Flynn, 2015-04-01 What is a rubric and how are they being used in teacher education and evaluation When did rubrics become ubiquitous in the field of education What impact do rubrics have on students teachers teacher educators and the educational enterprise This book is an edited volume of essays that critically examine the

phenomenon of rubrics in teacher education evaluation and education more broadly Rubrics have seen a dramatic rise in use and presence over the past twenty five years in colleges of education and districts across the country Although there is a wealth of literature about how to make rubrics there is scant literature that explores the strengths and weaknesses of rubrics and the impact the rubric phenomenon is having in reshaping education The chapters included in this edited volume will critically reflect on the contemporary contexts of rubrics and the uses and impact of rubrics in education Since rubrics have become indelible in education it is necessary for a fuller nuanced discussion of the phenomenon Creating a book that explores these aspects of rubrics is timely and fundamental to expanding the discourse on this ubiquitous evaluation tool This book is not meant to be a series of chapters dedicated to best practices for creating rubrics nor is this text meant to present all sides of the rubric discussion Rather this text intends to offer critical polemics about rubrics that can spur greater critical discussion about a phenomenon in education that has largely been unquestioned in the literature

**Mathematical Practice** Jody Azzouni, 1994-02-25 This original and exciting study offers a completely new perspective on the philosophy of mathematics Most philosophers of mathematics try to show either that the sort of knowledge mathematicians have is similar to the sort of knowledge specialists in the empirical sciences have or that the kind of knowledge mathematicians have although apparently about objects such as numbers sets and so on isn't really about those sorts of things at all Jody Azzouni argues that mathematical knowledge is a special kind of knowledge that must be gathered in its own unique way He analyzes the linguistic pitfalls and misperceptions philosophers in this field are often prone to and explores the misapplications of epistemic principles from the empirical sciences to the exact sciences What emerges is a picture of mathematics sensitive both to mathematical practice and to the ontological and epistemological issues that concern philosophers The book will be of special interest to philosophers of science mathematics logic and language It should also interest mathematicians themselves

Transparency in Assessment – Exploring the Influence of Explicit Assessment Criteria Anders Jönsson, Frans Prins, 2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students Sometimes it is required for accountability purposes at other times criteria are used as a means to communicate expectations to students However the idea that explicit assessment criteria should be shared with students has been contested On the one hand research has shown that explicit criteria may positively affect student performance reduce their anxiety as well as support students use of self regulated learning strategies On the other hand there are fears that explicit criteria may have a restraining influence on students learning as well as limiting their autonomy and creativity There are also indications of students becoming more performance oriented as opposed to learning oriented when being provided with explicit assessment criteria Taken together it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria and under which circumstances it is not In particular empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence In this book we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria A deeper understanding of the influence of explicit assessment criteria on students understanding of criteria motivation and learning is equally imperative for future research and educational practice both of which need to go beyond individual opinions and convictions

**Greek Myth and the Bible** Bruce Louden, 2018-11-06 Since the nineteenth century rediscovery of the Gilgamesh epic we have known that the Bible imports narratives from outside of Israelite culture refiguring them for its own audience Only more recently however has come the realization that Greek culture is also a prominent source of biblical narratives Greek Myth and the Bible argues that classical mythological literature and the biblical texts were composed in a dialogic relationship Louden examines a variety of Greek myths from a range of sources analyzing parallels between biblical episodes and Hesiod Euripides Argonautic myth selections from Ovid s

Metamorphoses and Homeric epic This fascinating volume offers a starting point for debate and discussion of these cultural and literary exchanges and adaptations in the wider Mediterranean world and will be an invaluable resource to students of the Hebrew Bible and the influence of Greek myth **School and Community** ,1993 **History and the Contemporary Novel** David Cowart,1989 Cowart presents a study of international historical fiction since World War II with reflections on the affinities between historical and fictional narrative analysis of the basic modes of historical fiction and readings of a number of historical novels including John Barth's *The Sot Weed Factor* Marguerite Yourcenar's *Memoirs of Hadrian* Russell Hoban's *Riddley Walker* Margaret Atwood's *The Handmaid's Tale* Giuseppe Tomasi Di Lampedusa's *The Leopard* D M Thomas's *The White Hotel* William Faulkner's *Go Down Moses* and Umberto Eco's *The Name of the Rose* He proposes recognizing four modes of the historical novel the past as a distant mirror of the present fictions whose authors seek to pinpoint the precise historical moment when the modern age or some prominent feature of it came into existence fictions whose authors aspire purely or largely to historical verisimilitude and fictions whose authors reverse history to contemplate utopia and dystopia in the future Thus historical fiction can be organized under the rubrics The Distant Mirror The Turning Point The Way It Was and The Way It Will Be This fourfold schema and his focus on postwar novels set Cowart's work apart from previous studies which have not devoted adequate space to the contemporary historical novel Cowart argues that postwar historical fiction merits more extensive treatment because it is the product of an age unique in the annals of history an age in which history itself may end The Mythology in Our Language Ludwig Wittgenstein,2020-05-01 In 1931 Ludwig Wittgenstein wrote his famous *Remarks on Frazer's Golden Bough* published posthumously in 1967 At that time anthropology and philosophy were in close contact continental thinkers drew heavily on anthropology's theoretical terms like mana taboo and potlatch in order to help them explore the limits of human belief and imagination Now the book receives its first translation by an anthropologist in the hope that it can kick start a new era of interdisciplinary fertilization Wittgenstein's remarks on ritual magic religion belief ceremony and Frazer's own logical presuppositions are as lucid and thought provoking now as they were in Wittgenstein's day Anthropologists find themselves asking many of the same questions as Wittgenstein and in a reflection of that this volume is fleshed out with a series of engagements with Wittgenstein's ideas by some of the world's leading anthropologists including Veena Das David Graeber Wendy James Heonik Kwon Michael Lambek Michael Puett and Carlo Severi
