Advanced Methodologies and Technologies in Artificial Intelligence, Computer Simulation, and Human-Computer Interaction Khosrow-Pour, D.B.A., Mehdi, 2018-09-28 As modern technologies continue to develop and evolve the ability of users to adapt with new systems becomes a paramount concern Research into new ways for humans to make use of advanced computers and other such technologies through artificial intelligence and computer simulation is necessary to fully realize the potential of tools in the 21st century Advanced Methodologies and Technologies in Artificial Intelligence Computer Simulation and Human Computer Interaction provides emerging research in advanced trends in robotics AI simulation and human computer interaction Readers will learn about the positive applications of artificial intelligence and human computer interaction in various disciplines such as business and medicine This book is a valuable resource for IT professionals researchers computer scientists and researchers invested in assistive technologies artificial intelligence robotics and computer simulation

Elgar Companion to Regulating AI and Big Data in Emerging Economies Mark Findlay, Li Min Ong, Wenxi Zhang, 2023-12-11 Committed to highlighting the regulatory needs and priorities of emerging economies in the context of AI and big data this expertly crafted Companion explores the nature and role of regulation in the Global South from a techno-dependent societal perspective It not only amplifies the unspoken and underrepresented voices in AI and data regulation scholarly discourse but also provides a novel approach to otherwise

recipient economies in an age of digital transformation

Using AI Tools in Text Analysis, Simplification,

Classification, and Synthesis Jomaa, Nayef J.,2025-01-31 The recent advancements in AI tools for generating analyzing translating synthesizing and summarizing texts are revolutionizing how we process and interact with information These tools enhance productivity and creativity across diverse fields enabling more efficient workflows and deeper insights Its impact extends to fostering innovation bridging language barriers and democratizing access to knowledge shaping a more connected and informed global society Using AI Tools in Text Analysis Simplification Classification and Synthesis discusses recent AI tools used in generating analyzing translating and summarizing texts It presents perspectives and current trends in using AI tools to deal with texts Covering topics such as automated evaluation large language models and text paraphrasing this book is an excellent resource for academicians researchers educators linguists media professionals business leaders policymakers and more

Readings in Cyberethics Richard A. Spinello,Herman T. Tavani,2004 This book of readings is a flexible

resource for undergraduate and graduate courses in the evolving fields of computer and Internet ethics Each selection has been carefully chosen for its timeliness and analytical depth and is written by a well known expert in the field The readings are organized to take students from a discussion on ethical frameworks and regulatory issues to a substantial treatment of the four fundamental interrelated issues of cyberethics speech property privacy and security A chapter on professionalism rounds out the selection This book makes an excellent companion to CyberEthics Morality and Law in Cyberspace Third Edition by providing articles that present both sides of key issues in cyberethics *Network Cabling Illuminated* Robert Shimonski,Richard T. Steiner,Sean M. Sheedy,2006 This Book Covers All Aspects Of Network And Communications Cabling Including Physical Characteristics Of The Various Types Of Cabling Installation Design And Implementation Guidelines Cabling Standards And Specifications Software And Hardware Tools For Testing And Monitoring Installations And Premises Wiring With A Heavy Focus On Developing Hands On Skills And Including Many Labs And Group Exercises For Learning Reinforcement The Book Thoroughly Prepares Readers For The Certification Objectives Covered In The BICSI NACSE And ETA Exams

Mobile Devices and Smart Gadgets in Medical Sciences Umair, Sajid,2020-02-21 Each day new applications and methods are developed for utilizing technology in the field of medical sciences both as diagnostic tools and as methods for patients to access their medical information through their personal gadgets However the maximum potential for the application of new technologies within the medical field has not yet been realized Mobile Devices and Smart Gadgets in Medical Sciences is a pivotal reference source that explores different mobile applications tools software and smart gadgets and their applications within the field of healthcare Covering a wide range of topics such as artificial intelligence telemedicine and oncology this book is ideally designed for medical practitioners mobile application developers technology developers software experts computer engineers programmers ICT innovators policymakers researchers academicians and students

Intelligent Control Kaushik Das Sharma,Amitava Chatterjee,Anjan Rakshit,2018-08-28 This book discusses

systematic designs of stable adaptive fuzzy logic controllers employing hybridizations of Lyapunov strategy based approaches H theory based approaches and contemporary stochastic optimization techniques The text demonstrates how candidate stochastic optimization techniques like Particle swarm optimization PSO harmony search HS algorithms covariance matrix adaptation CMA etc can be utilized in conjunction with the Lyapunov theory H theory to develop such hybrid control strategies The goal of developing a series of such hybridization processes is to combine the strengths of both Lyapunov theory H theory based local search methods and stochastic optimization based global search methods so as to attain superior control algorithms that can simultaneously achieve desired asymptotic performance and provide improved transient responses The book also demonstrates how these intelligent adaptive control algorithms can be effectively utilized in real life applications such as in temperature control for air heater systems with transportation delay vision based navigation of mobile robots intelligent control of robot manipulators etc *Intelligent Systems* Crina Grosan,Ajith Abraham,2011-07-29

