Affective Narratology:

Affective Narratology Patrick Colm Hogan, 2011-11-01 Stories engage our emotions We've known this at least since the days of Plato and Aristotle What this book helps us to understand now is how our own emotions fundamentally organize and orient stories In light of recent cognitive research and wide reading in different narrative traditions Patrick Colm Hogan argues that the structure of stories is a systematic product of human emotion systems Examining the ways in which incidents events episodes plots and genres are a function of emotional processes he demonstrates that emotion systems are absolutely crucial for understanding stories Hogan also makes a case for the potentially integral role that stories play in the development of our emotional lives He provides an in depth account of the function of emotion within story in widespread genres with romantic heroic and sacrificial structures and more limited genres treating parent child separation sexual pursuit criminality and revenge as these appear in a variety of cross cultural traditions In the course of the book Hogan develops interpretations of works ranging from Tolstoy's Anna Karenina to African oral epics from Sanskrit comedy to Shakespearean tragedy Integrating the latest research in affective science with narratology this book provides a powerful explanatory account of narrative organization

Managing Emotion in Byzantium Margaret Mullett, Susan Ashbrook

Harvey, 2022-09-30 Byzantinists entered the study of emotion with Henry Maguire's ground-breaking article on sorrow published in 1977. Since then, classicists and western medievalists have developed new ways of understanding how emotional communities work and where the ancient concepts of emotion differ from our own, and Byzantinists have begun to consider emotions other than sorrow. It is time to look at what is distinctive about Byzantine emotion. This volume is the first to look at the constellation of Byzantine emotions. Originating at an international colloquium at Dumbarton Oaks, these papers address issues such as power, gender, rhetoric, or asceticism in Byzantine society through the lens of a single emotion or cluster of emotions. Contributors focus not only on the construction of emotions with respect to perception and cognition but also explore how emotions were communicated and exchanged across broad, multi-linguistic, political, and social boundaries. Priorities are twofold: to arrive at an understanding of what the Byzantines thought of as emotions and to comprehend how theory shaped their appraisal of reality. *Managing Emotion in Byzantium* will appeal to researchers and students alike interested in Byzantine perceptions of emotion, Byzantine culture, and medieval perceptions of emotion.

Language and Emotion. Volume 3 Gesine Lenore Schiewer, Jeanette Altarriba, Bee Chin Ng, 2023-05-08 The Handbook consists of four major sections. Each section is introduced by a main article: Theories of Emotion, General Aspects, Perspectives in Communication Theory, Semiotics and Linguistics, Perspectives on Language and Emotion in Cultural Studies, Interdisciplinary and Applied Perspectives. The first section presents interdisciplinary emotion theories relevant for the field of language and communication research, including the history of emotion research. The second section focuses on the full range of emotion-related aspects in linguistics, semiotics, and communication theories. The next section focuses on cultural studies and language and emotion, emotions in arts and literature, as well as research on emotion in literary studies and media and emotion. The final section covers different domains: social practices and applications such as society, policy, diplomacy, economics, and business communication; religion and emotional language; the domain of affective computing in human-machine interaction; and language and emotion research for language education. Overall, this Handbook represents a comprehensive overview in a rich, diverse compendium never before published in this particular domain.

Slow Narrative and Nonhuman Materialities Marco Caracciolo, 2022-03 Marco Caracciolo investigates how the experience of slowness in contemporary narrative practices can create a vision of interconnectedness between human communities and the nonhuman world in an era marked by dramatically shifting climate patterns.

Possible Worlds Theory and Contemporary Narratology Alice Bell, Marie-Laure Ryan, 2019-01-01 The notion of possible worlds has played a decisive role in postclassical narratology by awakening interest in the nature of fictionality and in emphasizing the notion of world as a source of aesthetic experience in narrative texts. As a theory concerned with the opposition between the actual world that we belong to and possible worlds created by the imagination, possible worlds theory has made significant contributions to narratology. *Possible Worlds Theory and Contemporary Narratology* updates the field of possible worlds theory and postclassical narratology by developing this

theoretical framework further and applying it to a range of contemporary literary narratives This volume systematically outlines the theoretical underpinnings of the possible worlds approach provides updated methods for analyzing fictional narrative and profiles those methods via the analysis of a range of different texts including contemporary fiction digital fiction video games graphic novels historical narratives and dramatic texts Through the variety of its contributions including those by three originators of the subject area Lubomír Doležel Thomas Pavel and Marie-Laure Ryan *Possible Worlds Theory and Contemporary Narratology* demonstrates the vitality and versatility of one of the most vibrant strands of contemporary narrative theory

Experience, Narrative, and Criticism in Ancient Greece Jonas Grethlein, Luuk Huitink, Aldo Carlo Fernando Tagliabue, 2020 Drawing on cognitive approaches to literary studies this volume pursues a new approach to ancient Greek narrative that transcends the taxonomies of structuralist narratologies deploying concepts such as immersion and embodiment in order to establish a more comprehensive understanding of ancient Greek narrative and ancient reading habits

Narrative Complexity Marina Grishakova, Maria Poulaki, 2019-08-01 The variety in contemporary philosophical and aesthetic thinking as well as in scientific and experimental research on complexity has not yet been fully adopted by narratology By integrating cutting edge approaches this volume takes a step toward filling this gap and establishing interdisciplinary narrative research on complexity *Narrative Complexity* provides a framework for a more complex and nuanced study of narrative and explores the experience of narrative complexity in terms of cognitive processing affect and mind and body engagement Bringing together leading international scholars from a range of disciplines this volume combines analytical effort and conceptual insight in order to relate more effectively our theories of narrative representation and complexities of intelligent behavior This collection engages important questions on how narrative complexity functions as an agent of cultural evolution how our understanding of narrative complexity can be extended in light of new research in the social sciences and humanities how interactive media produce new types of narrative complexity and how the role of embodiment as a factor of narrative complexity acquires prominence in cognitive science and media studies The contributors explore narrative complexity transmitted through various semiotic channels embedded in multiple contexts and experienced across different media including film comics music interactive apps audiowalks and ambient literature

Narrative, Perception, and the Embodied Mind Lilla Farmasi, 2022-09-02 This book encourages cross disciplinary dialogues toward introducing a new framework for neuro narratology expanding on established theory within cognitive narratology to more fully encompass the different faculties involved in the reading process To investigate narrative cognition the book traces the ways in which cognitive patterns of embodiment and the neural connections that comprise them in the reading process are translated into patterns in narrative fiction Drawing theories of episodic memories and nonvisual perception of space Farmasi draws on theories of episodic memories and nonvisual perception of space in analyzing a range of narratives from twentieth century prose The first set of analyses shines a light on perception and emotion in narrative discourses and the

construction of storyworlds while the second foregrounds the reader's experience. The volume makes the case for the fact that narratives need to be understood as dynamic elements of the interaction between mind, body, and environment, generating new insights and inspiring further research. This book will appeal to scholars interested in narrative theory, literary studies, cognitive science, neuroscience, and philosophy.
