Understanding

Human Agency Erasmus Mayr,2011-09-15 How can we be active agents when processes in the world are explicable by the laws of natural science Erasmus Mayr explores this deep running tension in our self understanding and develops a new agent causal solution to the conflict He argues that actions explained by aims and reasons are compatible with a scientific view of the universe

A Companion to the Philosophy of Action Timothy O'Connor,Constantine Sandis,2012-08-02 A Companion to the Philosophy of Action offers a comprehensive overview of the issues and problems central to the philosophy of action The first volume to survey the entire field of philosophy of action the central issues and processes relating to human actions Brings together specially commissioned chapters from international experts Discusses a range of ideas and doctrines including rationality free will and determinism virtuous action criminal responsibility Attribution Theory and rational agency in evolutionary perspective Individual chapters also cover prominent historic figures from Plato to Ricoeur Can be approached as a complete narrative but also serves as a work of reference Offers rich insights into an area of philosophical thought that has attracted thinkers since the time of the ancient Greeks

Physicalism and Mental Causation Sven Walter,Heinz-Dieter Heckmann,2015-11-04 Physicalism the thesis that everything there is in the world including our minds is constituted by basic physical entities has dominated the philosophy of mind during the last few decades But although the conceptual foundations of the physicalist agenda including a proper explication of notions such as causation determination realization or even physicalism itself must be settled before more specific problems e g the problems of mental causation and human agency can be satisfactorily addressed a comprehensive philosophical reflection on the relationships between the various key concepts of the debate on physicalism is yet missing This book presents a range of essays on the conceptual foundations of physicalism mental causation and human agency written by established and leading authors in the field

Concepts on the Move Annette W. Balkema,Henk Slager,2002 In order to give an impetus to the production of an apparatus of aesthetic concepts in line with Deleuze and Guattari's claim to create new concepts for a changing world this volume publishes statements and discussions of ten Concept on the Move workshops as well as texts and discussions of the concluding Concept on the Move symposium The integral outcome of the workshops the symposium and the discussions does not however present some sort of blueprint for the future of visual art and aesthetics If one wished to designate the Concepts on the Move publication in one notion at all that definitively could only be TOOLKIT A TOOLKIT in the sense of a great collection of ideas topics issues notions and concepts emerging in the 21st century world of visual art and theory They indeed could serve as an impetus for the construction and production of a body of theoretical work fit to understand today's technological theoretical and artistic developments in the art world Are concepts on the move Yes they are and they always will be on the great journey visual art takes them

Action, Knowledge, and Will John Hyman,2015 John Hyman explores

central problems in philosophy of action and the theory of knowledge and connects these areas of enquiry in a new way His approach to the dimensions of human action culminates in an original analysis of the relation between knowledge and rational behaviour which provides the foundation for a new theory of knowledge itself *Practical Conflicts* Peter Baumann, Monika Betzler, 2004-01-26

In this collection a distinguished roster of philosophers analyse the diverse forms of practical conflict **Action in Context** Anton Leist, 2012-02-13 The book illustrates the concept of action in three different contexts the justification of actions people's life history and pragmatism The special feature of this book is that a comprehensive view of this kind marks a departure from the atomistic approach of action theory which in itself raises a number of questions If actions are not justified by mental states how can persons then act for reasons How can persons actions over time be described and what is the connection with the question of personal identity If there is to be a unified understanding of the person does the practical have to take precedence over the theoretical and what does this mean for epistemology for example The ten contributors to this volume engage in an instructive manner with these and similar questions in the three sections of the book **Defeasibility in Philosophy** Claudia Blöser, Mikael Janvid, Hannes Ole Matthiessen, Marcus Willaschek, 2013-12-01

Defeasibility most generally speaking means that given some set of conditions A something else B will hold unless or until defeating conditions C apply While the term was introduced into philosophy by legal philosopher H L A Hart in 1949 today the concept of defeasibility is employed in many different areas of philosophy This volume for the first time brings together contributions on defeasibility from epistemology Mikael Janvid Klemens Kappel Hannes Ole Matthiessen Marcus Willaschek Michael Williams legal philosophy Frederick Schauer and ethics and the philosophy of action Claudia Blöser R Jay Wallace Michael Quante and Katarzyna Paprzycka The volume ends with an extensive bibliography by Michael de Araujo Kurth **The Philosophical Papers of Alan Donagan, Volume 2** Alan Donagan, 1994

A major voice in late twentieth century philosophy Alan Donagan is distinguished for his theories on the history of philosophy and the nature of morality The Philosophical Papers of Alan Donagan volumes 1 and 2 collect 28 of Donagan's most important and best known essays on historical understanding and ethics from 1957 to 1991 Volume 2 addresses issues in the philosophy of action and moral theory With papers on Kant von Wright Sellars and Chisholm this volume also covers a range of questions in applied ethics from the morality of Truman's decision to drop atomic bombs on Hiroshima and Nagasaki to ethical questions in medicine and law *A Companion to the Philosophy of Time* Adrian Bardon, Heather Dyke, 2015-11-02 A Companion to the Philosophy of Time presents the broadest treatment of this subject yet 32 specially commissioned articles written by an international line up of experts provide an unparalleled reference work for students and specialists alike in this exciting field The most comprehensive reference work on the philosophy of time currently available The first collection to tackle the historical development of the philosophy of time in addition to covering contemporary work Provides a tripartite approach in its organization covering history of the philosophy of time time as a

