Ontario BlackBerry outsmarted the global giants with an addictive smartphone that generated billions of dollars. Its devices were so ubiquitous that even President Barack Obama favoured them above all others. But just as it was emerging as the dominant global player, BlackBerry took a dramatic turn. Losing the Signal is the riveting, never before told story of one of the most spectacular technological upsets of the 21st century. Unlike Enron, which was undone by its executives' illegal activities, or Lehman Brothers, which collapsed as part of a larger global banking crisis, BlackBerry's rise and fall is a modern day tale of the unrelenting speed of success and failure. It is a thrilling account of how two mismatched CEOs outsmarted more powerful competitors with a combination of innovation and sharp-elbowed tactics, and how once on top of the world they lost their way. The company responded too slowly to competitors' innovations, and when it finally made its move, it stumbled with delayed, poorly designed and unpopular smartphones. A little more than a decade after Research In Motion introduced the BlackBerry, it is now struggling to survive. Its share of the US phone market fell from 50 per cent in 2009 to about one percent in 2013, showing just how aggressive, fast and unforgiving today's global business market can be.

Blackberry Passport Gack Davidson, 2016-10-10. The Blackberry Passport was released on September 2014. It's far uniquely designed and may not be for everybody. It has a protracted-lasting battery and a whole lot of storage space, which has earned it rave reviews. The downfalls are the limited apps available and the issue faced whilst looking to operate the tool one-handed. The customizations offered aren't much compared to its competition; however, the Passport permits you to make big changes to fit each person and enhance their usual experience with the device.
