Globalisation and Education Policy Reform in Botswana Richard Tabulawa, 2023-07-21 This book uses the global local dialect approach to explicate education policy reform in Botswana and interrogates the practical effects of the various education policies on curriculum pedagogy and governance of the Botswana General Education system Considering the effect of three reform policies since Botswana's Independence in 1966 the book evaluates the performance of each of the policies and examines their consequences in terms of the interplay of global forces and domestic pressures The result of this interplay has been an education landscape that while reflecting globally circulating education discourses markedly differs from those same discourses The book argues that the State in Botswana has appropriated education policy to legitimate itself in times of crisis and that each policy has improved access to general education but collectively have failed to improve its quality making suggestions for how this can be improved in the future As the first book of its kind to delve into education in Botswana from a single authored critical lens the book will be a highly relevant reading for academics researchers and post graduate students of African education comparative education education policy and curriculum studies

Towbin, Carlo Napolitano, Guia Guffanti, 2017-09-12 The field of cardiovascular genetics has tremendously benefited from the recent application of massive parallel sequencing technology also referred to as next generation sequencing NGS However along with the discovery of additional genes associated with human cardiac diseases the analysis of large dataset of genetic information uncovered a much more complex and variegated landscape which often departs from the comfort zone of the monogenic Mendelian diseases image that clinical molecular geneticists have been well acquainted with for many decades It is now clear that in addition to highly penetrant genetic variants which in isolation are able to recapitulate the full clinical presentation when expressed in animal models we are now aware that a small but significant fraction of subjects presenting with cardiac muscle diseases such as cardiomyopathies or primary arrhythmias such as long QT syndrome LQTS may harbor at least two deleterious variants in the same gene compound heterozygous or in different gene double heterozygous Although the clinical presentation in subjects with more than one deleterious variant appears to be more severe and with an earlier disease onset it somehow changes the viewpoint of clinical molecular geneticists whose aim is to identify all possible genetic contributors to a human condition In this light the employment in clinical diagnostics of the NGS technology allowing the simultaneous interrogation of a DNA target spanning from large panel of genes up to the entire genome will definitely aid at uncovering all such contributors which will have to be tested functionally to confirm their role in human cardiac conditions The uncovering of all clinically relevant deleterious changes associated with a cardiovascular disease would probably increase our understanding of the clinical variability commonly occurring among affected family relatives and potentially provide with unexpected therapeutic targets for the treatment of symptoms related to the presence of accessory deleterious

genetic variants other than the key molecular culprit The objective of this Research Topic is to explore the current challenges presenting to the cardiovascular genetics providers such as clinical geneticists genetic counselors clinical molecular geneticists and molecular pathologists involved in the diagnosis counseling testing and interpretation of genetic tests results for the comprehensive management of patients affected by cardiovascular genetic disorders **Justice in Extreme Cases** Darryl Robinson, 2020-12-17 The book shows how moral theory can challenge and improve international criminal law and how extreme cases can challenge and improve mainstream theory **International Conference on Multi disciplinary Technologies and challenges in Industry 4.0** Dr. Prakash s, dr.
