The Radical Tradition (Routledge Revivals) Richard Gombin, 2012-11-12 Originally published in 1978 Richard Gombin's book traces the recurrent attitudes in the history of the European revolutionary movement which have criticized socialist and communist parties for their authoritarian and bureaucratic tendencies and which have stressed spontaneity and decentralization as the correct basis from which to change society From a critique of Marx through to an examination of Soviet practice under Lenin Trotsky and Stalin as a factor in the disillusionment of the left with the methods of the Russian Revolution Gombin's study examines the concepts of workers councils as they emerged in several countries after the First World War This comparative study develops the idea of a council communism as opposed to a party communism which he suggests is the fundamental concept in the criticism of orthodox Communism from the left

Wisdom in Early Confucian and Israelite Traditions Xinzhong Yao, 2016-02-11 Wisdom is an integrational part of all philosophical and religious traditions in the world Focusing on the concept of wisdom this book examines the difficulties and problems facing comparative studies of the early Confucian and Israelite traditions by exploring the cosmological and ethical implications of wisdom in the older layers of Christian and Confucian texts Presenting a detailed discussion of how wisdom was understood in philosophical religious and social contexts by the writers of the so called early Confucian and Israelite wisdom texts this book offers an invaluable contribution to our understanding of the significance of wisdom in the East and West and to our knowledge of different and yet related ways of life as understood in their literature

The Radical Tradition Richard Gombin, 2009-10-15 Originally published in 1978 Richard Gombin's book traces the recurrent attitudes in the history of the European revolutionary movement which have criticized socialist and communist parties for their authoritarian and bureaucratic tendencies and which have stressed spontaneity and decentralization as the correct basis from which to change society From a critique of Marx through to an examination of Soviet practice under Lenin Trotsky and Stalin as a factor in the disillusionment of the left with the methods of the Russian Revolution Gombin's study examines the concepts of workers councils as they emerged in several countries after the First World War This comparative study develops the idea of a council communism as opposed to a party communism which he suggests is the fundamental concept in the criticism of orthodox

Communism from the left **Theological Hermeneutics in the Classical Pentecostal Tradition** L. William Oliverio, 2012-08-01 In *Theological Hermeneutics in the Classical Pentecostal Tradition* L. William Oliverio Jr accounts for the development of Classical Pentecostal theological hermeneutics through four hermeneutical types and concludes with a philosophical basis for future Pentecostal theological hermeneutics within the contours of a hermeneutical realism Life as Spirit Keith Ka-fu Chan, 2018-08-21 Paul Tillich is exceptional in modern theologians that his distinctive and abundant understanding of the concept of life and spirit has the potential to engage with other disciplines such as biology psychology cosmology and social science and that his ontological understanding of life as spirit which is so crucial in the ecological consideration is so complex and subtle that enables powerful and critical inter religious dialogue in environmental ethics This book argues that despite the fact that Tillich did not engage in ecological and environmental theology directly his abundant personal experience of nature mysticism and intellectual understanding of the idea of nature rooted in his Lutheran and German idealist heritages and more importantly his ontological pneumatological holistic and multi dimensional conception of unifying and differentiated reality perfectly and organically coupled with the theonomous vision of theology of culture nature and morality is profoundly ecologically oriented Refiguring in Black Tendayi Sithole, 2023-06-13 *Refiguring in Black* is a meditation on black life and a meditation on the questions and concerns with which black life is confronted It takes the form of a critical engagement with the thought of Frederick Douglass Toni Morrison Hortense Spillers and Charles Mingus key figures in the black radical tradition Sithole does not reduce these thinkers to biographical subjects but examines them as figures of black thought in ways that are creative and generative Erudite and passionate this book is a statement of and testimony to refiguring as a form of critical practice by those who are engaged in a radical refusal and thus part of the long arc of the black radical tradition As a way of understanding the contemporary moment and unmasking antiblackness in all its forms and guises Sithole's work brings the annals of black thought into being in order to think differently and necessitate rupture refusing to concede to the order of things and refusing to be complicit in the dehumanization that has marked the black condition *Prophetic Encounters* Dan McKanan, 2011-11-01 A broad definitive history of the profound relationship between religion and movements for social change in America Though in recent years the religious right has been a powerful political force making religion and conservatism synonymous in the minds of many the United States has always had an active vibrant and influential religious Left In every period of our history people of faith have envisioned a society of peace and justice and their tireless efforts have made an indelible mark on our nation's history In *Prophetic Encounters* Dan McKanan challenges simple distinctions between religious and secular activism showing that religious beliefs and practices have been integral to every movement promoting liberty equality and solidarity From Frederick Douglass John Brown and Elizabeth Cady Stanton in the nineteenth century to Dorothy Day Martin Luther King Jr and Starhawk in the twentieth American radicals have maintained a deep faith in the human capacity to transform the world This radical faith has always

been intertwined with the religious practices of Christians and Jews pagans and Buddhists orthodox believers and humanist heretics Their vision and energies powered the social movements that have defined America s progress the abolition of slavery feminism the New Deal civil rights and others In this groundbreaking definitive work McKanan treats the histories of religion and the Left as a single history showing that American radicalism is a continuous tradition rather than a collection of disparate movements Emphasizing the power of encounter encounters between whites and former slaves between the middle classes and the immigrant masses and among activists themselves McKanan shows that the coming together of people of different perspectives and beliefs has been transformative for centuries uniting those whose faith is a source of activist commitment with those whose activism is a source of faith Offering a history of the diverse religious dimensions of radical movements from the American Revolution to the present day Prophetic Encounters invites contemporary activists to stand proudly in a tradition of prophetic power *The Esoteric in Religious and Spiritual Traditions* Patrick Laude,2025-06-28

