustrated with drawings plans maps and photographs this book features the first extensive new photography of materials from the Frank Lloyd Wright Foundation Archives **The Urbanism of Frank Lloyd Wright** will serve as one of the most important books on the architect for years to come

**The Permanence of Temporary Urbanism** Mara Ferreri, 2025-10-01 Temporary urbanism has become a distinctive feature of urban life after the 2008 global financial crisis This book offers a critical exploration of its emergence and establishment as a seductive discourse and as an entangled field of practice encompassing architecture visual and performative arts urban regeneration policies and planning Drawing on seven years of semi ethnographic research it explores the politics of temporariness from a situated analysis of neighbourhood transformation media representations and wider political and cultural shifts in austerity London Through a longitudinal engagement with projects and practitioners the book tests the power of aesthetic and cultural interventions and highlights tensions between the promise of vacant space re appropriation and its commodification Against the normalisation of ephemerality it presents a critique of the permanence of temporary urbanism as a glamorisation of the anticipatory politics of precarity which are transforming cities subjectivities and imaginaries of urban action

**The City Reader** Richard T. LeGates, Frederic Stout, 2011-01-11 The fifth edition of the highly successful City Reader juxtaposes the best classic and contemporary writings on the city It contains fifty seven selections including seventeen new contributions by experts including Elijah Anderson Robert Brueggemann Michael Dear Jan Gehl Harvey Molotch Clarence Perry Daphne Spain Nigel Taylor Samuel Bass Warner and others some of which have been newly written exclusively for The City Reader Classic writings from Ebenezer Howard Ernest W Burgess LeCorbusier Lewis Mumford Jane Jacobs and Louis Wirth meet the best contemporary writings of Sir Peter Hall Manuel Castells David Harvey Kenneth Jackson This edition of The City Reader has been extensively updated and expanded to reflect the latest thinking in each of the disciplinary areas included and in topical areas such as sustainable urban development climate change globalization and the impact of technology on cities The plate sections have been extensively revised and expanded and a new plate section on global cities has been added The anthology features general and section introductions and introductions to the selected articles New to the fifth edition is a bibliography listing over 100 of the top books for those studying Cities

independent voice of the visual arts      **Future Asian Space** Erwin Viray, Davisi Boontharm, Limin Hee, 2012-01-01 Rapid technological economic social and cultural changes are transforming the idea of Asian space With the shift to a global economy and an urban population explosion Asian cities have become a mainstay of progress national pride identity and positioning on the global stage The extraordinary pace and intensity of the changes have created a situation unique in the history of urban development Despite the immense diversity of Asian countries Asia ness is often treated as a distinctive quality that has emerged from unique recent circumstances affecting Asian urbanizations as a whole In Future Asian Space 15 authors explore broad concepts relating to the creation and re creation of Asian space and contemporary Asian identity and their examination of different sites and research approaches highlights the difficulty of pinpointing what Asia ness is or might become Appropriate design and planning of cities is a critical element in building a sustainable future and coping with environmental social and cultural problems Future Asian Space is designed to stimulate interests and engagement in discussions of the Asian city and its trajectories in architecture and urbanism but the authors conclusions will intrigue anyone interested in the future of cities and urban life in Asia      **The Architecture of Urbanity** Vishaan

as well as unbuilt projects Mumford offers a sweeping guide to the history of designers efforts to shape cities The Transatlantic Collapse of Urban Renewal Christopher Klemek,2011-07 The Transatlantic Collapse of Urban Renewal examines how postwar thinkers from both sides of the Atlantic considered urban landscapes radically changed by the political and physical realities of sprawl urban decay and urban renewal With a sweep that encompasses New York London Berlin Philadelphia and Toronto among others Christopher Klemek traces changing responses to the challenging issues that most affected the lives of the world s cities In the postwar decades the principles of modernist planning came to be challenged in the grassroots revolts against the building of freeways through urban neighborhoods for instance or by academic critiques of slum clearance policy agendas and then began to collapse entirely Over the 1960s several alternative views of city life emerged among neighborhood activists New Left social scientists and neoconservative critics Ultimately while a pessimistic view of urban crisis may have won out in the United States and Great Britain Klemek demonstrates that other countries more successfully harmonized urban renewal and its alternatives This much anticipated book provides one of the first truly international perspectives on issues central to historians and planners alike making it essential reading for anyone engaged with either field **Altering Practices** Doina Petrescu,2007-05-07 This collection of essays addresses and defines the state of contemporary theories and practices of space it is concerned with the growing importance of technology and communications the effects of globalization and the change of social demands Within the current urban and geopolitical contexts it addresses the emergence of new social and political theories that raise questions of identity and difference in modern society The book reiterates feminist concerns with space from the critical stance of the new millennium With contributions from the leading theorists and thinkers from around the world representing the fields of architecture art philosophy and gender studies this book has a truly international and interdisciplinary reach *Sustainable Practices: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources,2013-12-31 This reference explores some of the most recent developments in sustainability delving into topics beyond environmental science to cover issues of sustainable economic political and social development Provided by publisher Urban Mythologies John Alan Farmer,1999 **Foreclosed: Rehousing the American Dream** ,
