Methodologies to Real-World Applications Takao Terano, Hajime Kita, Toshiyuki Kaneda, Kiyoshi Arai, Hiroshi

Deguchi, 2006-06-18 Agent based modeling simulation is an emerging field that uses bottom up and experimental analysis in the social sciences Selected research from that presented at the Third International Workshop on Agent Based Approaches in Economic and Social Complex Systems 2004 held in May 2004 in Kyoto Japan is included in this book The aim of the

workshop was to employ the bottom up approach to social and economic problems by modeling simulation and analysis using a software agent This research area is an emerging interdisciplinary field among the social sciences and computer science attracting broad attention because it introduces a simulation based experimental approach to problems that are becoming increasingly complex in an era of globalization and innovation in information technology The state of the art research and findings presented in this book will be indispensable tools for anyone involved in this rapidly growing discipline

Gaming, Simulations and Society R. Shiratori, K. Arai, F. Kato, 2006-03-20 The Japan Association of Simulation Gaming JASAG and the Science Council of Japan SCJ hosted ISAGA 2003 the 34th annual conference of the International Simulation and Gaming Association ISAGA at Kazusa Akademia Park in Kisarazu Japan August 25-29 2003 About 450 participants and guests attended with 330 from Japan and 101 from 34 other countries The number of submitted papers and reports exceeded 210 and in addition many poster presentations and experiential sessions were held This book is made up of 30 papers submitted to ISAGA 2003 and provides a good example of the diverse scope and standard of research achieved in simulation and gaming today The theme of ISAGA 2003 was Social Contributions and Responsibilities of Simulation and Gaming Looking back over the history of simulation and gaming research in Japan in 1991 JASAG hosted ISAGA 1991 in Kyoto However even though there were only 12 years between ISAGA 1991 and ISAGA 2003 and both conferences were held in the same country Japan for Japanese researchers the meaning of hosting these two international conferences of simulation and gaming research was very different

Agent-Based Approaches in Economic and Social Complex Systems VIII Yutaka Nakai, Yuhsuke Koyama, Takao

Terano, 2015-06-05 Agent based modeling simulation is an emergent approach to the analysis of social and economic systems It provides a bottom up experimental method to be applied to social sciences such as economics management sociology and politics as well as some engineering fields dealing with social activities This book includes selected papers presented at the Eighth International Workshop on Agent Based Approaches in Economic and Social Complex Systems held in Tokyo Japan in 2013 At the workshop 23 reviewed full papers were presented and of those 13 were selected to be included in this volume

Economics as an Agent-Based Complex System H. Deguchi, 2004-03-26 In agent based modeling the focus is very much on agent based simulation as simulation is a very important tool for agent based modeling We also use agent based simulation in this book with a stress on the mathematical foundation of agent based modeling We introduce two original mathematical frameworks a theory of SLD Social Learning Dynamics and an axiomatic theory of economic exchange Exchange Algebra among agents Exchange algebra gives bottom up reconstruction of SNA System of National Accountings SLD provides the concept of indirect control of socio economic systems to manage structural change and its stability We also compare agent based simulation with gaming simulation and investigate the epistemological foundation of agent based modeling

Meeting the Challenge of Social Problems via Agent-Based Simulation T. Terano, H. Deguchi, K. Takadama, 2012-12-06 The series of international workshops on Agent Based Approaches in Economic and Social Complex Systems AESCS is part of the worldwide activities on computational social and organizational sciences The second workshop AESCS 02 focusing on progress of agent based simulation was held in Tokyo in August 2002 AESCS 02 explored the frontiers of the field The importance of cumulative progress was emphasized in discussions of common tasks standard computational models replication and validation issues and evaluation and verification criteria Promoting multidisciplinary work in computational economics organizational science social dynamics and complex systems AESCS 02 brought together researchers from diverse fields This book contains the invited papers by Robert Axtell Shu Heng Chen and Takao Terano along with selected papers collected in three major sections Economic Systems Marketing and Management and Social Systems and Methodology

