Against Physician Assisted Suicide A Palliative Care Perspective:

Against Physician Assisted Suicide David Jeffrey, 2009 The majority of doctors and nurses involved in specialist palliative care reject the legalisation of physician assisted suicide PAS This book explores the reasons why the healthcare professionals who have the most experience of caring for dying patients should object to a change in the law Debate about euthanasia and PAS often arises in response to a well publicised tragic case of unrelieved suffering Such heart rending stories do not reflect the fact that the majority of people dying have a dignified death There is a marked disparity between medical intuitions and the philosophers arguments about euthanasia and PAS It seems that part of the moral constitution of a doctor is a commitment not to intend the death of a patient and to protect them from harm The perspective of those who are privileged to care for thousands of dying patients and their families should inform the debate about PAS This book will enable those who are not working within palliative care to gain an insight into the scope of this speciality and to understand why legalisation of PAS should be resisted to maintain and improve care of dying patients Palliative Care Perspectives James L. Hallenbeck, 2003-07-03 Drawing from his extensive clinical experience and many years of teaching Dr Hallenbeck has written a guide to palliative care for clinicians Topics addressed range from an overview of death and dying to specific approaches to symptom management As an introduction to both the art and science of palliative care this book reflects the perspectives of one physician who has dedicated his career to this rapidly evolving field the book links real stories of illness with practical advice thereby delineating clinical practice in a way that reflects the daily concerns of clinicians *Assisted Dying for the Terminally Ill Bill (HL)* Great Britain: Parliament: House of Lords: Select Committee on the Assisted Dying for the Terminally Ill Bill, 2005-04-28 The Bill was published as HLB 4 session 2004 05 ISBN 01084188390 This volume contains a selection of the 14 000 personal letters and other submissions received by the Committee with regards to their inquiry into the Bill A New Holistic-Evolutive Approach to Pediatric Palliative Care Carlo V. Bellieni, 2022-05-26 This book illustrates why a holistic approach is important in Pediatric Palliative Care PPC Readers will learn this approach has a horizontal axis featuring the patients mental and physical needs as well as their environments It has also a vertical axis the evolutive changes of the patients throughout their development and their illness their aspirations and fears An evolutive or dynamic approach is mandatory Each child parent has a different experience of illness and a different path to recovery that is influenced by their age gender culture but also by the state of their grief To take care of them we need to know the state of the subjects we are dealing with throughout their evolution in age children and in sorrow both children and parents Jung s and Piaget schemes will be of support This book also helps caregivers to know what ethics is It teaches a new insight on the word ethics not a series of principles or norms but an approach based on humanistic virtues Two criteria will be proposed to this aim an ethics based on the refusal of inauthentic behaviors or those behaviors that are copies of animals or machines and a new criterion that even children have some ethical duties not based on rules but on naturally acceptance that their

sight is modulated by the presence of their parents and friends This ethical approach is explained to caregivers in a practical mode ready for clinical exigencies This book is also unique because it demonstrates that PPC also involves the true care of caregivers It will explain how to approach measure and overcome caregivers burn out Special attention is devoted to the approach to babies and children s pharmacological and non pharmacological analgesia and sedation Pain assessment methods will be illustrated as well as the development of a PPC web on the territory This text includes perinatal and neonatal PPC The book will be of valuable support to all those intensivists pediatricians nurses psychologists physiotherapists and healthcare professionals working in PPC units **International Perspectives on End-of-Life Law Reform** Ben P.

White,Lindy Willmott,2021-12-09 Addresses the vexed question of how and why reform of end of life law occurs drawing on ten international case studies **Oxford Textbook of Palliative Medicine** Nathan I. Cherny,Marie Fallon,Stein

Kaasa,Russell K. Portenoy,David Currow,2015 Emphasising the multi disciplinary nature of palliative care the fourth edition of this text also looks at the individual professional roles that contribute to the best quality palliative care **End of Life Choices for Cancer Patients** Ruth E Board,Michael I Bennett,Penney Lewis,John Wagstaff,Peter Selby,2020-04-10 Legal

change on the provision of assisted dying by healthcare professionals has occurred in a substantial number of jurisdictions This work brings together contributions on end of life choices from experienced professionals from oncology disciplines palliative care law nursing and professions allied to medicine The goals are To better inform cancer care professionals and the wider community about developments in choices in end of life care for cancer patients internationally To better answer questions from patients and respond to their requests including questions about and requests for assisted dying in countries where it is legal To have a balanced and well informed dialogue about choices available to patients without developing a formal policy position on change in law To provide a basis of information for future educational activities New

