Artificial Presence Philosophical Studies In Image Theory Cultural Memory In The Present:

Artificial Presence Lambert Wiesing, 2010 These phenomenological studies on the philosophy of the image review contemporary image theory while defending the fundamental insight that images alone make the artificial presence of things possible

The Neuro-Image Patricia Pisters, 2012-07-11 Arguing that today's viewers move through a character's brain instead of looking through his or her eyes or mental landscape this book approaches twenty first century globalized cinema through the concept of the neuro image Pisters explains why this concept has emerged now and she elaborates its threefold nature through research from three domains Deleuzian schizoanalytic philosophy digital networked screen culture and neuroscientific research These domains return in the book's tripartite structure Part One on the brain as neuroscreen suggests rich connections between film theory mental illness and cognitive neuroscience Part Two explores neuro images from a philosophical perspective paying close attention to their ontological epistemological and aesthetic dimensions Political and ethical aspects of the neuro image are discussed in Part Three Topics covered along the way include the omnipresence of surveillance the blurring of the false and the real and the affective powers of the neo baroque and the use of neuro images in politics historical memory and war

Violence Taking Place Andrew Herscher, 2010-03-25 The first history ever of violence against architecture as political violence this book examines the case of the former Yugoslavia and the ways in which architecture is a site where power agency and ethnicity are constituted

The Future and Its Enemies Daniel Innerarity, 2012-07-25 Humans may be the only creatures conscious of having a future but all too often we would rather not think about it Likewise our societies unable to deal with radical uncertainty do not make policies with a view to the long term Instead we suffer from a sense of powerlessness collective irrationality and perennial political discontent In *The Future and Its Enemies* Spanish philosopher Daniel Innerarity makes a plea for a new social contract that would commit us to moral and political responsibility with respect to future generations He urges us to become advocates for the future in the face of enemies who oblivious to the costs of modernization press for endless and unproductive acceleration His accessible book proposes a new way of confronting the unknown one grounded in the calculation of risk Declaring the classical right left divide to be redundant Innerarity presents his hopes for a renewed democracy and a politics that would find convincing ways to mediate between the priorities of the present the heritage of the past and the challenges that lie ahead

Theaters of Justice Yasco Horsman, 2010-12-06 What role do legal trials have in collective processes of coming to terms with a history of mass violence How does the theatrical structure of a criminal trial facilitate and limit national processes of healing and learning from the past This study begins with the widely publicized historic trials of three Nazi war criminals Eichmann Barbie and Priebke whose explicit goal was not only to punish but also to establish an officially sanctioned version of the past The Truth and

Reconciliation commissions in South America and South Africa added a therapeutic goal acting on the belief that a trial can help bring about a moment of closure Horsman challenges this belief by reading works that reflect on the relations among pedagogy therapy and legal trials Philosopher Hannah Arendt poet Charlotte Delbo and dramaturg Bertolt Brecht all produced responses to historic trials that reopened the cases those trials sought to close bringing to center stage aspects that had escaped the confines of their legal frameworks *Memos from the Besieged City* Djelal Kadir, 2011 This is a historical and critical reassessment of the field of comparative literature the study of cultures and their literary posterity across national borders and historical frontiers at a moment when notions of literacy and culture are under inordinate pressure by predatory globalization and militaristic realpolitik **Adventures in the French Trade** Jeffrey Mehlman, 2010-09-09 This memoir is less a chronicle of the life of a leading scholar critic of matters French and a key figure in the naturalization of French theory in English than a series of differently angled fragments episodes each with its attendant surprise in what one commentator has called his amour vache his injured and occasionally injurious love for France and the French **Theory of Society, Volume 1** Niklas Luhmann, 2012-10-10 This first volume of Niklas Luhmann's two part final work was initially published in German in 1997 The culmination of his thirty year theoretical project to reconceptualize sociology it offers a comprehensive description of modern society on a scale not attempted since Talcott Parsons Beginning with an account of the fluidity of meaning and the accordingly high improbability of successful communication Luhmann analyzes a range of communicative media including language writing the printing press and electronic media as well as success media such as money power truth and love all of which structure this fluidity and make communication possible An investigation into the ways in which social systems produce and reproduce themselves the book asks what gives rise to functionally differentiated social systems how they evolve and how social movements organizations and patterns of interaction emerge The advent of the computer and its networks which trigger potentially far reaching processes of restructuring receive particular attention A concluding chapter on the semantics of modern society's self description bids farewell to the outdated theoretical approaches of old Europe that is to ontological holistic ethical and critical interpretations of society and argues that concepts such as the nation the subject and postmodernity are vastly overrated In their stead society long considered a suspicious term by sociologists one open to all kinds of reification is defined in purely operational terms It is the always uncertain answer to the question of what comes next in all areas of communication *Milton and the Post-Secular Present* Feisal Mohamed, 2011-08-09 Our post secular present argues Feisal Mohamed has much to learn from our pre secular past Through a consideration of poet and polemicist John Milton this book explores current post secularity an emerging category that it seeks to clarify and critique It examines ethical and political engagement grounded in belief with particular reference to the thought of Alain Badiou Jacques Derrida Jürgen Habermas and Gayatri C Spivak Taken to an extreme such engagement produces the cult of the suicide bomber But the suicide bomber