Legacy and Future Impact of Gaming Simulation Pioneers Willy Christian Kriz, Toshiko Kikkawa, Marieke de Wijse-Van Heeswijk, Heide Lukosch, 2025-04-10 This book is a tribute to two pioneers in the field of gaming simulation Richard de la Barre Duke and Cathy Stein Greenblat Duke was a professor of urban planning at the University of Michigan who introduced gaming simulation into urban planning and policy making in the early 1970s With his 1974 book *Gaming The future* s language he proposed simulation games as a multilogue language for bringing different disciplines and stakeholders perspectives together He was co founder of the International Simulation and Gaming Association ISAGA Cathy Stein Greenblat was a professor of sociology at Rutgers University using gaming simulation

education and health care beginning in the mid 1970s She was editor in chief of the international journal Simulation Gaming for many years Duke and Greenblat worked together and authored several influential books and both were honorary members of ISAGA until they passed away in 2022 The present book focuses on the past and actual scientific and practical impact of their work for design and development facilitation and debriefing evaluation and research of simulation games The book contains discussions and case examples of how their key concepts are still used and can be used in the future to have a social impact through gaming simulation Furthermore the book shows how their work and guiding simulation game design principles continue to inspire ongoing and future research in the context of dealing with complexity and to support social and environmental transition through gaming simulation Included are interviews with the two pioneers and contributions of other outstanding experts about their work *Proceedings of the 2020 Conference of The Computational Social Science Society of the Americas* Zining Yang,Elizabeth von Briesen,2022-01-04 This book is comprised of the latest research into CSS methods uses and results as presented at the 2020 annual conference of the Computational Social Science Society of the Americas CSSSA Computational social science CSS is the science that investigates social and behavioral dynamics through social simulation social network analysis and social media analysis The CSSSA is a professional society that aims to advance the field of computational social science in all areas including basic and applied orientations by holding conferences and workshops promoting standards of scientific excellence in research and teaching and publishing research findings and results The above mentioned conference was held virtually October 8 11 2020 What follows is a diverse representation of new results and approaches to using the tools of CSS and agent based modeling ABM in exploring complex phenomena across many different domains Readers will therefore not only have the results of these specific projects upon which to build along with a wealth of case study examples that can serve as meaningful exemplars for new research projects and activities they will also gain a greater appreciation for the broad scope of CSS Interdisciplinary Applications of Agent-Based Social Simulation and Modeling Adamatti, Diana Francisca,Dimuro, Graçaliz Pereira,Coelho, Helder,2014-04-30 Social simulation can be a difficult discipline to encompass fully There are many methods models directions and theories that can be discussed and applied to various social sciences Anthropology sociology political science economy government and management can all benefit from social simulation Interdisciplinary Applications of Agent Based Social Simulation and Modeling aims to bring a different perspective to this interdisciplinary topic This book presents current discussions and new insights on social simulation as a whole focusing on its dangers pitfalls deceits and challenges This book is an essential reference for researchers in this field professionals using social simulation and even students studying this discipline Agent-based Modeling and Simulation in Archaeology Gabriel Wurzer,Kerstin Kowarik,Hans Reschreiter,2014-11-08 Archaeology has been historically reluctant to embrace the subject of agent based simulation since it was seen as being used to re enact and visualize possible scenarios for a wider generally non scientific audience based on scarce and fuzzy data Furthermore

modeling in exact terms and programming as a means for producing agent based simulations were simply beyond the field of the social sciences This situation has changed quite drastically with the advent of the internet age Data it seems is now ubiquitous Researchers have switched from simply collecting data to filtering selecting and deriving insights in a cybernetic manner Agent based simulation is one of the tools used to glean information from highly complex excavation sites according to formalized models capturing essential properties in a highly abstract and yet spatial manner As such the goal of this book is to present an overview of techniques used and work conducted in that field drawing on the experience of practitioners
