Snow Country ,1997 In the 87 issues of Snow Country published between 1988 and 1999 the reader can find the defining coverage of mountain resorts ski technique and equipment racing cross country touring and the growing sport of snowboarding during a period of radical change The award winning magazine of mountain sports and living tracks the environmental impact of ski area development and people moving to the mountains to work and live Gender and Natural Resource Management Rebecca Elmhirst,2008 This book is about the gender dimensions of natural resource exploitation and management with a focus on Asia It explores the uneasy negotiations between theory policy and practice that are often evident within the realm of gender environment and natural resource management especially where gender is understood as a political negotiated and contested element of social relationships It offers a critical feminist perspective on gender relations and natural resource management in the context of contemporary policy concerns decentralized governance the elimination of poverty and themainstreaming of gender Through a combination of strong conceptual argument and empirical material from a variety of political economic and ecological contexts including Cambodia China Indonesia Malaysia

Nepal Thailand and Vietnam the book examines gender environment linkages within shifting configurations of resource access and control The book will serve as a core resource for students of gender studies and natural resource management and as supplementary reading for a wide range of disciplines including geography environmental studies sociology and development It also provides a stimulating collection of ideas for professionals looking to incorporate gender issues within their practice in sustainable development Published with IDRC Agricultural mechanization and child labour in developing countries Takeshima, H., Vos, R., 2022-03-01 The FAO IFPRI study focuses on the use of tractors because they are among the most versatile farm mechanization tools and are universal power sources for all other driven implements and equipment in agriculture with significant potential to replace animal draught power and human power including children s muscle power Tractor use is typically also the first type of machine powered equipment in use at lower levels of agricultural development the context where most child labour is found Mechanization is mostly assumed to reduce child labour as it is expected to be labour saving in general Yet this is not always the case as it has also been observed that the use of tractors and other machinery could increase children's engagement in farm activities. This may be the case if for instance their use allows farms to cultivate larger areas or if it leads to shifting chores of work from hired labor to family workers e g for weeding edges of farmland not reachable by machinery Evidence has been scant thus far but the few available studies have mostly lent greater support to the hypothesis that mechanization reduces children's productive engagement Most available studies have focused on specific cases and based on scant data The new FAO IFPRI study provides a rigorous quantitative assessment for seven developing countries in Asia India Nepal and Viet Nam and sub Saharan Africa Ethiopia Ghana Nigeria and Tanzania based on comparable farm household survey data Resources in Education ,2001-04 School Life .1938

<u>Urban Open Spaces</u> Helen Woolley,2003-09-02 There is enormous interest in urban design and the regeneration of our urban areas but current thinking often concentrates on the built form forgetting the important role that open spaces play Urban Open Spaces brings together extensive research and practical experience to prove the opportunities and benefits of different types of open space to society and individuals Focusing on the importance of open spaces in daily urban life the book is divided into three sections The first section describes the social health environmental and economic benefits and opportunities that open spaces can provide The second section discusses the different types of urban open spaces that individuals or communities might use on a daily basis from private gardens to commercial squares and waterway corridors. The final section provides best practice case studies demonstrating urban spaces being incorporated in new developments and community initiatives. This is the first book to bring together a variety of evidence from different disciplines to outline the benefits and opportunities of urban open spaces in an accessible way.
