Bibliography of Scientific and Industrial Reports ,1968-11 Scientific American ,1881 Popular Mechanics ,1928-03

Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it s practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle Bulletin ... of Books Added to the Public Library of Detroit, Mich Detroit Public Library,1891 **Nature** ,1881 Current Index to Journals in Education ,2001 **The Literary World** ,1849 *Niels Bohr* Helge Kragh,2022-06-15 Niels Bohr s atomic theory of 1913 is one of the absolute highlights in the history of modern science It was only with this work that physicists realized that quantum theory is an essential ingredient in atomic physics and it was also only with this work that Rutherford s nuclear model dating from 1911 was transformed into a proper theory of atomic structure In a longer perspective Bohr s quantum atom of 1913 gave rise to the later Heisenberg Schr dinger quantum mechanics and all its marvellous consequences This book is a detailed account of the origin of the Bohr atom centred around his original scientific articles of 1913 which are here reproduced and provided with the necessary historical background In addition to the so called trilogy the three papers published in Philosophical Magazine also two other and less well known yet important papers are included The present work starts with a condensed biographical account of Bohr s life and scientific career from his birth in Copenhagen in 1885 to his death in the same city 77 years later It then proceeds with a chapter outlining earlier ideas of atomic structure and tracing Bohr s route from his doctoral dissertation in 1911 over his stays in Cambridge and Manchester to the submission in April 1913 of the first part of the trilogy The reproduction of Bohr s five articles is followed by notes and comments directly related to the texts with the aim of clarifying some of the textual passages and to explicate names and subjects that may not be clear or well known The reception of Bohr s radically new theory by contemporary physicists and chemists is discussed in a final chapter which deals with the immediate reactions to Bohr s theory 1913 1915 mostly among British German and American scientists Historians of science have long been occupied with Bohr s atomic theory which was the subject of careful studies in connection with its centenary in 2013 The present work offers an extensive source based account of the original theory aimed at a non specialist audience with an interest in the history of physics and the origin of the quantum world In 1922 Bohr was awarded the Nobel Prize for his theory The coming centenary will undoubtedly cause an increased interest in how he arrived at his revolutionary picture of the constitution of atoms and molecules English Mechanic and Mirror of Science ,1870 **Tools and Modes of Representation in the Laboratory Sciences** U. Klein,2013-04-17 constitutive of reference in laboratory sciences as cultural sign systems and their manipulation and superposition collectively shared classifications and associated conceptual

frameworks and various forms of collective action and social institutions This raises the question of how much modes of representation and specific types of sign systems mobilized to construct them contribute to reference Semioticians have argued that sign systems are not merely passive media for expressing preconceived ideas but actively contribute to meaning Sign systems are culturally loaded with meaning stemming from previous practical applications and social traditions of applications In new local contexts of application they not only transfer stabilized meaning but also can be used as active resources to add new significance and modify previous meaning This view is supported by several analyses presented in this volume Sign systems can be implemented like tools that are manipulated and superposed with other types of signs to forge new representations The mode of representation made possible by applying and manipulating specific types of representational tools such as diagrammatic rather than mathematical representations or Berzelian formulas rather than verbal language contributes to meaning and forges fine grained differentiations between scientists concepts Taken together the essays contained in this volume give us a multifaceted picture of the broad variety of modes of representation in nineteenth century and twentieth century laboratory sciences of the way scientists juxtaposed and integrated various representations and of their pragmatic use as tools in scientific and industrial practice **Serials Holdings** Linda Hall Library,1983 *Bulletin of the Atomic Scientists* ,1968-04 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world **International Finance Discussion Papers** ,1995 **Book Catalog of the Library and Information Services Division: Subject index** Environmental Science Information Center.
