Astronomy and particle physics Great Britain: Parliament: House of Commons: Science and Technology Committee, 2011-05-13 The Science and Technology Committee warns that the UK's prominence in astronomy and particle physics and its ability to attract and inspire the next generation of scientists in these areas could be at risk if reduced budgets hit the UK's growth prospects reputation and expertise Although science did relatively well in the recent Spending Review funding for astronomy sees a total reduction of 21% over the next four years compared with 2010-11 More starkly comparing 2014-15 with 2005 spending in astronomy and particle physics will be around 50% lower than its level six years ago This is worrying particularly when set against the planned increased investment in science and innovation by the UK's international peers as part of long term strategies to ensure economic growth The Science and Technology Facilities Council STFC the research council which funds research and facility development in astronomy particle physics and nuclear physics is risking the UK's ability to stay at the forefront of future developments by focusing its astronomy and particle physics programmes into fewer areas A case in point is the UK's planned withdrawal from all Northern Hemisphere optical and ground based astronomical facilities which could see UK leadership and competitive advantage being handed over to international peers The Committee is also highly critical of past STFC strategies especially its failure to incorporate into policy documents details of the planned withdrawals The report also addresses the future of the National Schools Observatory and outreach which is essential to inspire the next generation of scientists Astronomy for Babies David McMahon, 2015-12-14 Astronomy explained so simply a baby can understand it Learn about the planets the solar system stars the galaxy and the universe **The Baby King Must Die!** Robert W. unexpected intruder in the heavenly vault gave off a light that almost rivaled that of the full Moon drowning out the familiar patterns of stars with its glare The new star s steady white light penetrated deep into the sacred cave illuminating an age old patchwork of intricately drawn pictographs some of these depicted terrestrial objects and events from mundane sketches of bison to vast and sweeping panoramic images of wild galloping horses Other scenes showed celestial phenomena such as the phases of the Moon and prominent asterisms or star patterns The next morning accompanied by solemn chanting in which the entire community participated an elderly shaman entered the sacred cave by the light of a fiery brand and selected a suitable area upon which to depict the new star Once the artwork was finished the shaman reappeared at the cave entrance he held out his arms wide to the slowly brightening morning skies and announced that the powerful magic of the new star had been captured and could now be used to ensure the continuing prosperity of his tribe

Shema,2012-10-22 Our creator finally provides the actual details of his design in the long sort after Theory of Everything Now our eyes finally open to fully understand the world which we have studied The tribes and so called races of man have all been given pieces of this massive puzzle When put together it weaves a tapestry of one beautiful story The bible provides the structure the Africans provide a first person account Native Americans hold vital elements the Aztecs tell us the thoughts of God and his expectations for his designs Asian theology focuses on living today and Christianity takes us to a new tomorrow But no story could be complete without the details the process used the illusive How for this we thank the final seers of science The bible tells us that to achieve the design of man God cursed man to become weaker naked to have pain during labor and the entire event is triggered in the process of eating Geneticist confirm that the genetic mutations which transformed man are weaker muscles a narrower pelvic cavity a significant loss of body hair and a redesign in the jaw muscles which allows the brain to grow much larger than other primates From this we discover that what science refers to as a genetic mutation is considered a biblical curse And from this every curse from those relating to incest and over eating are connected to mutations From the weaving of the universe to the wiring of the brain every question you ve ever asked about life and death and who we are is finally answered God is not dead he is life
