Athens Past And Present With Reconstructions Of Ancient Monuments:

Pinning Down the Past Mike Corbishley, 2014-04-17 In a relatively short period of time the pursuit of archaeology has evolved from an antiquarian interest to a specialised scientific activity Part of this evolution has always included the interest of the public and archaeologists efforts to educate them As each new method and technique is developed and each new specialism is created the challenge of making archaeology available as a learning resource grows with it Today for example the issues which surround archaeology and heritage such as the pressures of tourism on sites now form part of many formal educational curricula This book the first to deal with the subject in such depth examines the place of education and outreach within the wider archaeological community Written by one of Britain s leading archaeological educationalists it charts the sometimes difficult and painful growth and development of education and archaeology Packed full of informative and enlightening case studies from the circus at Colchester to Sutton Hoo and Hadrian s Wall this work examines exactly how we have reached the point we are at where that place is and suggests areas for future development By drawing upon many decades of experience at the front line of archaeological education the author has produced a key text that will play a major role in the on going development of the heritage industry Publisher s website **Vrysaki** Sylvie Dumont, 2020-02-01

Between 1931 and 1939 central Athens was transformed by the expropriation and demolition of the Vrysaki neighborhood at the foot of the Acropolis In these few years more than 5 000 inhabitants were displaced and 348 properties were torn down so that the American School of Classical Studies at Athens ASCSA could excavate the ancient Agora the scale of the project and the degree to which it was documented make this a unique episode in the history of Greek archaeology Using materials from the ASCSA Archives and a large collection of photographs from the 1930s this volume details the history of the negotiations the expropriations and most importantly the Vrysaki neighborhood itself Illustrating its streets shops houses names and faces the author provides a vivid recreation of the community that was Vrysaki [Archaeological Sites](#) Sharon Sullivan, Richard Mackay, 2012 Edited anthology of 73 previously published texts on the theory and practice of the conservation and management of archaeological sites Provided by publisher e ancient past 1999 Jean Clottes and Christopher Chippindale Planned maintenance in the conservation and management of the archaeological site Final report P I S A Project 2002 Angela Maria Ferroni Chedworth Roman villa a methodology for the monitoring of in situ mosaics 2003 John Stewart Sarah Staniforth and Janet Berry Managing and conserving archaeological heritage in sub Saharan Africa 2011 Webber Ngoro Buddhist stupa and Thai social practice 1995 Denis Byrne From theory to practice objectives problems and indicators in the proof of authenticity 1999 El as Mujica B Beyond stone and mortar a Hopi perspective on the preservation of ruins and culture 2008 Lyle J Balenquah The shape of the dreaming the cultural significance of Victoria River rock art 1988 Darryl Lewis and Deborah Bird Rose Arches of radii corridors of power reflections on current archaeological practice 1992 Colin Pardoe Involving the local community in the decision making process the German APSARA project at Angkor Wat 2007 Simon

The Routledge Companion to the Philosophy of Architectural Reconstruction Zoltán Somhegyi, Lisa Giombini, 2024-05-30 This companion investigates the philosophical and theoretical foundations determining the conditions of possibility and the limits that make the conservation readaptation and transformation of past buildings legitimate operations As increasing ecological and economic challenges question opportunities for new construction the process of restoring transforming and readapting buildings for new or continued use is becoming an essential part of architectural practice At the same time the role of building conservation is changing from mere material preservation to being part of a broader strategy for social regeneration eco awareness and inclusive urban planning Chapters of this volume explore the complex set of considerations that inform decisions to merely preserve accurately restore or variously reuse a building They also look at the broader philosophical concerns such as ethical and aesthetic values combined with ideas of heritage history and collective identity Case studies on reconstruction after war gentrification the restoration of ancient edifices reconstruction following the effects of climate change and the use of technology solutions among many others make this a timely and urgent volume Adopting a broad transcultural perspective with contributions from five continents the volume combines theoretical approaches with more practical case study based investigations and will be of great interest to upper level students and academics working in the fields of architecture conservation urban design aesthetics and heritage management

