reader will soon appreciate on reading this superb radiologic text on rheumatoid arthritis that here is something new and quite different from what has been published in the past The combination of clinician and radiologist has produced a textbook which will become a standard reference on the subject The authors are both well known in their respective fields and they have concentrated on the early changes in the disease not only those in the articular surfaces but also those in the soft tissues In 1948 the late Dr Philip Ellman coined the term rheumatoid disease to indicate the systemic nature of rheumatoid arthritis Colour Photography Owen Wheeler,1928 This work examines color photography principles and practice for novices and experts in the field
