African Mathematics History Textbook And Classroom Lessons:

African Mathematics: History, Textbook and Classroom Lessons Robin Walker, 2014-07-28 African Mathematics History Textbook and Study Guide aims to meet several objectives Firstly the book gives a historical overview of Africa and its contribution to Mathematics Secondly the book provides the teacher and the learner with study materials that can be used in the classroom Thirdly the book introduces some of the numerical patterns and puzzles that has fascinated one of the authors John Matthews Fourthly the book introduces the lectures classes and workshops that the two authors teach on these subjects Mathematics has an interesting history in Africa This history forms the first part of the book The earliest known mathematical artefact in human history is the Lebombo Bone Thought to be 37 000 years old it was discovered by archaeologists in South Africa Scholars believe that the number system carved into the bone represents a lunar calendar Later mathematical evidence comes from the Ishango region of Central Africa Ancient Egypt Medieval North Africa Ethiopia Medieval West Africa and Medieval Central Africa Mathematics teachers have asked for material that can be used in the classroom where these African mathematical ideas can be used tested or even challenged To this aim the second part of the book presents classroom material that can engage children Each lesson demonstrates a mathematical principle followed by classroom exercises that the pupils can attempt We have provided perhaps 22 hours worth of teaching and learning material The third part of this book was written wholly by John Matthews a secondary school mathematics teacher It contains a sample of his tips and short cuts that any pupil of mathematics can profitably use to improve their engagement with number Mr Matthews also believes that students of mathematics should enjoy detecting patterns in number sequences In the fourth part of the book he presents a sample of his own discoveries in this area He also presents classroom exercises that the pupils can attempt

Constructing Inequality in Multilingual Classrooms Luisa Martín Rojo, 2010-07-30 In her groundbreaking and innovative study the author takes us on a fascinating journey through some of Madrid s multilingual and multicultural schools and reveals the role played by linguistic practices in the construction of inequality through such processes as what she calls de capitalization and ethnicization Through a critical sociolinguistic and discourse analysis of the data collected in an ethnographic study the book shows the exclusion caused by monolingualizing tendencies and ideologies of deficit in education and society The book opens a timely discussion of the management of diversity in multilingual and multicultural classrooms both for countries with a long tradition of migration flows and for those where the phenomenon is relatively new as is the case in Spain This study of linguistic practices in the classroom makes clear the need to rethink some key linguistic concepts such as practice competence discourse and language and to integrate different approaches in qualitative research The volume is essential reading for students and researchers working in sociolinguistics education and related areas as well as for all teachers and social workers who deal with the increasing heterogeneity of our late modern societies in their work

Great Books Written by Africans across the Academic Disciplines Emmanuel D.

Babatunde, Abdul Karim Bangura, 2022-07-04 This volume is the first text to provide a comprehensive account of the great books across the academic disciplines written by Africans born in the continent and those who became naturalized citizens of African countries. These great books are those that have had a powerful important or affecting influence on the author of a chapter in this book as an individual and on society. The books included here are mostly of the storytelling type and thus not representative of most of the academic disciplines. This volume allows each contributor to write a chapter on a discipline showcasing five great books written by African authors. Each selection is appraised and suggestions made by other experts in a discipline while every chapter entails an introduction to the topic, a conceptual discussion of the discipline, a book by book review of the five books and a conclusion and recommendations for research using the selected books. *Arun Deep's*

Self-Help to ICSE Physics Class 10 : 2024-25 Edition (Based on Latest ICSE Syllabus) Amar Bhutani, 2024-02-28 Self Help to ICSE Physics Class 10 has been meticulously crafted to cater to the specific needs of 10th grade ICSE students.