Computational intelligence is a well established paradigm where new theories with a sound biological understanding have been evolving The current experimental systems have many of the characteristics of biological computers brains in other words and are beginning to be built to perform a variety of tasks that are difficult or impossible to do with conventional computers As evident the ultimate achievement in this field would be to mimic or exceed human cognitive capabilities including reasoning recognition creativity emotions understanding learning and so on This book comprising of 17 chapters offers a step by step introduction in a chronological order to the various modern computational intelligence tools used in practical problem solving Starting with different search techniques including informed and uninformed search heuristic search minmax alpha beta pruning methods evolutionary algorithms and swarm intelligent techniques the authors illustrate the design of knowledge based systems and advanced expert systems which incorporate uncertainty and fuzziness Machine learning algorithms including decision trees and artificial neural networks are presented and finally the fundamentals of hybrid intelligent systems are also depicted Academics scientists as well as engineers engaged in research development and application of computational intelligence techniques machine learning and data mining would find the comprehensive coverage of this book invaluable Contracts for Infrastructure Projects Philip Loots,Donald Charrett,2022-05-18 Contracts for Infrastructure Projects An International Guide provides a guide to the law relating to construction contracts for infrastructure projects it is intended for the use of engineers and other professionals who are involved in the negotiation and administration of construction contracts to enable them to understand the risks involved and how to minimise them The principles of construction law outlined in this book apply to small construction contracts as well as very large contracts for which the contract sum may be in the billions of dollars The focus of the book is on construction contracts entered into by commercial organisations operating in a business environment Contract law generally assumes that such parties are of equal bargaining power and puts relatively few fetters on their ability to agree on the terms of their bargain However where

legislation impacts on the execution of construction projects or the operation of construction contracts it may be of major importance in protecting the rights of weaker parties or third parties It is assumed that the users of this book will be familiar with the general concepts of tendering and contracting for engineering and construction projects but may not have any formal knowledge of the law To the extent possible the emphasis is on general principles of contract law that are widely accepted in many jurisdictions Examples are drawn from case law in a number of common law jurisdictions as well as from civil codes

An Introduction to Knowledge Graphs Umutcan Serles, Dieter Fensel, 2024-06-08 This textbook introduces the theoretical foundations of technologies essential for knowledge graphs It also covers practical examples applications and tools Knowledge graphs are the most recent answer to the challenge of providing explicit knowledge about entities and their relationships by potentially integrating billions of facts from heterogeneous sources The book is structured in four parts For a start Part I lays down the overall context of knowledge graph technology Part II Knowledge Representation then provides a deep understanding of semantics as the technical core of knowledge graph technology Semantics is covered from different perspectives such as conceptual epistemological and logical Next Part III Knowledge Modelling focuses on the building process of knowledge graphs The book focuses on the phases of knowledge generation knowledge hosting knowledge assessment knowledge cleaning knowledge enrichment and knowledge deployment to cover a complete life cycle for this process Finally Part IV simply called Applications presents various application areas in detail with concrete application examples as well as an outlook on additional trends that will emphasize the need for knowledge graphs even stronger This textbook is intended for graduate courses covering knowledge graphs Besides students in knowledge graph Semantic Web database or information retrieval classes also advanced software developers for Web applications or tools for Web data management will learn about the foundations and appropriate methods

Digital Business Strategies in Blockchain Ecosystems Umit Hacıoglu, 2019-11-09 This book analyzes the effects of the latest technological advances in blockchain and artificial intelligence AI on business operations and strategies Adopting an interdisciplinary approach the contributions examine new developments that change the rules of traditional management The chapters focus mainly on blockchain technologies and digital business in the Industry 4.0 context covering such topics as accounting digitalization and use of AI in business operations and cybercrime Intended for academics blockchain experts students and practitioners the book helps business strategists design a path for future opportunities

Architecture and Technological Advancements of Education 4.0 Pandey, Rajiv, Srivastava, Nidhi, Chatterjee, Parag, 2023-11-27 Academics 4.0 has become increasingly crucial in recent times due to the impact of Industry 4.0 on various fields The emergence of disruptive technologies and the cyber physical world has underscored the need for experts in these areas which requires proper training of students from an early stage Education 4.0 is essential in preparing faculties and students adequately for this purpose This approach shifts the focus from teaching to learning and employs blended learning MOOC courses and flipped classrooms to achieve better

understanding and application of knowledge The practical aspect of the subject is discussed in the classroom while the theoretical aspect is taught outside the class The book Architecture and Technological Advancements of Education 4 0 aims to explain the rationale advantages and features of Academics 4 0 explore assessment tools and techniques and describe the national policy for bringing change in education It also covers blended learning MOOC courses virtual labs and mobile learning with a focus on their benefits The book will be useful for universities and educational entities that aim to follow Academics 4 0 in the education system serve as a reference manual for research articles and be helpful to faculties and academicians who wish to implement and assess online techniques Additionally it will be an excellent learning platform for providers and users of relevant domains with a broad range of topics covering its impact on the education system students and workforce

