Kjaer, 2020-04-23 Political economy themes have directly and indirectly been a central concern of law and legal scholarship ever since political economy emerged as a concept in the early seventeenth century a development which was reinforced by the emergence of political economy as an independent area of scholarly enquiry in the eighteenth century as developed by the French physiocrats This is not surprising in so far as the core institutions of the economy and economic exchanges such as property and contract are legal institutions In spite of this intrinsic link political economy discourses and legal discourses dealing with political economy themes unfold in a largely separate manner Indeed this book is also a reflection of this in so far as its core concern is how the law and legal scholarship conceive of and approach political economy issues **Research Handbook on Transnational Environmental Law**

Veerle Heyvaert, Leslie-Anne Duvic-Paoli, 2020-11-27 This illuminating Research Handbook offers a detailed overview and critical discussion of the key themes and perspectives that characterize the burgeoning research area of transnational environmental law Varied perspectives from leading and emerging scholars are brought together to deliver methodological and conceptual frameworks for future research whilst providing an original view on this emerging field of law

Eco-Performance, Art, and Spatial Justice in the US Courtney B. Ryan, 2023-02-28 In *Eco Performance Art and Spatial Justice in the US* Courtney B Ryan traces how urban artists in the US from the 1970s until today contend with environmental domestication and spatial injustice through performance In theater art film and digital media the artists featured in this book perform everyday spatialized micro acts to contest the mutual containment of urbanites and nonhuman nature Whether it is plant artist Vaughn Bell going for a city stroll in her personal biosphere photographer Naima Green photographing Black urbanites in lush New York City parks guerrilla gardeners launching seed bombs into abandoned city lots or a satirical tweeter parodying BP's response to the 2010 Deepwater Horizon oil spill the subjects in this book challenge deeply engrained Western directives to domesticate nonhuman nature In examining how urban eco artists perform alternate ecologies that celebrate the interconnectedness of marginalized human vegetal and aquatic life Ryan suggests that small environmental performances can expose spatial injustice and increase spatial mobility Bringing a performance perspective to the environmental humanities this interdisciplinary text offers readers stymied by the global climate crisis a way forward It will appeal to a wide range of students and academics in performance media studies urban geography and environmental studies *Beyond Private Property* Clara Esteve-Jordà, 2025-09-10 This book highlights the inequity and lack of

sustainability generated by the modern conception of property as the cornerstone of the world capitalist economy that has led to the Anthropocene Through a comparative analysis of the right to property in various contemporary Western constitutions Clara Esteve Jordà examines its evolution as capitalism moves into a late neoliberal phase *The Anthropocene and the Humanities* Carolyn Merchant, 2020-01-01 A wide ranging and original introduction to the Anthropocene the Age of

Humanity that offers fresh theoretical insights bridging the sciences and the humanities From noted environmental historian Carolyn Merchant this book focuses on the original concept of the Anthropocene first proposed by Paul Crutzen and Eugene Stoermer in their foundational 2000 paper It undertakes a broad investigation into the ways in which science technology and the humanities can create a new and compelling awareness of human impacts on the environment Using history art literature religion philosophy ethics and justice as the focal points Merchant traces key figures and developments in the humanities throughout the Anthropocene era and explores how these disciplines might influence sustainability in the next century Wide ranging and accessible this book from an eminent scholar in environmental history and philosophy argues for replacing the Age of the Anthropocene with a new Age of Sustainability

Rights of Nature in Liberal Legal Systems and International Law Jasper Mührel, 2024-12-19 Rights of nature are on the rise worldwide having already been recognized in several states especially in Latin America and Asia For the first time in a monograph this book offers answers to the questions of whether and how rights of nature can also be implemented in Western liberal legal systems and in international law It traces how the latter are characterized by a deeply rooted anthropocentrism While at first glance this seems to make the recognition of rights of nature difficult to conceive the book shows that in the 21st century this strong anthropocentrism is neither helpful nor irrevocable and that non anthropocentric approaches can already be found in liberal legal systems and in international law Against the backdrop of the pressing environmental crises of the Anthropocene it offers liberal and international approaches to rights of nature In doing so the book analyzes the compatibility of rights of nature with Western liberal and international law and deals comprehensively with the criticism and potential benefits of rights of nature in order to ultimately provide concrete proposals for their implementation

