### **A Practical Guide for Advanced Methods in Solar Photovoltaic Systems** Adel Mellit, Mohamed

Benghanem, 2020-05-27 The present book focuses on recent advances methods and applications in photovoltaic PV systems. The book is divided into two parts: the first part deals with some theoretical simulation and experiments on solar cells including efficiency improvement, new materials, and behavior performances. While the second part of the book is devoted mainly on the application of advanced methods in PV systems including advanced control, FPGA implementation, output power forecasting based artificial intelligence technique, AI high PV penetration, reconfigurable PV architectures, and fault detection and diagnosis based AI. The authors of the book try to show to readers more details about some theoretical methods and applications in solar cells and PV systems, e.g., advanced algorithms for control optimization, power forecasting, monitoring, and fault diagnosis methods. The applications are mainly carried out in different laboratories and locations around the world as projects in Algeria, KSA, Turkey, Morocco, Italy, and France. The book will be addressed to scientists, academics, researchers, and PhD students working in this topic. The book will help readers to understand some applications including control, forecasting, monitoring, fault diagnosis of photovoltaic plants, as well as in solar cells such as behavior performances and efficiency improvement. It could also be used as a reference and help industry sectors interested in prototype development.