Semantic Analysis of Verbal Collocations with Lexical Functions Alexander Gelbukh, Olga Kolesnikova, 2012-08-09 This book is written for both linguists and computer scientists working in the field of artificial intelligence as well as to anyone interested in intelligent text processing Lexical function is a concept that formalizes semantic and syntactic relations between lexical units Collocational relation is a type of institutionalized lexical relations which holds between the base and its partner in a collocation Knowledge of collocation is important for natural language processing because collocation comprises the restrictions on how words can be used together The book shows how collocations can be annotated with lexical functions in a computer readable dictionary allowing their precise semantic analysis in texts and their effective use in natural language applications including parsers high quality machine translation periphrasis system and computer aided learning of lexica The books shows how to extract collocations from corpora and annotate them with lexical functions automatically To train algorithms the authors created a dictionary of lexical functions containing more than 900 Spanish disambiguated and annotated examples which is a part of this book The obtained results show that machine learning is feasible to achieve the task of automatic detection of lexical functions

Integrating Technology in Problem-Solving Educational Practices Zhang, Jingru, Wan Yahaya, Wan Ahmad Jaafar, Sanmugam, Mageswaran, Lim, Darren, 2024-10-31 The influence of technology on education continues to grow fundamentally changing how students develop problem solving skills in the digital age Emerging technologies provide new ways to enhance critical thinking creativity and real world problem solving abilities By creating dynamic interactive learning environments educators can equip students with the tools they need to face the complexities of the modern world making technology a vital component of effective teaching and learning strategies Integrating Technology in Problem Solving Educational Practices offers educators instructional designers researchers and scholars the skills and resources to integrate technology into their instruction to improve problem solving abilities Through a blend of theoretical frameworks and real world examples it provides practical insights on creating engaging educational experiences that prepare students for success It is also a valuable resource for students studying education technology or related fields who are interested in exploring how

technology and learning intersect *Computational Collective Intelligence -- Technologies and Applications* Dosam Hwang, Jason J. Jung, Ngoc Thanh Nguyen, 2014-09-04 This book constitutes the refereed proceedings of the 6th International Conference on Collective Intelligence ICCCI 2014 held in Seoul Korea in September 2014 The 70 full papers presented were carefully reviewed and selected from 205 submissions They address topics such as knowledge integration data mining for collective processing fuzzy modal and collective systems nature inspired systems language processing systems social networks and semantic web agent and multi agent systems classification and clustering methods multi dimensional data processing Web systems intelligent decision making methods for scheduling image and video processing collective intelligence in web systems computational swarm intelligence cooperation and collective knowledge **Self-Directed Learning** (Prof.) Elsa Mentz, Charlene du Toit-Brits, Jean Henry Blignaut, Elize Vos, 2024-12-20 This scholarly book provides an in depth analysis of self directed learning SDL within contexts of curriculum praxis and scholarship The book presents original research from multiple authors which provides diverse perspectives and methodologies for enhancing understanding of SDL It primarily focuses on incorporating SDL into curriculum development and emphasises the significance of scholarly research in designing effective curricula The book explores the integration of technology in learning and adapts instructional strategies to meet the evolving demands of higher education and school environments Inspired by constructivism socio constructivism and context based learning theories the text presents practical strategies for educators Key topics include the implications of artificial intelligence strategies for reducing procrastination fostering SDL in homeschooling enhancing SDL attributes preparing teachers for self direction facilitating curriculum transformation and incorporating indigenous knowledge The book also covers teaching climate change education and integrating educational robotics Self Directed Learning Curriculum implementation praxis and scholarship in context is invaluable for scholars and researchers in education providing empirical findings and practical insights to inspire further research It aims to equip learners with 21st century skills preparing them for the challenges of the Fourth Industrial Revolution Recent Advances on Soft Computing and Data Mining Tutut Herawan, Rozaida Ghazali, Nazri Mohd Nawi, Mustafa Mat Deris, 2016-12-27 This book provides a comprehensive introduction and practical look at the concepts and techniques readers need to get the most out of their data in real world large scale data mining projects It also guides readers through the data analytic thinking necessary for extracting useful knowledge and business value from the data The book is based on the Soft Computing and Data Mining SCDM 16 conference which was held in Bandung Indonesia on August 18th 20th 2016 to discuss the state of the art in soft computing techniques and offer participants sufficient knowledge to tackle a wide range of complex systems The scope of the conference is reflected in the book which presents a balance of soft computing techniques and data mining approaches The two constituents are introduced to the reader systematically and brought together using different combinations of applications and practices It offers engineers data analysts practitioners scientists and managers the insights into the

concepts tools and techniques employed and as such enables them to better understand the design choice and options of soft computing techniques and data mining approaches that are necessary to thrive in this data driven ecosystem
