African Fractals Modern Computing And Indigenous Design:

African Fractals Ron Eglash, 1999 Fractals are characterized by the repetition of similar patterns at ever diminishing scales Fractal geometry has emerged as one of the most exciting frontiers on the border between mathematics and information technology and can be seen in many of the swirling patterns produced by computer graphics It has become a new tool for modeling in biology geology and other natural sciences Anthropologists have observed that the patterns produced in different cultures can be characterized by specific design themes In Europe and America we often see cities laid out in a grid pattern of straight streets and right angle corners In contrast traditional African settlements tend to use fractal structures circles of circles of circular dwellings rectangular walls enclosing ever smaller rectangles and streets in which broad avenues branch down to tiny footpaths with striking geometric repetition These indigenous fractals are not limited to architecture their recursive patterns echo throughout many disparate African designs and knowledge systems Drawing on interviews with African designers artists and scientists Ron Eglash investigates fractals in African architecture traditional hairstyling textiles sculpture painting carving metalwork religion games practical craft quantitative techniques and symbolic systems He also examines the political and social implications of the existence of African fractal geometry His book makes a unique contribution to the study of mathematics African culture anthropology and computer simulations **Global Africa**

Dorothy Hodgson, Judith Ann-Marie Byfield, 2017-08 Global Africa will complicate conventional views of Africa as a place of violence despair and victimhood a place and space that other people states and organizations act on and steal from Instead they aim to document some of the significant global connections circulations and contributions that African people ideas and goods have made in the world not just in the United States but in South Asia Latin America Europe and elsewhere They will showcase new framings of Africa but will not romanticize the conditions and circumstances in which too many people on the continent currently live The essays in this volume will amplify those voices that offer complex and insightful explanations strategies for solutions and inspiration for the future Provided by publisher **Uwenzi** David O. Nanotechnology and Global Sustainability Donald Maclurcan, Natalia Radywyl, 2018-09-03 The rise of collaborative consumption peer to peer systems and not for profit social enterprise heralds the emergence of a new era of human collectivity Increasingly this consolidation stems from an understanding that big banner issues such as climate change are not the root causes of our present global predicament There is a growing and collective view that issues such as this are actually symptoms of a much more vicious seemingly insurmountable condition our addiction to economic consumption and population growth in a world of finite

resources Nanotechnology and Global Sustainability uses nanotechnology the product of applied scientific knowledge to control and utilize matter at atomic and molecular scales as a lens through which to explore the interrelationship between innovation politics economy and sustainability This groundbreaking book addresses how stakeholders can actively reshape agendas to create positive and sustainable futures through this latest controversial cross sectoral technology It moves beyond issues of efficiency productivity and utility exploring the insights of 22 contributors from around the world whose work spans the disciplines of science and the humanities Their combined knowledge reinforced with various case studies introduces an exciting prospect how we can innovate without economic growth This new volume in the Perspectives in Nanotechnology series is edited by Dr Donald Maclurcan and Dr Natalia Radywyl Dr Maclurcan is a social innovator and Honorary Research Fellow with the Institute for Nanoscale Technology at the University of Technology Sydney Australia Dr Radywyl is a social researcher and Honorary Research Fellow in the School of Culture and Communication at the University of Melbourne Australia She is also an Adjunct Research Fellow in the Faculty of Life and Social Sciences at Swinburne University of Technology Melbourne This book is written for a wide audience and will be of particular interest to activists scholars policy makers scientists business professionals and others who seek an understanding of how we might justly transition to sustainable societies

The Postcolonial Turn Francis B. Nyamnjoh, 2011 This innovative book is a forward looking reflection on mental decolonisation and the postcolonial turn in Africanist scholarship As a whole it provides five decennia long lucid and empathetic research involvements by seasoned scholars who came to live in local people's own ways significant daily events experienced by communities professional networks and local experts in various African contexts The book covers materials drawn from Botswana Cameroon the Democratic Republic of Congo Mozambique Nigeria South Africa and Tanzania Themes include the Whelan Research Academy rap musicians political leaders wise men and women healers Sacred Spirit churches diviners bards and weavers who are deemed proficient in the classical African geometrical knowledge As a tribute to late Archie Mafeje who showed real commitment to decolonise social sciences from western centred modernist development theories commentators of his work pinpoint how these theories sought to dismiss the active role played by African people in their quest for self emancipation One of the central questions addressed by the book concerns the role of an anthropologist and this issue is debated against the background of the academic lecture delivered by Ren Devisch when receiving an honorary doctoral degree at the University of Kinshasa The lecture triggered critical but constructive comments from such seasoned experts as Valentin Mudimbe and Wim van Binsbergen They excoriate anthropological knowledge on account that the anthropologist notwithstanding his or her social and cognitive empathy and intense communication with the host community too often fails to also question her own world and intellectual habitus from the standpoint of her hosts Leading anthropologists carry further into great depth the bifocal anthropological endeavour focussing on local people's re imagining and re connecting the local and global The book is of interest to a wide readership in the humanities social