Perspectives on the End of Life: Essays on Care and the Intimacy of Dying Lloyd Steffen,Nate Hinerman,2020-10-12 This volume was first published by Inter Disciplinary Press in 2012 This inter disciplinary volume gathers scholars from around the world to explore clinical cultural and ethical perspectives on end of life care not only for the dying but also for those who attend the dying as caregivers **Sedation at the End-of-life: An Interdisciplinary Approach** Paulina

Taboada,2014-10-21 The book s main contribution is its interdisciplinary approach to the issue of sedation at the end of life Because it occurs at the end of life palliative sedation raises a number of important ethical and legal questions including whether it is a covert form of euthanasia and for what purposes it may legally be used Many of the book chapters address the first question and almost all deal with a specific form of the second whether palliative sedation should be used for those experiencing existential suffering This raises the question of what existential suffering is a topic that is also discussed in the book The different chapters address these issues from the perspectives of the relevant disciplines Palliative Medicine Bioethics Law and Theology Hence helpful accounts of the clinical and historical background for this issue are provided and

the importance of drawing accurate ethical and legal distinctions is stressed throughout the whole book So the volume represents a valuable contribution to the emerging literature on this topic and should be helpful across a broad spectrum of readers philosophers theologians and physicians

Alzheimer's Disease, Media Representations and the Politics of Euthanasia Megan-Jane Johnstone, 2016-04-15 Drawing on extensive data including news media reports and commentaries documentaries courts and court reports films websites professional literature and government and non government agencies this book explores the Alzheimerisation of the euthanasia debate examining the shift in recent years in public attitudes towards the desirability and moral permissibility of euthanasia as an end of life solution for people living with the disease not just at its end stage but also at earlier stages With attention to media representations and public understandings of Alzheimer's disease Alzheimer's Disease Media Representations and the Politics of Euthanasia sheds light on the processes contributing to these changes in public opinion investigating the drivers of vexed political debate surrounding the issue and examining the manner in which both sides of the euthanasia debate mobilise support portray their opponents and make use of media technologies to frame the terms of discourse Paving the way for a greater level of intellectual honesty with regard to an issue carrying significant policy implications this book will be of interest to scholars of media and communication social movements and political communication and the sociology of health and medicine as well as researchers and professionals in the fields of palliative and end of life care

Contemporary European Perspectives on the Ethics of End of Life Care Nathan Emmerich, Pierre Mallia, Bert Gordijn, Francesca Pistoia, 2020-05-12 This book examines the ethics of end of life care focusing on the kinds of decisions that are commonly made in clinical practice Specific attention is paid to the intensification of treatment for terminal symptoms particularly pain relief and the withdrawal and withholding of care particularly life saving or life prolonging medical care The book is structured into three sections The first section contains essays examining end of life care from the perspective of moral theory and theology The second sets out various conceptual terms and distinctions relevant to decision making at the end of life The third section contains chapters that focus on substantive ethical issues This format not only provides for a comprehensive analysis of the ethical issues that arise in the context of end of life care but allows readers to effectively trace the philosophical theological and conceptual underpinnings that inform their specific interests This work will be of interest to scholars working in the area as well as clinicians specialists and healthcare professionals who encounter these issues in the course of their practice

Culver, K. Danner Clouser, 2006-02-16

An updated and expanded successor to Culver and Gert's *Philosophy in Medicine* this book integrates moral philosophy with clinical medicine to present a comprehensive summary of the theory concepts and lines of reasoning underlying the field of bioethics Rather than concentrating narrowly on bioethics and investigating moral philosophy only marginally the authors provide an explicit account of common morality and show how it applies to and is modified by the realities of clinical medicine Such broader knowledge finds its specific practical application when one attempts to resolve the more complex and difficult cases This book does not attempt to settle all controversial matters but rather provides an ethical framework that various parties to the dispute can accept and use as a basis for reaching agreement Thus the authors' main goal is to facilitate ethical discussion Their detailed analyses of death and disease maintain the theoretical objectivity of these concepts while recognizing their central role in social and medical practices They also provide in depth discussions of the central concepts and issues in bioethics competence consent justification for moral rule violations and confidentiality Paternalism one of the most pervasive problems in clinical medicine is accorded special attention All these concepts have been integrated and systematically grounded within common morality The book is richly illustrated with discussions of clinical cases The authors explicitly compare their position with other accounts of bioethics such as principlism casuistry and virtue theory Their discussion of euthanasia and physician assisted suicide clarifies and evaluates the recent legal decisions on these topics The arguments throughout the volume stand out with characteristic clarity and cogency A fresh and all encompassing approach to bioethics that does not shy away from controversy *Bioethics: A Return to Fundamentals* will interest not only students in philosophy of medicine and medical ethics courses but also moral philosophers and bioethicists as well as doctors nurses and other health care professionals *The Palgrave Handbook of Philosophy and Public Policy*

