

ASTRONOMY

Where are we in the universe? We live on Earth, the third planet of our solar system. Our solar system is located in the Milky Way Galaxy, a collection of 200 billion stars (together with their solar systems). The Milky Way Galaxy is located in a group of 30+ galaxies we call the Local Group. The Local Group is a part of a local supercluster of 100+ galaxies (called the Virgo Supercluster). This supercluster is one of millions of superclusters in the universe.

Solar System

Our solar system consists of the sun, planets, dwarf planets (or plutoids), moons, an asteroid belt, comets, meteors, and other objects. The sun is the center of our solar system; the planets, over 61 moons, the asteroids, comets, meteoroids and other rocks and gas all orbit the Sun. The Earth is the third planet from the sun in our solar system.
