## Classifying Mutations: DNA sequence

1. Mutations can be classified by how the DNA sequence is altered

- **Substitution:** a single nucleotide is substituted with another (A to G)
- **Insertion:** one or more nucleotides are added into the DNA sequence
- **Deletion:** one or more nucleotides are removed from the DNA sequence

The diagram illustrates three types of DNA mutations using a sequence of colored blocks representing nucleotides. The original sequence is A-T-G-C-A-T-T-G. Substitution shows the 4th nucleotide (C) being replaced by G. Insertion shows a new nucleotide (A) being added after the 5th nucleotide (T). Deletion shows the 6th nucleotide (T) being removed from the sequence.

- **Deletion:** one or more nucleotides are removed from the DNA sequence

1. **Introduction**