Routledge Handbook of Nature and Environmental Aesthetics Glenn Parsons, Ned Hettinger, Sandra Shapshay, 2025-09-19 This handbook provides the first comprehensive overview of philosophical thinking about the aesthetics of the natural and human made environments exploring the topic s foundations key ideas and current debates Throughout history and across cultures people s perceptions of beauty and ugliness in their surroundings have been an important part of the human experience This volume contains more than 30 contributions from leading scholars examining environmental appreciation from a variety of perspectives Chapters cover a wide range of environments and issues including the aesthetics of animals natural sounds gardens the urban environment and the relation between aesthetics and environmentalism It also explores new topics such as the appreciation of nature in ancient thought love of place the traditional nature aesthetics of China and Japan and the aesthetics of climate change The Routledge Handbook of Nature and Environmental Aesthetics will be essential reading for students and scholars working on the aesthetics of environment as well as anyone who wants to think deeply about environmental beauty Scholars working in related fields outside academic philosophy such as geography landscape studies environmental psychology and environmental studies will also find it an invaluable guide to contemporary debates

Global Environmental Change and

Innovation in International Law Neil Craik, Cameron S. G. Jefferies, Sara L. Seck, Tim Stephens, 2018-06-28 Explores normative and institutional innovation in international law as a response to the challenges to global order posed by rapid environmental change

Posthuman Legalities Grear, Anna, Boulot, Emille, Vargas-Roncancio, Iván D., 2021-12-14 How might law address the multiple crises of meaning intrinsic to global crises of climate poverty mass displacements ecological breakdown species extinctions and technological developments that increasingly complicate the very notion of life itself How can law embrace in other words the posthuman condition a condition in which non human forces such as climate change and Covid 19 signal the impossibility of clinging to the existing imaginaries of Western legal systems and international law This carefully curated book addresses these and related questions bringing law beyond the human drawing on Indigenous legalities life ways and ontologies and New Materialist and Posthumanist approaches into stimulating proximity to each other

Free Gifts Alyssa Battistoni, 2025-08-19 A timely new critique of capitalism's persistent failure to value nature Capitalism is typically treated as a force for relentless commodification Yet it consistently fails to place value on vital aspects of the nonhuman world whether carbon emissions or entire ecosystems In Free Gifts Alyssa Battistoni explores capitalism's persistent failure to value nature arguing that the key question is not the moral issue of why some kinds of nature shouldn't be commodified but the economic puzzle of why they haven't been To understand contemporary ecological problems from biodiversity collapse to climate change she contends we have to understand how some things come to have value under capitalism and how others do not To help us do so Battistoni recovers and reinterprets the idea of the free gift of nature used by classical economic thinkers to describe what we gratuitously obtain from the natural world and builds on Karl Marx's critique of political economy to show how capitalism fundamentally treats nature as free for the taking This novel theory of capitalism's relationship to nature not only helps us understand contemporary ecological breakdown but also casts capitalism's own core dynamics in a new light Battistoni addresses four different instances of the free gift in political economic thought each in a specific domain natural agents in industry pollution in the environment reproductive labor in the household and natural capital in the biosphere In so doing she offers new readings of major twentieth century thinkers including Friedrich Hayek Simone de Beauvoir Garrett Hardin Silvia Federici and Ronald Coase Ultimately she offers a novel account of freedom for our ecologically troubled present developing a materialist existentialism to argue that capitalism limits our ability to be responsible for our relationships to the natural world and imagining how we might live freely while valuing nature's gifts

The Oxford Handbook of Global Studies Mark Juergensmeyer, Saskia Sassen, Manfred B. Steger (ed), 2019 Since the end of the Cold War globalization has been reshaping the modern world and an array of new scholarship has risen to make sense of it in its various transnational manifestations including economic social cultural ideological technological environmental and in new communications The chapters discuss various aspects in the field through a broad range of approaches This handbook focuses on global studies more than on the phenomenon of globalization itself although the

various aspects of globalization are central to understanding how the field is currently being shaped