has also served as a convenient bogey for those wishing to distract us from the violence in Western and Christian traditions and for those who would dismiss too easily the vigorous iconoclasm that belief can produce More than any other poet Milton alerts us to both anti humane and liberationist aspects of belief and shows us relevant dynamics of language by which such commitment finds expression

On Historicizing Epistemology Hans-Jörg Rheinberger, 2010-03-09 Epistemology as generally understood by philosophers of science is rather remote from the history of science and from historical concerns in general Rheinberger shows that from the late nineteenth through the late twentieth century a parallel alternative discourse sought to come to terms with the rather fundamental experience of the thoroughgoing scientific changes brought on by the revolution in physics Philosophers of science and historians of science alike contributed their share to what this essay describes as an ongoing quest to historicize epistemology Historical epistemology in this sense is not so concerned with the knowing subject and its mental capacities Rather it envisages science as an ongoing cultural endeavor and tries to assess the conditions under which the sciences in all their diversity take shape and change over time

Deleuzian Concepts Paul Patton, 2010-05-19 These essays provide important interpretations and analyze critical developments of the political philosophy of Gilles Deleuze They situate his thought in the contemporary intellectual landscape by comparing him with contemporaries such as Derrida Rorty and Rawls and show how elements of his philosophy may be usefully applied to key contemporary issues including colonization and decolonization the nature of liberal democracy and the concepts and critical utopian aspirations of political philosophy Patton discusses Deleuze's notion of philosophy as the creation of concepts and shows how this may be helpful in understanding the nature of political concepts such as rights justice and democracy Rather than merely commenting on or explaining Deleuze's thought Patton offers a series of attempts to think with Deleuzian concepts in relation to other philosophers and other problems His book represents a significant contribution to debates in contemporary political theory continental philosophy and Deleuzian studies

Georges Bataille Rodolphe Gasché, 2012-10-24 This book investigates what Bataille in *The Pineal Eye* calls mythological representation the mythological anthropology with which this unusual thinker wished to outflank and undo scientific and philosophical anthropology Gasché probes that anthropology by situating Bataille's thought with respect to the quaternity of Schelling Hegel Nietzsche and Freud He begins by showing what Bataille's understanding of the mythological owes to Schelling Drawing on Hegel Nietzsche and Freud he then explores the notion of image that constitutes the sort of representation that Bataille's innovative approach entails Gasché concludes that Bataille's mythological anthropology takes on Hegel's phenomenology in a systematic fashion By reading it backwards he not only dismantles its architecture he also ties each level to the preceding one replacing the idealities of philosophy with the phantasmatic representations of what he dubs low materialism Phenomenology Gasché argues thus paves the way for a new science of phantasms

Little Did I Know Stanley Cavell, 2010-07-23 An autobiography in the form of a philosophical diary *Little Did I Know*'s underlying motive is to describe the events of a life that

produced the kind of writing associated with Stanley Cavell's name. Cavell recounts his journey from early childhood in Atlanta, Georgia, through musical studies at UC Berkeley and Juilliard, his subsequent veering off into philosophy at UCLA, his Ph.D. studies at Harvard, and his half-century of teaching. Influential people from various fields figure prominently or in passing over the course of this memoir: J. L. Austin, Ernest Bloch, Roger Sessions, Thomas Kuhn, Robert Lowell, Rogers Albritton, Seymour Shifrin, John Rawls, Bernard Williams, W. V. O. Quine, and Jacques Derrida are no longer with us, but Cavell also pays homage to the living: Michael Fried, John Harbison, Rose Mary Harbison, Kurt Fischer, Milton Babbitt, Thompson Clarke, John Hollander, Hilary Putnam, Sandra Laugier, Belle Randall, and Terrence Malick. The drift of his narrative also registers the decisiveness of the relatively unknown and the purely accidental. Cavell's life has produced a trail of some eighteen published books that range from treatments of individual writers like Wittgenstein, Austin, Emerson, Thoreau, Heidegger, Shakespeare, and Beckett to studies in aesthetics, epistemology, moral and political philosophy, cinema, opera, and religion.