David Boonin, 2018-10-08 This book brings together a large and diverse collection of philosophical papers addressing a wide variety of public policy issues. Topics covered range from long standing subjects of debate such as abortion punishment and freedom of expression to more recent controversies such as those over gene editing military drones and statues honoring Confederate soldiers. Part I focuses on the criminal justice system including issues that arise before during and after criminal trials. Part II covers matters of national defense and sovereignty including chapters on military ethics terrorism and immigration. Part III which explores political participation manipulation and standing includes discussions of issues involving voting rights the use of nudges and claims of equal status. Part IV covers a variety of issues involving freedom of speech and expression. Part V deals with questions of justice and inequality. Part VI considers topics involving bioethics and biotechnology. Part VII is devoted to beginning of life issues such as cloning and surrogacy and end of life issues such as assisted suicide and organ procurement. Part VIII navigates emerging environmental issues including treatments of the urban environment and extraterrestrial environments.

Oxford Textbook of Palliative Nursing Betty R. Ferrell, Nessa Coyle, Judith A. Paice, 2015 The Oxford Textbook of Palliative Nursing is the definitive text on nursing care of the seriously ill and dying. It is a comprehensive work addressing all aspects of palliative care including physical psychological social and spiritual needs. The text is written by leaders in the field and includes an impressive section on international palliative care. Each chapter includes case examples and a strong evidence base to support the highest quality of care. The book is rich with tables and figures offering practical resources for clinical practice across all settings of care and encompassing all ages from pediatrics to geriatrics.

Principles of Medical Law Ian Kennedy, 2010-12-09 Replete with references to primary sources and the secondary literature this major undertaking provides a comprehensive exposition of English medical law from the organization of health care to the legal meaning of death.

Nonviolence Unbound Brian Martin, 2015-04-23 methods of nonviolent action can be used to bring down dictators. Nonviolence Unbound shows how insights into what makes nonviolent action effective can be applied to four completely different arenas: defending against verbal abuse responding to online defamatory pictures and engaging in the struggles over euthanasia and vaccination. This investigation shows how to analyse options for opposing injustice.

Handbook of Psychiatry in Palliative Medicine Harvey Max Chochinov, William Breitbart, 2009 Eight years has passed since the first edition of The Handbook of Psychiatry in Palliative Medicine was published. In that time psychiatric or psychosocial palliative care has evolved. The net effect on palliative medicine has been transformative. Palliation that neglects psychosocial dimensions of patient and family experience de facto fails to meet contemporary standards of comprehensive palliative care. While a focus on somatic issues has sometimes overshadowed attention to psychological existential and spiritual end of life challenges the past decade has seen an all encompassing multidisciplinary approach to care for the dying beginning to take hold. The first comprehensive textbook of psychiatric palliative care this new edition has been fully updated reorganized and expanded to include eleven new chapters. Written by 67

internationally known psychiatry and palliative care experts the book is truly an essential reference for all providers of palliative care including psychiatrists psychologists mental health counselors oncologists hospice workers and social workers Each chapter has been updated to address new therapeutic modalities and approaches as well as new research trends and opportunities for each topic

Medical Assistance in Dying (MAID) in Canada Jaro Kotalik, David W. Shannon, 2023-07-25 This book written both for a Canadian and an international readership provides a multidisciplinary review of the framework and performance of the Canadian Medical Assistance in Dying MAID program In the first five years 2015 2021 of operation this program delivered voluntary euthanasia and assistance in suicide to over 30 000 Canadian residents presently representing a 30% annual growth Looking back on these first five years the 30 Canadian scholars and clinicians contributing to this volume raise important issues and attempt to answer key questions that have arisen in regards to its operation and its stated objectives This volume strikes the most appropriate balance between the autonomy of persons who seek medical assistance versus the interests and protection of vulnerable persons Finally the book makes suggestions on how the program can presently be improved It identifies gaps in knowledge about MAID s operational program and its impact on individuals families and society in order to stimulate the necessary research that is essential to the evolution of a healthy and well balanced program As a first comprehensive examination of medically assisted deaths in Canada this publication will be of great value to lay

professional academic political audiences both domestically and internationally especially in jurisdictions that are examining their options of permitting assisted deaths