Research Handbook on Global Climate Constitutionalism Jordi Jaria-Manzano, Susana Borràs, 2019-12-27 Climate change is causing traditional political and legal concepts to be revisited The emergence of a global polity through physical economic and social interaction demands global responses which should be founded upon new principles and which cannot simply be modelled on traditional constitutionalism centred on the nation state This Research Handbook explores how to build this climate constitutionalism at a global level starting from the narrative of Anthropocene and its implications for law It provides a critical approach to global environmental constitutionalism analysing the problems of sustainability and global equity which are entwined with the causes and consequences of climate change The Handbook explores how to develop constitutional discourses and strategies to address these issues and thereby tackle the negative effects of climate change whilst also advancing a more sustainable equitable and responsible global society

Democracy and the Politics of Silence Mónica Brito Vieira, 2024-10-29 Most people equate democracy with discussion speech and making one's voice heard But where does silence fit in Democracy and the Politics of Silence investigates the largely overlooked role of silence in democratic politics It challenges conventional wisdom by arguing that silence can support and affirm democratic pillars and outcomes like empowerment inclusion and equality The book focuses on a particular set of problems concerning the relationship between political silence and the democratic triad of voice agency and representation Each of the book's chapters draws on a selection of hand-picked case studies both historical and contemporary including the NAACP's Silent Parade in 1917 demonstrations by the Women in Black Spain's post-Franco Pact of Forgetting Trump's silent majority debates related to the representation of nonhuman beings and the famous Miranda judgment on the right to silence Together they offer an innovative ambitious investigation of democratically undesirable silences and practices of silence that are powerfully affirmative of democratic subjectivities aims and norms In thus expanding the repertoire of democratic citizenship Mónica Brito Vieira invites readers to consider what silence might teach them about democracy This timely book should appeal to political science students and scholars as well as anyone interested in the history of democracies and popular resistance movements

Picture Ecology Alan C. Braddock, Maura Coughlin, T. J. Demos, Rachael Z. DeLue, Mónica Domínguez Torres, Finis Dunaway, Stephen F. Eisenman, Emily Gephart, De-nin D. Lee, Gregory Levine, Anne McClintock, James Nisbet, Andrew Patrizio, Sugata Ray, Greg M. Thomas, 2021-10-26 Seeking a broad reexamination of visual culture through the lenses of ecocriticism environmental justice and animal studies this compendium offers a diverse range of art historical criticism formulated within an ecological context Picture Ecology brings together scholars whose contributions extend chronologically and geographically from 11th century Chinese painting to contemporary photography of California wildfires The book's 17 interdisciplinary essays provide a dynamic cross-cultural approach to an increasingly vital area of study emphasizing the environmental dimensions inherent in the content and materials of aesthetic objects Picture Ecology

provides valuable new approaches for considering works of art in ways that are timely intellectually stimulating and universally significant The Palgrave Handbook of Critical Physical Geography Rebecca Lave,Christine Biermann,Stuart N. Lane,2018-04-04 This handbook is recognition of the need to better integrate physical and human geography It combines a collection of work and research within the new field of Critical Physical Geography which gives critical attention to relations of social power with deep knowledge of a particular field of biophysical science Critical Physical Geography research accords careful attention to biophysical landscapes and the power relations that have increasingly come to shape them and to the politics of environmental science and the role of biophysical inquiry in promoting social and environmental justice The Palgrave Handbook of Critical Physical Geography lays out the scope and guiding principles of Critical Physical Geography research It presents a carefully selected set of empirical work demonstrating the range and intellectual strength of existing integrative work in geography research This handbook is the first of its kind to cover this emerging discipline and will be of significant interest to students and academics across the fields of geography the environment and sustainability In Search of Good Energy Policy Marc Ozawa,Jonathan Chaplin,Michael Pollitt,David Reiner,Paul Warde,2019-06-20 Offers an innovative look at why science and technology cannot alone meet the needs of energy policy making in the future
