Industrial Cyber-Physical Systems Sascha Julian Oks, 2024-03-14 Cyber physical systems CPS are one of the key concepts of Industry 4.0 Despite their great potentials for industrial value creation there are challenges such as a significant increase in complexity as a result of which the development status of Industry 4.0 is behind expectations This book addresses this issue with the following research design In addition to providing a comprehensive foundation of industrial CPS and Industry 4.0 four studies are conducted each consisting of an exploratory research part and a design science research DSR part In doing so four perspectives are directed at the topic of industrial CPS A systemic a stakeholder centered an organizational and a holistic In conclusion the contributions are integrated in a summary and the artifacts are incorporated into an overarching methodological framework Thus theoretical contributions are derived and concrete practical recommendations for the main target groups of organizations educational institutions and international delegations provided

A Practitioner's Guide to European Patent Law Paul England, 2025-08-21 This new edition offers a comprehensive and practical guide to European patent law This book uniquely addresses European patent law using a thematic approach assessing the national and EPO approaches together rather than in nation by nation chapters Each chapter therefore enables the common ground and differences between approaches to be assessed The most influential European patent law jurisdictions are covered in the book including the leading cases from the European Patent Office England and Wales France Germany and the Netherlands The book also draws insights from further afield with contributions from other very active patent jurisdictions including Italy Sweden Denmark and Switzerland In addition to featuring completely revised content on the fast moving subject areas of FRAND and plausibility and updates in all other areas of patent law the third edition includes for the first time fully integrated coverage of every substantive decision of the Unified Patent Court A must read for anyone working in the field of European patent law

Software and Mind Andrei Sorin, 2013-01-01 Addressing general readers as well as software practitioners *Software and Mind* discusses the fallacies of the mechanistic ideology and the degradation of minds caused by these fallacies Mechanism holds that every aspect of the world can be represented as a simple hierarchical structure of entities But while useful in fields like mathematics and manufacturing this idea is generally worthless because most aspects of the world are too complex to be reduced to simple hierarchical structures Our software related affairs in particular cannot be represented in this fashion And yet all programming theories and development systems and all software applications attempt to reduce real world problems to neat hierarchical structures of data operations and features Using Karl Popper's famous principles of demarcation between science and pseudoscience the book shows that the mechanistic ideology has turned most of our software related activities into pseudoscientific pursuits Using mechanism as warrant the software elites are promoting invalid even fraudulent

software notions They force us to depend on generic inferior systems instead of allowing us to develop software skills and to create our own systems Software mechanism emulates the methods of manufacturing and thereby restricts us to high levels of abstraction and simple isolated structures The benefits of software however can be attained only if we start with low level elements and learn to create complex interacting structures Software the book argues is a non mechanistic phenomenon So it is akin to language not to physical objects Like language it permits us to mirror the world in our minds and to communicate with it Moreover we increasingly depend on software in everything we do in the same way that we depend on language Thus being restricted to mechanistic software is like thinking and communicating while being restricted to some ready made sentences supplied by an elite Ultimately by impoverishing software our elites are achieving what the totalitarian elite described by George Orwell in Nineteen Eighty Four achieves by impoverishing language they are degrading our minds

Secure Your Business Carsten Fabig,Alexander Haasper,2018-11-27 A couple of strong trends like digitalization and cyber security issues are facing the daily life of all of us this is true for our business and private life Secure your business is more important than ever as cybercrime becomes more and more organized and not only an individual hack like it was around the turn of the century As a starting point the first article deals with information management and how to overcome the typical obstacles when introducing a company wide solution Based on the product called M Files a strategical and tactical approach is presented to improve information governance beyond the regulatory requirements Following with an article about effective policy writing in information security a good practice approach is outlined how mapping a control system to ISO27001 helps for governance and control set optimization purposes Network segmentation is a complex program for the majority organizations Based on a look at the treat landscape to mitigate related risks by network segmentation the relevant technologies and approached are presented focusing on the most important part the conceptual solution to keep the business and security interest in a balance How can security standards deliver value Based on a short summary regarding the SANS20 and ISO27001 standards project good practices are demonstrated to tackle the data leakage risk The following contributions to this book are about network device security email spoofing risks mitigation by DMARC and how small and medium enterprises should establish a reasonable IT security risk management The next article is dealing with the topic of holistically manage cybersecurity based on the market drivers and company specific constraints while the final article reports about a data center transition approach and how related risks can be effectively managed The field of cybersecurity is huge and the trends are very dynamic In this context we belief that the selected articles are providing relevant insights in particular for the regulated industries We wish our readers inspiring insights and new impulses by reading this book Many thanks again to all colleagues and cooperators contributing to this Vineyard book