feature of the physical world and time as a feature of experience Includes contributions from both distinguished well established scholars and rising stars in the field *Agency, Norms, Inquiry, and Artifacts: Essays in Honor of Risto Hilpinen* Paul McNamara, Andrew J. I. Jones, Mark A. Brown, 2022-04-14 The book contains a collection of chapters written by experts from the fields of philosophy law logic computer science and artificial intelligence who pay tribute to Professor Risto Hilpinen s impressive work on the logic of induction on deontic logic and epistemology and on philosophy of science In addition to an introduction by the editors a section on Professor Hilpinen s positions professional services and honors as well as a complete bibliography of his writings the editors McNamara Jones and Brown have compiled a multidisciplinary global cross section of academic contemporaries that provides insights and perspectives on Hilpinen s influence and legacy The essays reflect central aspects of Risto Hilpinen s research interests and offer further contributions to some of the philosophical fields for which he is best known applied modal logic including deontic logic from the ancient Greek d on pertaining to the concepts of duty and obligation the semantics of normative language the logic of action and the theory of practical reasoning the analysis of the concept of artifact and the theory of semiotics in the tradition of Charles Peirce The presence in the collection of several papers relating to deontic logic underlines Hilpinen s importance in that area in which his publications have long been recognized as standard works The book is an essential collection of ideas for all those who feel at home in a variety of formal disciplines from propositional logic to the logic of artificial intelligence **Donald Davidson** Kirk Ludwig, 2003-07-28 Donald Davidson has been one of the most influential figures on modern analytic philosophy and has made seminal contributions in a wide range of subjects philosophy of language philosophy of action philosophy of mind epistemology metaphysics and the theory of rationality His principal work embodied in a series of landmark essays stretching over nearly 40 years exhibits a unity rare among philosophers contributing on so many diverse fronts This is the only comprehensive introduction to the full range of Davidson s work **Scientific Explanation, Causality, and Agency** Majid D. Beni, 2024-07-12 This book draws on advances in computational neuroscience and theoretical biology to provide a clear and accessible agentive account of the nature of causality and scientific explanations Instead of attempting to establish the elements of scientific explanation such as causality in a reality unadulterated by a human perspective this book relies on scientific facts about cognition to describe the structure of agency from a distinctly human perspective The book draws on the Free Energy Principle to reinforce the agency theory of causality and extend it to an account of explanation as well This principle not only provides a theoretical account of how self organising systems engage with the causal structure of the environment but it also offers a viable notion of agency and is compatible with the projectivist aspects of the agency theory Scientific Explanation Causality and Agency will appeal to researchers and advanced students working in philosophy of science philosophy of cognitive science epistemology computational neuroscience and theoretical biology **Geist als Ursache?** Markus F. Peschl, Alexander Batthyany, 2008 **Topical Relevance in Argumentation** Douglas

Walton,1982-01-01 It is a longstanding if not altogether coherent tradition of logic and rhetorical studies that an argument can be incorrect or fallacious in virtue of some proposition in it being irrelevant This monograph clarifies that tradition Non classical propositional calculi including relevance logics and relatedness logics are juxtaposed against conversational criticisms of irrelevance in natural argumentation e g in parliamentary debates The object is to see if there is a reasonable way of evaluating criticisms like That s beside the point or That s irrelevant *Intentionality, Deliberation and Autonomy*

Sandro Nannini,2016-05-23 Many important thinkers in the philosophical tradition like Aristotle or Hume have used an explicit theory of action as the basis of their respective normative theories of practical rationality and morality The idea behind this architecture of theories is that action theory can inform us about the origin bonds reach and limits of practical reason The aim of this book is to revive this direct connection between action theory and practical philosophy in particular to provide systematic action theoretical underpinnings for the discussion about the normative structure of practical reason This book brings together a collection of specially commissioned essays from internationally prestigious scholars in the field and represents the state of the art in contemporary philosophy of action The book is divided into three parts i conceptual work about what actions intentions and intentional actions are ii empirical theory of practical deliberation and iii theories about the action theoretic features of autonomy The volume significantly advances these three lines of research and offers important new contributions to each of them **A Companion to Donald Davidson** Ernest Lepore,Kirk Ludwig,2013-06-17

A Companion to Donald Davidson presents newly commissioned essays by leading figures within contemporary philosophy Taken together they provide a comprehensive overview of Davidson s work across its full range and an assessment of his many contributions to philosophy Highlights the breadth of Davidson s work across philosophy Demonstrates the continuing influence his work has on the philosophical community Includes newly commissioned contributions from leading figures in contemporary philosophy Provides an in depth exposition and analysis of Davidson s work across the range of areas to which he contributed including philosophy of action epistemology metaphysics philosophy of language and philosophy of mind

New Directions in the Philosophy of Science Maria Carla Galavotti,Dennis Dieks,Wenceslao J. Gonzalez,Stephan Hartmann,Thomas Uebel,Marcel Weber,2014-06-02 This volume sheds light on still unexplored issues and raises new questions in the main areas addressed by the philosophy of science Bringing together selected papers from three main events the book presents the most advanced scientific results in the field and suggests innovative lines for further investigation It explores how discussions on several notions of the philosophy of science can help different scientific disciplines in learning from each other Finally it focuses on the relationship between Cambridge and Vienna in twentieth century philosophy of science The areas examined in the book are formal methods the philosophy of the natural and life sciences the cultural and social sciences the physical sciences and the history of the philosophy of science