Building Modern Antiquity Georgia Giannakopoulou,2024-11-29 This book considers post 19th century Athens as a unique instance of a secret side of metropolitan capitalism With a focus on modern antiquity as the hidden element of the dialectic between the past and the present it suggests that the sociological study of one of the great European capital cities a city not intended as a modern capital and its architectural representations may expose part of the veiled processes of the reconstruction of the past thus shedding light on the abuse of antiquity for the celebration of European capitalist metropolitan modernity From the glorious white marble cityscape of the 19th century that aimed at re enchanting metropolitan modernity to the inglorious grey reinforced concrete 21st century metropolis modern Athens exposes the battle between the modern and a modern image of antiquity a false socially constructed historiography born of the dialectics between the ancient and the modern the new and the old collective memory and collective forgetting As such The Building of a Modern Antiquity will appeal to scholars of sociology with interests in social and critical theory urban studies sociology of architecture and visual sociology

Photographs, Narratives, Materialities Philip Carabott, Yannis Hamilakis, Eleni Papargyriou, 2016-03-09 While written sources on the history of Greece have been studied extensively no systematic attempt has been made to examine photography as an important cultural and material process This is surprising given that Modern Greece and photography are almost peers both are cultural products of the 1830s and both actively converse with modernity Camera Graeca Photographs Narratives Materialities fills this lacuna It is the first inter disciplinary volume to examine critically and in a theorised manner the entanglement of Greece with photography The book argues that photographs and the photographic process as a whole have been instrumental in the reproduction of national imagination in the consolidation of the nation building process and in the generation and dissemination of state propaganda At the same time it is argued that the photographic field constitutes a site of memory and counter memory where various social actors intervene actively and stake their discursive material and practical claims As such the volume will be of relevance to scholars and photographers worldwide The book is divided into four tightly integrated parts The first Imag in ing Greece shows that the consolidation of Greek national identity constituted a material cum representational process the projection of an imagery although some photographic production sits uneasily within the national canon and may even undermine it The second part Photographic narratives alternative histories demonstrates the narrative function of photographs in diary keeping and in photobooks It also examines the constitution of spectatorship through the combination of text and image and the role of photography as a process of materializing counter hegemonic discourses and practices The third part Photographic matter realities foregrounds the role of photography in materializing state propaganda national memory and war The final part Photographic ethnographies **Athens** Insight Guides, Insight Guides Staff, 1998 *Education in Late Antiquity* Jan Stenger, 2022 Education in Late Antiquity examines the integration of educational thought in the ideas and practices of wider society in late antiquity Stenger shows that ideas about education particularly with reference to how education informed character formation changed during this period

Contested Antiquity Esther Solomon, 2021-02-02 While the archaeological legacies of Greece and Cyprus are often considered to represent some of the highest values of Western civilization democracy progress aesthetic harmony and rationalism this much adored and heavily touristed heritage can quickly become the stage for clashes over identity and memory In *Contested Antiquity* Esther Solomon curates explorations of how those who safeguard cultural heritage are confronted with the best ways to represent this heritage responsibly How should visitors be introduced to an ancient Byzantine fortification that still holds the grim reminders of the cruel prison it was used as until the 1980s How can foreign archaeological institutes engage with another nation's heritage in a meaningful way What role do locals have in determining what is sacred and can this sense of the sacred extend beyond buildings to the surrounding land Together the essays featured in *Contested Antiquity* offer fresh insights into the ways ancient heritage is negotiated for modern times

Architecture as Cultural and Political Discourse Daniel Grincer, 2016-02-26 This book is concerned with cultural and political discourses that affect the production of architecture It examines how these discursive mechanisms and technologies combine to normalise and aestheticise everyday practices It queries the means by which buildings are appropriated to give shape and form to political aspirations and values Architecture is not overtly political It does not coerce people to behave in certain ways However architecture is constructed within the same rules and practices whereby people and communities self govern and regulate themselves to think and act in certain ways This book seeks to examine these rules through various case studies including the reconstructed Notre Dame Cathedral the Nazi era Munich Königsplatz Auschwitz concentration camp and the Prora resort Sydney's suburban race riots and the Australian Immigration Detention Centre on Christmas Island