This book offers a comparative examination of the esoteric dimension across diverse religions including Buddhism Christianity Hinduism and Islam It seeks to answer the question of whether the concept of the esoteric can be applied across traditions and explores intersections convergences and differences in its use and presence therein The book provides new avenues for research by moving beyond the study of Western esotericism and examining how the category of the esoteric can be applied in the contexts of Abrahamic faiths and Asian traditions The book is organized into six centers of reflection including the esoteric dialectics of hiding and revealing the claim of esoteric traditions to restore wholeness and provide a comprehensive understanding of reality the character of immediacy and directness the intrinsic esoteric distinction between two truths and the non dualistic leanings of esoteric schools in terms of the unity of reality and the subjective immanence of an all embracing Divine Selfhood Overall the book provides a comprehensive phenomenology of the esoteric in religions It will be of interest to researchers and students of theology and religious studies **The Doctrine of the Holy Spirit** Yacob Godebo,2025-07-03 The Scriptures teach the church that in biblical times the coming of the Holy Spirit equally entailed objective gift of divine reality and subjective experience of his presence gifts and works There was objective pouring out and imparting of the Holy Spirit from the divine side and subjective experiential demonstration from the receivers side which resulted from the gifts endowed and power imparted along with the Holy Spirit Having given them either verbally uttered or visibly performed gifts the Holy Spirit then moved believers towards practical demonstration through subjective experience Believers subjective experience took place only as a result of the objective gift of the Holy Spirit and the resulting endowment and empowerment Thus in the objective content of his manifestation the Holy Spirit is the objective gift of God to indwell his people In the subjective content of his manifestation the Holy Spirit endows people with audibly uttered or visibly performed gifts The subjective experience of the Holy Spirit s presence therefore is an original theological input from God just like the objective impartation of the Holy Spirit Practitioners were just objects of divine purpose and their subjective

experience was divine provided and divine initiated genuine experience beyond their consciousness and calculation Reception of the Holy Spirit therefore means equally an experience of his presence gifts power and works in the church and in with and through believers from Hosanna to Maranatha

Popular Politics in the History of South Africa, 1400-1948 Paul S. Landau, 2010-09-20 Popular Politics in the History of South Africa 1400 1948 offers an inclusive vision of South Africa s past Drawing largely from original sources Paul Landau presents a history of the politics of the country s people from the time of their early settlements in the elevated heartlands through the colonial era to the dawn of Apartheid A practical tradition of mobilization alliance and amalgamation persisted mutated and occasionally vanished from view it survived against the odds in several forms in tribalisms Christian assemblies and other seemingly hybrid movements and it continues today Landau treats southern Africa broadly concentrating increasingly on the southern Highveld and ultimately focusing on a transnational movement called the Samuelites He shows how people s politics in South Africa were suppressed and transformed but never entirely eliminated

The Oxford Encyclopedia of Women in World History Bonnie G. Smith, 2008 The Encyclopedia of Women in World History captures the experiences of women throughout world history in a comprehensive 4 volume work Although there has been extensive research on women in history by region no text or reference work has comprehensively covered the role women have played throughout world history The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe Historians have investigated womens daily lives in virtually every region and have researched the leadership roles women have filled across time and region They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected The Oxford Encyclopedia of Women in World History benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes The Encyclopedia contains over 1 250 signed articles arranged in an A Z format for ease of use The entries cover six main areas biographies geography and history comparative culture and society including adoption abortion performing arts organizations and movements such as the Egyptian Uprising and the Paris Commune womens and gender studies and topics in world history that include slave trade globalization and disease With its rich and insightful entries by leading scholars and experts this reference work is sure to be a valued go to resource for scholars college and high school students and general readers alike

The Encyclopedia of Strikes in American History Aaron Brenner, Benjamin Day, Immanuel Ness, 2015-01-28 Strikes have been part of American labor relations from colonial days to the present reflecting the widespread class conflict that has run throughout the nation s history Against employers and their goons against the police the National Guard local state and national officials against racist vigilantes against their union leaders and against each other American workers have walked off the job for higher wages better benefits bargaining rights legislation job control and just plain dignity At

times their actions have motivated groundbreaking legislation defining new rights for all citizens at other times they have led to loss of workers lives This comprehensive encyclopedia is the first detailed collection of historical research on strikes in America To provide the analytical tools for understanding strikes the volume includes two types of essays those focused on an industry or economic sector and those focused on a theme Each industry essay introduces a group of workers and their employers and places them in their economic political and community contexts The essay then describes the industry s various strikes including the main issues involved and outcomes achieved and assesses the impact of the strikes on the industry over time Thematic essays address questions that can only be answered by looking at a variety of strikes across industries groups of workers and time such as why the number of strikes has declined since the 1970s or why there was a strike wave in 1946 The contributors include historians sociologists anthropologists and philosophers as well as current and past activists from unions and other social movement organizations Photos a Topic Finder a bibliography and name and subject indexes add to the works appeal
