frontiersin.org about contact **Wealth and the Built Environment** Emilio José García, Brenda Vale, 2025-04-26 The need to address global environmental problems is urgent The United Nations 17 Sustainable Development Goals SDGs cover a wide range of global concerns from poverty hunger and gender equity to justice and climate action Concerningly the SDGs still have faith in economic growth and technological innovation as the means of fixing all global concerns including climate change What is not questioned is whether solving development and sustainability problems through economic growth for the accumulation of wealth for the few has led to many of the current unequal development and environmental problems If unfair growth and wealth accumulation have been part of the problem how can they be part of the solution The problem with the SDGs is that their fulfilment relies on wealth creation without the fundamental concomitant of wealth redistribution The one common driver of change affecting both sustainability and development that has not been included in the SDGs is wealth the central focus of this book SDG 11 sustainable cities and communities presents a further paradox unless the issue of wealth
