Cultural Identity in British Musical Theatre, 1890-1939 Ben Macpherson, 2018-05-15 This book examines the performance of Britishness on the musical stage. Covering a tumultuous period in British history, it offers a fresh look at the vitality and centrality of the musical stage as a global phenomenon in late Victorian popular culture and beyond. Through a re-examination of over fifty archival play scripts, the book comprises seven interconnected stories told in two parts. Part One focuses on domestic and personal identities of Britishness and how implicit anxieties and contradictions of nationhood, class, and gender were staged as part of the popular cultural condition. Broadening in scope, Part Two offers a revisionary reading of Empire and Otherness on the musical stage and concludes with a consideration of the Great War and the interwar period as musical theatre performed a nostalgia for a particular kind of Britishness reflecting the anxieties of a nation in decline.

What We Are: The Evolutionary Roots of Our Future Lonnie Aarssen, 2022-07-05 Other animals are driven to spend essentially their whole lives just trying to get fed stay alive and get laid That's about it The same was true for our proto human ancestors And modern humans of course also require a Survival Drive and a Sex Drive in order to leave descendants But today we spend most of our lives mainly just trying to convince ourselves that our existence is not absurd In *What We Are* Queen's University biologist Lonnie Aarssen traces how our biocultural evolution has shaped *Homo sapiens* into the only creature that refuses to be what it is the only creature preoccupied with a deeply ingrained and absurd sentiment I have a distinct mental life an inner self that exists separately and apart from material life and so unlike the latter need not come to an end This delusion conceivably gave our distant ancestors some wishful thinking for finding some measure of relief from the terrifying uniquely human knowledge of the eventual loss of corporeal survival But this came with an impulsive nagging doubt an obsessive underlying uncertainty self impermanence anxiety Biocultural evolution however was not finished It also gave us two additional uniquely human primal drives both serving to help quell the burden of this anxiety Legacy Drive generates delusional cultural domains for extension of self and Leisure Drive generates pleasurable cultural domains for distraction escape from self Legacy Drive and Leisure Drive Aarssen argues represent two of the most profound consequences of human cognitive and cultural evolution *What We Are* advances propositions regarding how a visceral susceptibility to self impermanence anxiety has paradoxically played a

pivotal role in rewarding the reproductive success of our ancestors and has thus been a driving force in shaping fundamental motivations and cultural norms of modern humans More than any other milestone in the evolution of human minds self impermanence anxiety and its mitigating Drives for Legacy and Leisure account for not just the advance of civilization over the past many thousands of years but also now its impending collapse Effective management of this crisis Aarssen insists will require a deeper and more broadly public understanding of its Darwinian evolutionary roots as laid out in What We Are