Spinoza Contra Phenomenology Knox Peden, 2014-06-04. Spinoza Contra Phenomenology fundamentally recasts the history of postwar French thought typically presumed to have been driven by a critique of reason indebted to Nietzsche and Heidegger. Although the reception of phenomenology gave rise to many innovative developments in French philosophy from existentialism to deconstruction, not everyone in France was pleased with this German import. This book recounts how a series of French philosophers used Spinoza to erect a bulwark against the nominally irrationalist tendencies of phenomenology. From its beginnings in the interwar years, this rationalism would prove foundational for Althusser's rethinking of Marxism and Deleuze's ambitious metaphysics. There has been a renewed enthusiasm for Spinozism of late by those who see his work as a kind of neo-vitalism or philosophy of life and affect. Peden counters this trend by tracking a decisive and neglected aspect of Spinoza's philosophy: his rationalism in a body of thought too often presumed to have rejected reason. In the process, he demonstrates that the virtues of Spinoza's rationalism have yet to be exhausted.

At the Threshold of the Image Andrea Pinotti, 2025-09-16. An exploration of the impact of immersive experiences on visual practices from cave painting to virtual reality. In this groundbreaking book, philosopher Andrea Pinotti explores the impacts of a desire that has motivated human beings since prehistory: the desire to enter an image. He proposes that over the centuries, every culture has tried to realize this wish with whatever visual resources were available at the time, and today's virtual reality technologies seem close to fulfilling it. The image in VR becomes an immersive 360-degree environment, and the frame that used to confine it to a world apart disappears. Even the physical medium in which the image materializes appears to be transparent. However, Pinotti insists that once the border between the real world and the iconic world becomes permeable, we are faced with a troubling two-way passage: we penetrate the world of the image, but the image floods into our world. The desire for being encompassed by the image, he shows, is accompanied by fear of this overflowing. In its analysis of this desire, fear, *At the Threshold of the Image* takes the reader on an extraordinary journey from the myths of Narcissus and Pygmalion.

The Specter of Capital Joseph Vogl, 2014-10-22 In his brilliant interdisciplinary analysis of the global financial crisis Joseph Vogl aims to demystify finance capitalism with its bewildering array of new instruments by tracing the historical stages through which the financial market achieved its current autonomy Classical and neoclassical economic theorists have played a decisive role here Ignoring early warnings about the instability of speculative finance markets they have persisted in their belief in the inherent equilibrium of the market describing even major crises as mere aberrations or adjustments and rationalizing dubious financial practices that escalate risk while seeking to manage it The market knows best this is a secular version of Adam Smith's faith in the market's invisible hand his economic interpretation of eighteenth century providentialist theodicy which subsequently hardened into an oikodicy an unquestioning belief in the self-regulating beneficence of market forces Vogl shows that financial theory assisted by mathematical modeling and digital technology itself operates as a hidden hand pushing economic reality into unknown territory He challenges economic theorists to move beyond the neoclassical paradigm to discern the true contours of the current epoch of financial convulsions

Testing the Limit François-David Sebbah, 2012-05-09 In exploring the nature of excess relative to a phenomenology of the limit Testing the Limit claims that phenomenology itself is an exploration of excess What does it mean that the self is given Should we see it as originary or rather in what way is the self engendered from textual practices that transgress or hover around and therefore within the threshold of phenomenological discourse This is the first book to include Michel Henry in a triangulation with Derrida and Levinas and the first to critique Levinas on the basis of his interpolation of philosophy and religion Sebbah claims that the textual origins of phenomenology determine in their temporal rhythms the nature of the subjectivation on which they focus He situates these considerations within the broader picture of the state of contemporary French phenomenology chiefly the legacy of Merleau-Ponty in order to show that these three thinkers share a certain family resemblance the identification of which reveals something about the traces of other phenomenological families It is by testing the limit within the context of traditional phenomenological concerns about the appearance of subjectivity and ipseity that Derrida Henry and Levinas radically reconsider phenomenology and that French phenomenology assumes its present form

A Systems Theory of Religion Niklas Luhmann, 2013-01-09 A Systems Theory of Religion still unfinished at Niklas Luhmann's death in 1998 was first published in German two years later thanks to the editorial work of Andr Kieserling One of Luhmann's most important projects it exemplifies his later work while redefining the subject matter of the sociology of religion Religion for Luhmann is one of the many functionally differentiated social systems that make up modern society All such subsystems consist entirely of communications and all are autopoietic which is to say self-organizing and self-generating Here Luhmann explains how religion provides a code for coping with the complexity opacity and uncontrollability of our world Religion functions to make

definite the indefinite to reconcile the immanent and the transcendent Synthesizing approaches as disparate as the philosophy of language historical linguistics deconstruction and formal systems theory cybernetics A Systems Theory of Religion takes on important topics that range from religion's meaning and evolution to secularization turning decades of sociological assumptions on their head It provides us with a fresh vocabulary and a fresh philosophical and sociological approach to one of society's most fundamental phenomena
