**Making Every RE Lesson Count** Dawn Cox,Louise Hutton,2021-02-01 Writing in the practical engaging style of the award winning Making Every

Lesson Count Louise and Dawn provide teachers of religious education with the means to help their pupils unpick the big questions of religious belief and practice and of morality and philosophy the things that make us human Making Every RE Lesson Count is underpinned by six pedagogical principles challenge explanation modelling practice feedback and questioning and shares simple realistic strategies that RE teachers can use to develop the teaching and learning in their classrooms Each chapter explores a different principle in theory as well as in practice and concludes with a series of questions that will inspire reflective thought and help teachers relate the content to their own work in the classroom Furthermore the book brings together two key strands in RE teaching namely what RE teachers teach and how they teach it and the authors consider these strands through the disciplinary lenses of theology philosophy and the social sciences And in doing so Louise and Dawn place these disciplines at the heart of teaching and learning in the RE classroom Written for new and experienced practitioners alike Making Every RE Lesson Count will enable teachers to improve their students conceptual and contextual understanding of the topics and themes explored across the breadth of the RE curriculum Suitable for RE teachers of pupils aged 11 to 18 *Shaking Up Special Education* Savanna Flakes,2020-11-23 Shaking Up Special Education is an easy to use instructional guide to the essential things you need to know about working with students with exceptionalities Interactive collaborative and engaging this go to instructional resource is packed with the top instructional moves to maximize learning for all students Featuring sample activities and instructional resources chapters cover topics ranging from specially designed instruction to co teaching to technology to social emotional learning and self care Designed with special educators in mind this book is also ideal for any general educator looking to increase student achievement and revitalize their practice Shake up your teaching and learn how to build a more inclusive classroom Getting to the Common Core Sharon L. Spencer,Sandra Vavra,2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools

and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Value s of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research