sciences philosophy and the history of the African continent and its relation with the North The African Mother Tongue and Mathematical Ideas Abdul Karim Bangura, 2020-06-02 This book by renowned scholar Dr Abdul Karim Bangura combines linguistics and mathematics to show how and why African centred mathematical ideas can be a driving force in Africa's development efforts Bangura explores the concept that Africa has been the centre of the History of Mathematics for thousands of years as the civilizations that emerged across the continent developed contributions which would enrich both ancient and modern understanding of nature through mathematics However scholars and other professionals working in the field of mathematics education in Africa have identified a plethora of issues in carrying out their tasks This is highlighted by one of the most compelling arguments in the book which is that a major reason for these problems is the fact that the African mother tongues has been greatly neglected in the teaching of mathematics in the continent Bangura asserts that a change has to be made in order for Africa to benefit from the exceptional opportunities mathematics offer showing that even if there is a great body of work connecting linguistics and mathematics few analyses have been performed on the link between African languages and mathematics and the ones that have been made are not theoretically grounded on linguistics Thus the book begins by identifying the objects of study of linguistics and mathematics and delineates which ones they have in common Next since the object of study of linguistics is language the nine design features of language are employed to examine each of the objects as it pertains to African languages After that mathematical ideas of sustainability and those of tipping points are suggested as means to help Africa's development efforts **Re-engaging the African Diasporas**

Charles Quist-Adade, Wendy Royal, 2016-08-17 Re engaging the African Diasporas Pan Africanism in the Age of Globalization is the second volume in the Kwame Nkrumah International Conference series and brings together twenty selected papers presented at the Third Kwame Nkrumah International Conference held at Kwantlen Polytechnic University on August 19-21 2014 Two premises inform this volume 1 If the history of slavery and its vestiges divided and continue to divide the continent and its Diasporas modern technology should be harnessed to bridge that divide and 2 the continent's development is a boon to the development of what the African Union has dubbed Africa's Sixth Region The book threads together papers that seek to give academic and intellectual impetus to tie the continent's development to that of the African Diaspora The goal is to end the inertia and inward looking on the part of scholars and academics in both Africa and African International or Global Africa and re engage one another in more productive ways By harnessing the enormous resources available in our internet age and riding the cresting wave of globalization the task of re engagement will be vastly enhanced and the debates and discussions in this volume will serve to facilitate this re engagement A main highlight of the conference was a special tribute to Nelson Mandela to honour his death in December 2013 and celebrate 20 years of South African independence In these papers scholars examine Mandela's role in the transition of South Africa from a racist state to a democratic nation They critically examine how the ANC's policies have impacted post Apartheid South Africa and question what alternatives remain for the

future Sustainable Development in Post-Pandemic Africa Fred Olayele,Yiagadeesen Samy,2022-10-21 With both domestic and external financing expected to dry up in the wake of the COVID 19 pandemic this book argues that there is a need for fresh ideas and new strategies for achieving sustainable development in Africa In addition to triggering the most severe recession in nearly a century the COVID 19 pandemic has disrupted global value chains causing unprecedented damage to healthcare systems economies and well being hitting the world s most vulnerable people the hardest Even before the pandemic Africa was suffering from the effects of low commodity prices sluggish GDP growth high debt levels low levels of domestic savings and weak private capital inflows This book argues that now as the continent emerges from the current crisis it will be important to reconfigure current financing sources under a forward looking framework that incorporates other non traditional financing tools and mechanisms such as public private partnerships sovereign wealth funds gender lens investing new growth drivers and emerging and disruptive technologies Finally the book concludes by adopting a sectoral approach and examining the real economy impacts of new growth drivers such as agriculture value chains industrialization tourism and the blue economy Drawing on a range of original research as well as insights from practice this book will be a useful guide for Global Development and African Studies researchers as well as for policy makers investors finance
